Let us know your requirements and we can supply your wants.

Petite Alternating Enclosed Long-Burning Arc Lamp.

Adapted for great variations in voltage and frequency. Ordinary changes in voltage and frequency do not produce flickering or unsteadiness of the arc. Standard adjustment 104 volts; with this adjustment the lamps will burn steadily under variations from 90 to 115 volts.

Reasonable cost.
High efficiency.
No framework in sight.
Shade reflects upward rays downward.
For indoor and outdoor use.
Easily trimmed.

PETITE ALTERNATING ENCLOSED ARC LAMP, WITH STANDARD INNER GLOBE L AND OUTER ENCLOSING GLOBE S.

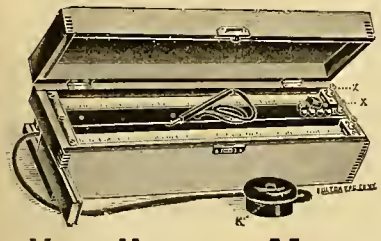
A DIRECT-READING OHMMETER.



You Have a Motor

In a machine shop
Mounted on the ceiling.

What is the Resistance of its Field?

You try with a testing set
And level
And pull plugs
And press keys
And wait for needle to come to rest
And add
And divide
And make mistakes
And swear.

You use a direct-reading ohmmeter and get the results twelve seconds after the connections are made.

OUR STUDENTS SUCCEED.

FARMER BECOMES SUPERINTENDENT.

I think there is no better chance to advance than through the Schools. Before I enrolled I was a farmer, and knew practically nothing about electricity or steam engineering. My Courses in Electric Power and Lighting and Stationary Engineering have been a source of great benefit to me, as I now have charge of an electric-light plant, and cheerfully admit that I owe my position and salary to the Schools.

STEPHEN S. YAHNER, *Potton, Pa.*

BECAME CHIEF ENGINEER.

For some time previous to enrolling in the Schools I had been reading everything I could get pertaining to mechanical and electrical engineering, but found that I needed a better education in mathematics. When I enrolled in the Electrical Engineering Course I was second engineer of the Topeka Railway Company. About one year afterwards, I was promoted to the position of chief engineer at a much larger salary.

J. L. CHASE, *Topeka, Kansas.*

Nine Electrical Courses. Electrical Engineering, Electrical, Electric Power and Lighting, Electric Lighting, Electric Railways, Telephony, Telegraphy, Electric Mining, Wiring and Bell Work.

Electrical Instruction in charge of PROF. R. B. WILLIAMSON, Formerly professor of Electricity in Lehigh University.

105,000 STUDENTS AND GRADUATES August, 1899. CAPITAL, $1,500,000.

$12 to $70 in Small Monthly Installments pays for a

SALARY-RAISING EDUCATION.

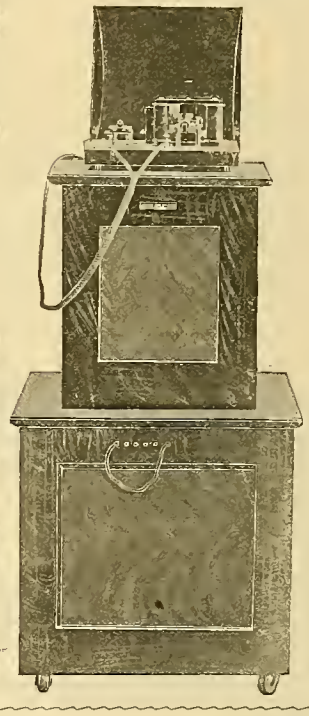
CLEVELAND, 61-73 FRANKFORT ST., OHIO.

The Warner Telephone Generator Cabinet.



SIMPLE, DURABLE, EFFICIENT.

It is rapidly taking the place of the old magneto-generator outfit for ringing subscribers' bells. Is just the thing for selective signal ringing; is furnished fitted with either dry or storage batteries. One set of dry batteries is guaranteed to give 600,000 signals, allowing about five seconds to each signal. It is guaranteed to ring the heaviest loaded toll lines and to do harder work than any magneto made. It is just the thing for exchanges, both large and small. Is the cheapest and most reliable method of obtaining power for this purpose. You cannot afford to be without it. It is fully guaranteed and is sold by all responsible telephone supply houses.

Manufactured exclusively by

THE W. F. WARNER CO.,
MUNCIE, IND.

We have issued a NEW catalogue of electrical books containing 100 pages, listing every work on electricity. A copy will be cheerfully mailed on receipt of a two-cent stamp.

S-E-I

Is the name of the instrument we make for switchboard use. Fully guaranteed. Always correct. Specify them in your next order.

Send for descriptive catalogue and prices.

S. E. I. CO., Syracuse, N. Y. 39 Cortlandt St., New York. 170 Summer St., Boston.

WESTON Electrical Instrument Co.,

114-120 William St., NEWARK, N. J., U. S. A.

Weston "Round Pattern" Ammeter. Type F.

We desire to call attention to a line of cheap but excellent Switchboard Instruments for Direct Current Circuits, which we designate as

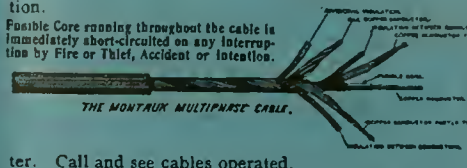
"Round Pattern," Style F.

These Instruments are particularly suitable for Isolated Plants and Feeder Circuits in Railway and Power Plants. Voltmeters in ranges from 3 to 750 volts. Ammeters in ranges from 1 to 2,500 amp. All Weston Instruments are unsurpassed in excellence of workmanship, in accuracy and economy of operation.

Mention the WESTERN ELECTRICIAN when writing for catalogues.

The Only Fire Detective Cable in the World.

Every Fractional Part of which is continuously Thermostatic, and designed for all Interior Electric Wiring Adaptations. It lights the gas! Rings the door bells! It automatically notifies of fire and indicates that burglars are at work, all in one installation.



Why use dormant wires? The Montauk Automatic Thermostatic Electric Cables are as sensitive to heat or fire as the nervous system of a human being is to the touch of flame.

Write for descriptive matter. Call and see cables operated.

MONTAUK MULTIPHASE CABLE CO.,

Telephone 4031 Cortlandt. 100 Broadway, NEW YORK.

2,000 IN USE.

Bipolar and Multipolar Motors from ½ to 50 horse power. Dynamos from 10 lights to 700. We sell or rent. Good profits for agents. The Hobart Elec. Mfg. Co., Troy, Ohio.

Queen & Co.,

1012 Chestnut St., PHILADELPHIA.

Acme Testing Sets, Queen-Wirt Switchboard Instruments, X-Ray Focus Tubes, Induction Coils

FOR ALL OPEN-CIRCUIT WORK

Points of Superiority Over All Other Types.

In successful use for ten years. Standard high. Prices low. Send for descriptive circular and testimonials.

The Burnley Battery & Mfg. Co., PAINESVILLE, OHIO.

MONA COMMUTATOR COMPOUND,

The most efficient lubricator, is the only article that is guaranteed to stop sparking. It can be used on leaf, carbon or gauze wire brushes with the greatest safety. Puts a beautiful luster on the Commutator. Does away with the use of sandpaper or any other material that wears out or destroys its surface. It is the largest and most economical stick manufactured. It comes in two sizes. Small size, $3.00 per dozen. Large size, $5.00. Samples mailed free on application. For sale by all supply houses throughout the United States, England and Canada.

TROTTER'S COMMUTATOR COMPOUND NEW YORK

Manufactured only by TROTTER'S MONA MFG. CO., Ltd., No. 66 West Broadway, New York City.
Messrs. GOLOMARK & WALLACE are the Sole Agents for the United States 121 Worth St., New York City.
SATISFACTION GUARANTEED OR MONEY REFUNDED.

REFLECTORS!

SILVER-PLATED MIRROR REFLECTORS FOR INCANDESCENT CLUSTERS.

THE WOOD ELECTRIC MOTO-VEHICLES.

SEND FOR "SPECIALLY FINE" CATALOGUE.

AMONG OTHER THINGS WE GUARANTEE ARE:

That the material and workmanship in the vehicle shall be of the very best, including rubber tires and ball bearing axles.

That for a period of one year the Company will replace, free of charge, any broken parts due to defective material or faulty shop construction.

That the vehicle shall have, on a level hard roadway, a mileage capacity in one charge of the batteries that will carry its given load twenty-five miles at an average speed of twelve and one-half miles per hour, two hours.

That the batteries can be charged when fully discharged in two and one-half hours' time.

That the vehicle shall be capable of climbing a six per cent. grade with given load when batteries are reasonably well charged.

That for the sum of $50 00 per annum, the Company will furnish all parts for keeping batteries in perfect repairs for a period of five (5) years, leaving them at the end of the five years in good condition for operation during the ensuing year.

AVERAGE COST TO RUN PER MILE, 3-4 CENT.

FISCHER EQUIPMENT CO.,

110-112 EAST TWENTIETH STREET, CHICAGO, ILL., U. S. A.

Getting Down To Business

Is a proper action at all times. There are many ways of accomplishing this; some seek treasure beneath the sea, others show wisdom by preparing for that which surely will come. It will be an early and a cold winter—why not commence and complete your

Fall Construction and Wiring?

We might name a multitude of articles that you will need, from a pole step to a shade holder, but we handle a general line of ELECTRICAL SUPPLIES—maintaining a complete stock of staples, combined with unequalled shipping facilities and sold under consistent prices.

Central Electric Company, 264-266-268-270 Fifth Avenue, CHICAGO.

SOUTHERN ELECTRICAL SUPPLY CO., ST. LOUIS.

Chicago Rheostat Company.

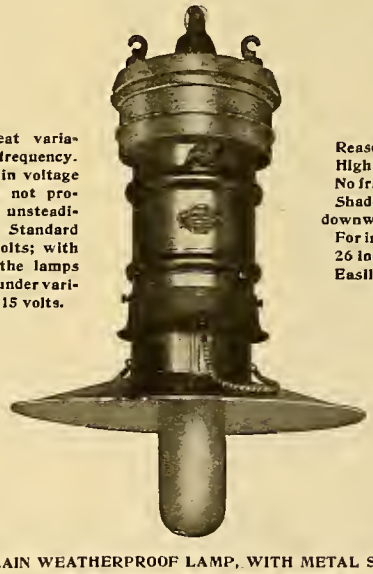
BROOKLYN, N. Y.

Let us know your requirements and we can supply your wants.

Petite Alternating Enclosed Long-Burning Arc Lamp.

Adapted for great variations in voltage and frequency. Ordinary changes in voltage and frequency do not produce flickering or unsteadiness of the arc. Standard adjustment 104 volts; with this adjustment the lamps will burn steadily under variations from 90 to 115 volts.



Reasonable cost.
High efficiency.
No framework in sight.
Shade reflects upward rays downward.
For indoor and outdoor use.
26 inches long.
Easily trimmed.

PLAIN WEATHERPROOF LAMP, WITH METAL SHADE AND STANDARD ENCLOSING GLOBE L.

Electric Generator In a 6x8 Glass Jar.

E. M. F.—2 Volts. CURRENT—12 Amperes. CAPACITY—300 Ampere-Hours.

Will do the work of any two batteries on the market, and can be renewed at the least cost.

For Signal Service, Long-Distance Telephones, Gas Engines, Etc.

PHOENIX BATTERY MFG. CO., ST. LOUIS, MO.

The "ELECTRA" Highest Grade Nuernberg Carbons are recognized as standard all the world over.

All genuine "ELECTRA" carbons are put up in packages bearing the label with the trade mark "ELECTRA."

Good carbons mean less cost for current.

All the excellence in dynamos and arc lamps counts for but little where poor carbons are used in lamps.

EDUCATION

Thousands have been helped to better pay and positions through our system of instruction **BY MAIL**

Buildings erected expressly for this purpose at a cost of **$225,000.**

A VALUABLE NEW WORK.

ELECTRICIANS' HANDY-BOOK

OF USEFUL INFORMATION.

Edited by A. E. WATSON, A. M., Teacher of Electricity, Brown University, Providence, R. I.

Compiled by E. T. BUBIER, 2d.

ILLUSTRATED.

A Compilation from the works of Sylvanus P. Thompson, Kapp, Allsop, Munroe and Jamieson, Watson, Bottone, Bonney, Watt, Poole, Trevert, Haskins, Morrow and Reid, and others.

This book gives a large number of receipts for making Battery Fluids, Battery Pastes, Insulating Materials and Varnishes, Electro-Plating Solutions, etc. Tells how to make Electric Batteries, Bells, Telephone, Motors, Dynamos, Induction Coils, Influence and Static Machines, etc. Gives formulæ for winding Dynamos, Motors, Armatures, Field Magnets, Transformers. Contains many Rules, Tables, Data, etc. In fact it is almost a complete cyclopædia of Electricity. It is neatly bound and of a convenient size to be carried in the pocket for handy reference.

CONTENTS.

PART		PART	
1.	History.	9.	Electric Lighting.
2.	Theory.	10.	Transformers.
3.	Measurements. (Electric and Magnetic.)	11.	Wiring for Electric Power.
4.	Electric Batteries.	12.	Wiring for Bell Fitting and Gas Lighting
5.	Electro-Chemistry and Metallurgy.	13.	Electric Railways.
6.	The Telegraph and Telephone.	14.	Miscellaneous.
7.	Dynamos and Motors.	15.	Useful Tables.
8.	Management of Dynamos and Motors.	16.	Logarithms.

Contains over four hundred and fifty pages and many Illustrations.

PRICE, CLOTH, ONLY $2.50; POSTPAID.

OMAHA EXPOSITION.

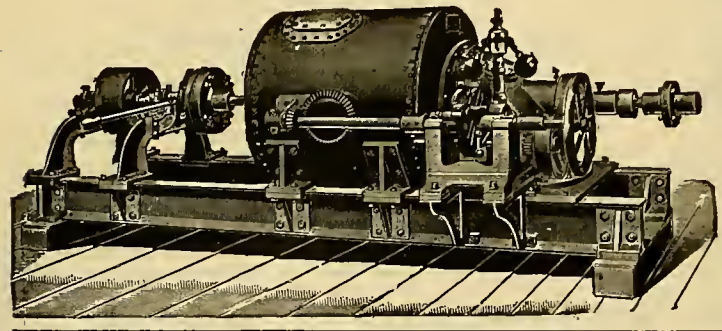
We have just purchased the entire contents of the buildings and grounds of the Omaha Exposition and offer for sale the following:

125,000 lbs. Waterproof, Rubber Covered, Insulated Wire, in gauges 0000 and smaller.
About 30,000 Incandescent Lamps and Sockets.
500 Cedar Electric-Light Poles.
300 Made Up Poles.
5 Engines, as follows: 3 Westinghouse, 350 H. P. each.
1 Atlas Corliss, 275 H. P.
1 Ball, 150 H. P.

In fact, our purchase is one of the most comprehensive possible and includes practically everything within the gates. We are about to issue a catalogue No. 100, containing a complete and detailed description of everything included in the above purchase. In the meantime we shall be glad to answer any and all inquiries with reference to this material.

Address **CHICAGO HOUSE WRECKING COMPANY,**
OMAHA, NEB., OR CHICAGO, ILL.

Victor Turbines Operating Dynamos.



That there are more Victor Turbines in use supplying power for electric generators than any other is due to the many points of superiority possessed by this Turbine.

FEATURES WORTH REMEMBERING:

High Speed, Close Regulation,
Great Capacity, High Efficiency,
Perfect Cylinder Gate, Steady Motion.

Illustrated with Twenty-two Diagrams.

By WILLIAM A. WITTBECKER.

Price in Paper, 25 Cents.
Price in Cloth, 50 Cents.

THE growing demand for simple electrical apparatus in dwelling houses, offices and work shops and the need of plain instructious whereby any person without a previous knowledge of electricity may be eoabled to undertake their successful installatioo, has prompted the publicatioo of this little book. It is not intended for the amateur who seeks for nothing but experimeotal work, neither is it expected to enlighteo the expert electrician; but to the person who is seekiog for information that will assist him in increasing his daily earnings this little volume is addressed.

The information giveo is above all else practical, and with a close observance of the directions laid down anyone without the slightest knowledge of electricity should be able to do the work described.

THE BEST ANSWER TO A QUESTION

On Wiring, can be found in the New Book,

"WIRING TABLES,"

"How They are Made and How to Use Them."

BY THOS. C. CRIER.

Whenever you are asked a question on Wiring, refer the questioner to this book, and he will find what he desires.

THE BOOK CONTAINS: The Law of Resistance, Electromotive Force and Current Fully Explained. How to Calculate the Size of Wires. The Different Methods of Wiring, with Diagrams. How to Apply the Simple Formula in Calculating the Size of Wires Under all Conditions. Diagrams for Wiring 3 Point, 4 Point, Head Light and Heat Regulating Switches.
27 TABLES ON WIRING AND VALUABLE DATA.

Ohm's law is described in such plain and simple language that one cannot fail to clearly understand it.

Bound in Cloth, 80 Pages, Size 5x7½ in. Sent, prepaid, on receipt of price, $1.00.

ELECTRICIAN PUBLISHING CO., 510 Marquette Building, CHICAGO.

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.
13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.
28. Metallic Circuit.
29. Underground Wires.
30. Lightning Arresters.
31. Inside Wiring.
32. Installation of Telephone Instruments.
33. Inspection and Maintenance.
34. The Condenser; Its Use in Telephony.
35. Electromagnetic Retardation.
36. Exchange Working.
37. Small Exchanges.
38. Party Lines: The Bridging Bell.
39. Long Distance Telephony.
40. Duplex Telephony.
41. Simultaneous Telegraphy and Telephony.
42. Recent Progress. Appendix.

READ !!

OUR FAMOUS
Hand-Book Series.

NEW DYNAMO TENDERS' HAND-BOOK. By Lieut. F. B. Badt. One hundred and forty illustrations. An entirely new and up-to-date work, 225 pages, flexible cloth binding, size of page 5¾ x3½ inches. Designed for dynamo tenders, firemen, stationary and marine engineers. Just the book for men who wish to learn how to operate and care for electric light installations. The only book of the kind in the English language.

INCANDESCENT WIRING HAND-BOOK. By Lieut. F. B. Badt. Profusely illustrated. Type page 5¼x3 inches, flexible cloth binding, 66 pages, 35 cuts and 5 tables, three of which are 12x18 inches. These tables give at once, and without any calculation, the size of wire required in each case for any percentage of loss. A timely book, containing full instructions for Incandescent Wiring, and complete information concerning Methods of Running Wires, Location of Safety Devices and Switches, Splices, Insulation and Testing for Faults, Wire Gauges, General Electrical Data, Calculating Size of Wires, Wiring of Fixtures, Elevators, Buildings, Isolated and Central Station Plants. The only complete book of the kind published.

BELL HANGERS' HAND-BOOK. By Lieut. F. B. Badt. Third edition; eighth thousand. 106 pages, 97 illustrations. Just the book for those engaged in selling, installing or handling Electric Batteries, Electric Bells, Elevator, House or Hotel Annunciators, Burglar or Fire Alarms, Electric Gas Lighting Apparatus, Electric Heat Regulating Apparatus, etc. The only book of its kind. Simple as A B C.

ELECTRIC TRANSMISSION HAND-BOOK. By Lieut. F. B. Badt. First edition, three thousand copies. 97 pages, 22 illustrations, 27 original tables. Gives more practical information on the subject than any work published to date. The book contains all necessary information for Power Producers, Capitalists, Agents, Engineers and Motor Inspectors. With this book anybody may make estimates on the cost of Transmission Plants. A practical and reliable work.

THE TELEPHONE HAND-BOOK. By Herbert Laws Webb. 146 pages, 138 illustrations, cloth, hand-book size, price $1.00. Extract from preface: "This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work has not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and The Telephone Hand-Book is an attempt at meeting that demand. New and Original. All Modern Machinery fully described and explained. Technical Points made Clear by Word and Drawing. Questions and Answers for Civil Service Examinations, etc.

SUBJECTS TREATED:

WATER, STEAM, COMBUSTION, SMOKE PREVENTION, BOILERS, BOILER CONSTRUCTION, TESTING AND MANAGEMENT, SAFETY VALVES, INJECTORS, PUMPS AND GOVERNORS, STEAM GAUGES, LUBRICATORS, ENGINES, COMMON SLIDE VALVE, TANDEM COMPOUND, CROSS COMPOUND, RECEIVER ENGINES, HOT AIR AND COMPRESSED AIR ENGINES, TRACTION ENGINES, ELECTRIC ENGINES, AUTOMATIC AND CORLISS ENGINES, CONDENSERS, JET AND SURFACE, ECCENTRIC, BALANCED SLIDE VALVE, LINK MOTION, HORSE POWERS IN DETAIL, INDICATOR, REFRIGERATION, ABSORPTION AND COMPRESSION METHODS, BRINE AND DIRECT EXPANSION SYSTEMS, PUMPS, VALVES, TESTS, TABLES, AMMONIA, AMMONIA FITTINGS, LIQUID AIR, MACHINE SHOP PRACTICE, STANDARD NUMBERS AND RULES, PULLEY SPEED CALCULATION, SQUARE ROOT, LEVERAGE, ELECTRICITY, DYNAMOS, ACCUMULATOR, RHEOSTAT, TRANSFORMER, VARIETIES OF DYNAMOS, PARALLEL AND SERIES WIRING, THREE-WIRE SYSTEM, MANAGEMENT AND CARE OF ELECTRIC PLANT, REPAIRS, ELECTRICAL MEASUREMENTS, MOTORS, STATIONARY, TROLLEY AND THIRD RAIL SYSTEMS, CONTROLLER, ELECTRIC LOCOMOTIVE, ELECTRIC HEATING AND COOKING, HOUSE WIRING, DIFFERENTIAL GEAR, FRICTION CLUTCH, COMPOUND CYLINDERS, REVERSING GEAR, THE STACKER. ALSO, THE ELEMENTS OF ALGEBRA MADE EASY.

336 Pages. 240 Illustrations.

PRICE, $1.00. Sent anywhere prepaid on receipt of price.

ELECTRICIAN PUBLISHING COMPANY,
510 Marquette Bldg., Chicago.

The General Electric Company's
PORCELAIN DEVICES

For Insulators, Cut-outs, Sockets and Switches are made from the finest China clay at the company's works at Schenectady. This clay gives a finished product which is hard, white, vitreous, non-absorbent and unaffected by acids or alkalies.

The General Electric Company was the first electrical manufacturing concern to establish its own pottery, and its porcelain still shows its superiority over all others for electrical work.

Main Office: Schenectady, N. Y. SALES OFFICES IN ALL LARGE CITIES.

JUST WHAT YOU ARE LOOKING FOR!

A VALUABLE BOOK

Electric Lighting Plants,
THEIR COST AND OPERATION.

By W. J. Buckley. With numerous illustrations, diagrams, plans, tables, etc. 275 pages. Cloth. Price, $2.00, postage free. This work gives all necessary data for the erection of an electric light plant of any size. The cost of Arc Lighting. The cost of Incandescent Lighting.

READ THE TABLE OF CONTENTS:

Alternating Arc Lamps, Arc Plants, Belting, Boilers, Boiler Settings, Boiler Efficiencies, Books, Building, Cost of Arc Dynamos and Lamps, Cost of Arc Plants Erected, Cost of Alternating Dynamos, Cost of Alternating Plants Erected, Cost of Belts, Cost of Boilers, Cost of Brick Chimneys, Cost of Copper for Alternating Circuit, Cost of Corliss Engines, Cost of Compound Corliss Engines, Cost of Compound High Speed Engines, Cost of Condensers, Cost of Friction Clutch Pulleys, Cost of Heaters, Cost of High Speed Engines, Cost of Incandescent Dynamos, Cost of Idlers, Cost of Injectors, Cost of Meters, Cost of Motors, Cost of Operating Lamps per hour, Cost of Power Generators. Cost of Poles, Cost of Plain Pulleys, Cost of Pillow Blocks, Cost of Pumps, Cost of Shafting, Cost of Shaft Couplings, Cost of Stacks—iron, Cost of Stacks—brick, Cost of Steam, Cost of Transformers, Cost of Wire, Chimneys, Circuit Loss, Contract Blanks, Current Distribution, Circuits—overhead, Circular Mils of Wire, Depreciation, Direct Connected Apparatus, Dynamos, Dynamo Data, Economy of Condensing, Economy of Covering Steam Pipes, Economy of Heater, Efficiency of Engines, Engines, Equivalent of Current in Horse Power, Equivalent Rates of Lighting, Fuel, Horse Power of Belting, Horse Power of Motors, Horse Power of Shafting, Incandescent Arc Lamps, Instruments, Instructions for Employes, Insulation, Labor, Load Chart, Meter Connections, Municipal Ownership, Natural Gas, N.E.L.A. Standard Rules, Oil, Outcome of Practical Management, Pole Line, Pulleys, Rope Transmission, Resistance of Wire, Rules—Fire Underwriters, Report Com. on Data N. E. L. A., Reports of Cities Owning Plant, Reports of Cities Contracting, Stock Room, Shafting, Transformers, Transformer Curves, Wiring Tables—Primary Wiring, Wiring Tables—Secondary Wiring, Wiring Tables, Motor Wiring, Wire, Wire Formula, Water Power, Wood as Fuel. The only book of its kind in the English Language. **Price, $2.00.**

BROWN, DURRELL & CO.

Cling-Surface Mfg. Co., Buffalo, N. Y. Boston, Mass., Aug. 1, 1899.

Dear Sirs:—Having tried Cling-Surface on my 18-inch dynamo belt (16 feet between centers), I have been able to carry full load with 22-inch sag on belt with no perceptible slip. It surpasses my expectations and I can recommend it to do all that is claimed for it, if directions are followed. Yours respectfully, E. B. PRESCOTT, Engineer.

Four Months Ago

This belt was as tight as a fiddle string, under about 1,000 lbs. initial tension, and yet was slipping. There is no slip now, for it runs slack. **CLING-SURFACE** did it.

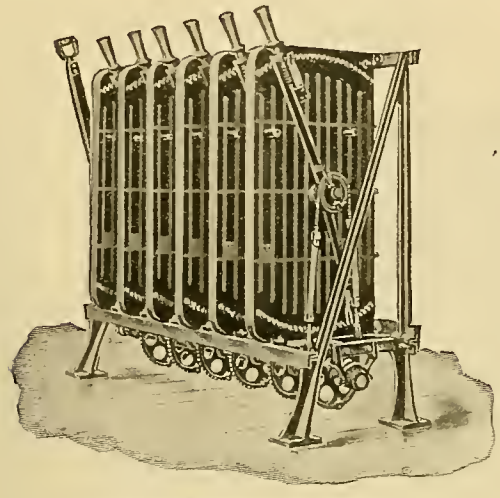
IRON CLAD THEATRE DIMMERS

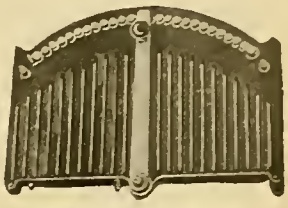
For All Circuits, Alternating or Direct Current,



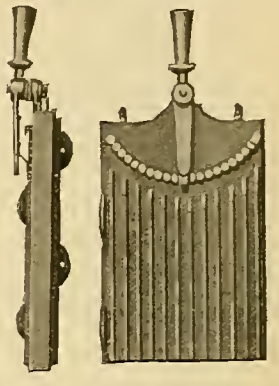
Interlocking Dimmers, Type No. 10.

...ARE...

1. Absolutely reliable.
2. Latest and best construction.
3. Simplest to operate and self-contained.
4. No external wires.
5. Made to jig, i. e., all parts interchangeable.
6. Made to occupy smallest space and of pleasing appearance.
7. Designed and made by experts in lighting effects.



Type No. 7 Dimmers.



Small Edgewise Dimmer, Type No. 8.

CATALOGUES AND INFORMATION CHEERFULLY FURNISHED ON REQUEST.

NOT THE **CHEAPEST,** BUT THE **BEST.**

DOES

Your Electric Light or Street Railway Plant Pay Satisfactory Dividends?

If not, why don't you remodel and put it on a paying basis? That's a specialty of our business.

HAYS CONSTRUCTION CO.,

CONSULTING ENGINEERS,

TROY, OHIO.

Petite Alternating Enclosed Long-Burning Arc Lamp.

Adapted for great variations in voltage and frequency. Ordinary changes in voltage and frequency do not produce flickering or unsteadiness of the arc. Standard adjustment 104 volts; with this adjustment the lamps will burn steadily under variations from 90 to 115 volts.

Reasonable cost.
High efficiency.
No framework in sight.
Shade reflects upward rays downward.
For indoor and outdoor use.
Easily trimmed.

PLAIN WEATHERPROOF LAMP, WITH INNER ENCLOSING GLOBE L AND OUTER ENCLOSING GLOBE S.

112 W. CH. AVENUE.

YOUNGSTOWN, OHIO, June 19th, 1899.

Wagner Electric Mfg. Co.,
2017 Locust St.,
St. Louis, Mo.

Gentlemen:--

Replying to yours of a recent date regarding the operation of your single phase induction motors on our lines, we may say that our silence is satisfaction.

The Motors have given absolutely no trouble, and have required no particular attention on our part.

The minimum cost, and convenience of installation on ordinary single phase lighting circuits, fed by a common transformer system, is to be commended.

Yours truly,
THE YOUNGSTOWN ELECTRIC LIGHT CO.,
J. H. Perkins
Ass't Gen'l Manager.

OUR STUDENTS SUCCEED.

FARMER BECOMES SUPERINTENDENT.

I think there is no better chance to advance than through the Schools. Before I enrolled I was a farmer, and knew practically nothing about electricity or steam engineering. My Courses in Electric Power and Lighting and Stationary Engineering have been a source of great benefit to me, as I now have charge of an electric-light plant, and cheerfully admit that I owe my position and salary to the Schools.

STEPHEN S. YAHNER, *Patton, Pa.*

BECAME CHIEF ENGINEER.

For some time previous to enrolling in the Schools I had been reading everything I could get pertaining to mechanical and electrical engineering, but found that I needed a better education in mathematics. When I enrolled in the Electrical Engineering Course I was second engineer of the Topeka Railway Company. About one year afterwards, I was promoted to the position of chief engineer at a much larger salary.

J. L. CHASE, *Topeka, Kansas.*

Nine Electrical Courses. Electrical Engineering, Electrical, Electric Power and Lighting, Electric Lighting, Electric Railways, Telephony, Telegraphy, Electric Mining, Wiring and Bell Work.

Electrical Instruction in charge of PROF. R. B. WILLIAMSON, Formerly professor of Electricity in Lehigh University.

105,000 STUDENTS AND GRADUATES August, 1899. CAPITAL, $1,500,000.

$12 to $70 in Small Monthly Installments pays for a

OMAHA EXPOSITION.

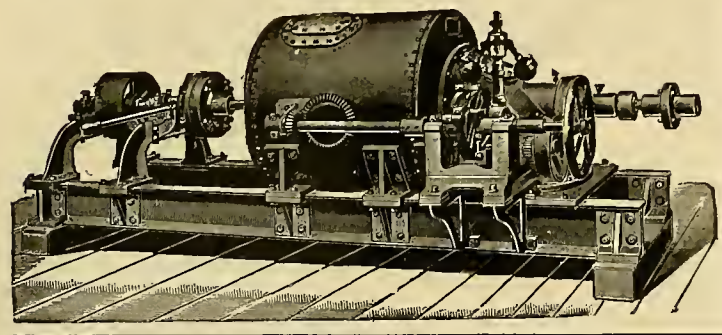
We have just purchased the entire contents of the buildings and grounds of the Omaha Exposition and offer for sale the following:

125,000 lbs. Waterproof, Rubber Covered, Insulated Wire, in gauges 0000 and smaller.
About 30,000 Incandescent Lamps and Sockets.
500 Cedar Electric-Light Poles.
300 Made Up Poles.
5 Engines, as follows: 3 Westinghouse, 400 H. P. each.
1 Atlas Corliss, 275 H. P.
1 Ball, 150 H. P.

In fact, our purchase is one of the most comprehensive possible and includes practically everything within the gates. We are about to issue a catalogue No. 100, containing a complete and detailed description of everything included in the above purchase. In the meantime we shall be glad to answer any and all inquiries with reference to this material.

Address **CHICAGO HOUSE WRECKING COMPANY,**
OMAHA, NEB., OR CHICAGO, ILL.

Victor Turbines Operating Dynamos.



That there are more Victor Turbines in use supplying power for electric generators than any other is due to the many points of superiority possessed by this Turbine.

FEATURES WORTH REMEMBERING:

High Speed, Close Regulation,
Great Capacity, High Efficiency,
Perfect Cylinder Gate, Steady Motion.

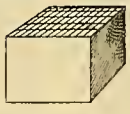
TELEPHONE MEN AND ALL USERS OF MAGNET COILS HAVE YOUR MAGNET COILS WOUND BY MACHINERY.

HERE'S THE OBJECT LESSON— A PLAIN FACT



These 28 3-4lbs. spools (91 lbs. total) of No. 36 single silk-covered wire will cost you $243 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm bridging-bell magnets. Your winding labor will cost you at least 85 additional, making a total cost of your own 1,000 magnets finished at factory, $248.

The above box contains 1,000 "Duplex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $218.70 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

THE VARLEY DUPLEX MAGNET CO. DOES IT BY MACHINERY

Weston "Round Pattern" Voltmeter. Type F.

We desire to call attention to a line of cheap but excellent Switchboard Instruments for Direct Current Circuits, which we designate as

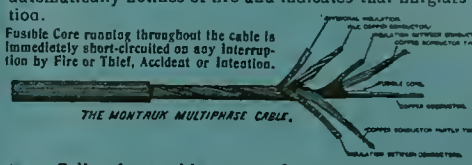
"Round Pattern," Type F.

These Instruments are particularly suitable for Isolated Plants and Feeder Circuits in Railway and Power Plants. Voltmeters in ranges from 3 to 750 volts. Ammeters in ranges from 1 to 2,500 amp. All Weston Instruments are unsurpassed in excellence of workmanship, in accuracy and economy of operation.

Mention the WESTERN ELECTRICIAN when writing for catalogues.

The Only Fire Detective Cable in the World.

Every Fractional Part of which is continuously Thermostatic, and designed for all Interior Electric Wiring Adaptations. It lights the gas! Rings the door bells! Is automatically notifies of fire and indicates that burglars are at work, all in one installation.



Fusible Core running throughout the cable is immediately short-circuited on any interruption by Fire or Thief, Accident or Intention.

Why use dormant wires! The Montauk Automatic Thermostatic Electric Cables are as sensitive to heat or fire as the nervous system of a human being is to the touch of flame.

Write for descriptive matter. Call and see cables operated.

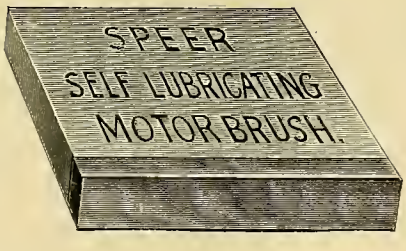
MOTOR BRUSHES



ANNOUNCEMENT:

The Speer Carbon Co., organized with Capital $200,000, has just completed a large, expensive and modern factory at St. Marys, Pa., and now solicits your orders.

These Brushes are made under the direct personal supervision of Mr. J. S. Speer, who was for nine years a manufacturer of carbon brushes at Sandusky, O., which is the Company's guarantee of the first-class nature of its products.

SPEER CARBON CO.,

Andrew Kaul, Pres. Louis Streuber, Vice-Pres.
Andrew Kaul, Jr., Secy. and Treas. J. S. Speer, Gen'l Mgr.

OFFICE AND FACTORY: ST. MARYS, PA.

CLING-SURFACE IN YOUR BELTS WILL ADD 15% TO THEIR POWER

This statement is true for the simple reason that we have about 200,000 belts throughout the world doing this every day, because they have stopped slipping absolutely, and, as a consequence, are running easy, with increased contact of belt on pulley—which means power. Cling-Surface keeps a belt soft and pliable and absolutely water and oil proof. Send to us for photograph of one of these slack belts.

WITHOUT CASE.

WESTERN AGENTS:

Warren Alternators, Triumph Direct-Current Apparatus, Empire Electrical Instruments, La Roche, Victor and Ideal Circuit Breakers, Diamond Meter Co.'s Meters and Transformers, Sterling Enclosed Arc Lamps, Le Valley Vitae Lubricating Carbon Brushes.

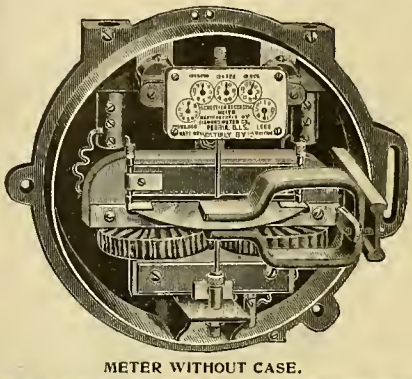
The "ELECTRA" Highest Grade Nuernberg Carbons are recognized as standard all the world over.

All genuine "ELECTRA" carbons are put up in packages bearing the label with the trade mark "ELECTRA."

Good carbons mean less cost for current.

All the excellence in dynamos and arc lamps counts for but little where poor carbons are used in lamps.

SCHEEFFER RECORDING WATT-METERS.



METER WITHOUT CASE.

Accurate on All Loads.
Will Start and Register Correctly on 5 Watts.
Shunt loss LESS than one Watt on 60 Cycles.
Dust Proof.
Correct on All Inductive Loads.

MONA COMMUTATOR COMPOUND,

The most efficient lubricator, is the only article that is guaranteed to stop sparking. It can be used on leaf, carbon or gauze wire brushes with the greatest safety. Puts a beautiful luster on the Commutator. Does away with the use of sandpaper or any other material that wears out or destroys its surface. It is the largest and most economical stick manufactured. It comes in two sizes. Small size, $3.00 per dozen. Large size, $5.00. Samples mailed free on application. For sale by all supply houses throughout the United States, England and Canada.

Manufactured only by TROTTER'S MONA MFG. CO., Ltd., 320 Broadway, New York, N.Y.
Messrs. GOLDMARK & WALLACE are the Sole Agents for the United States, 121 Worth St., New York City.

THE "CLARK" WIRE.

FOR SWITCHBOARD, RAILWAY and MOTOR USE.

All sizes of Stranded and Flexible Wire and Cables with Clark's Insulation

Inspector Boston Fire Underwriters' Union says:
"A thoroughly reliable and desirable wire in every respect."

The Clark wire has been before the public and in use for the past ten years, and has met with universal favor. We guarantee our insulation wherever used, Aerial, Underground or Submarine, and our net prices are as low, if not lower, than any other first-class insulated wire. We shall be pleased to mail Catalogues, with terms and discounts for quantities.

OMAHA EXPOSITION.

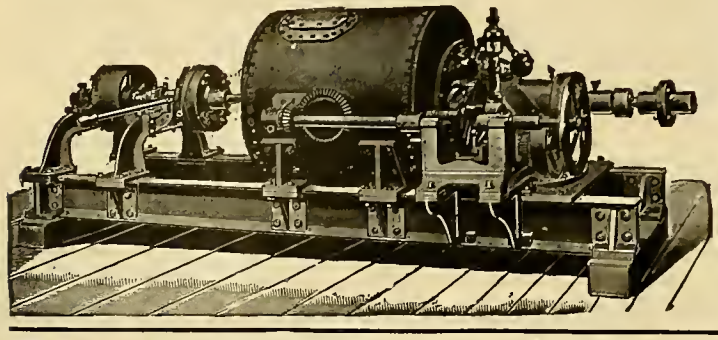
We have just purchased the entire contents of the buildings and grounds of the Omaha Exposition and offer for sale the following:

125,000 lbs. Waterproof, Rubber Covered, Insulated Wire, in gauges 0000 and smaller.
About 30,000 Incandescent Lamps and Sockets.
500 Cedar Electric-Light Poles.
30 Made Up Poles.
5 Engines, as follows: 3 Westinghouse, 400 H. P. each.
1 Atlas Corliss, 275 H. P.
1 Ball, 150 H. P.

In fact, our purchase is one of the most comprehensive possible and includes practically everything within the gates. We are about to issue a catalogue No. 100, containing a complete and detailed description of everything included in the above purchase. In the meantime we shall be glad to answer any and all inquiries with reference to this material.

Address **CHICAGO HOUSE WRECKING COMPANY,**
OMAHA, NEB., OR CHICAGO, ILL.

Victor Turbines Operating Dynamos.



That there are more Victor Turbines in use supplying power for electric generators than any other is due to the many points of superiority possessed by this Turbine.

FEATURES WORTH REMEMBERING:

High Speed, Close Regulation,
Great Capacity, High Efficiency,
Perfect Cylinder Gate, Steady Motion.

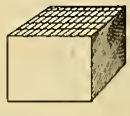
TELEPHONE MEN AND ALL USERS OF MAGNET COILS HAVE YOUR MAGNET COILS WOUND BY MACHINERY.

HERE'S THE OBJECT LESSON— A PLAIN FACT



These 28 3+lbs. spools (91 lbs. total) of No. 36 single silk-covered wire will cost you $243 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm bridging-bell magnets. Your winding labor will cost you at least $5 additional, making a total cost of your own 1,000 magnets finished at factory, $218.

The above box contains 1,000 "Duplex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $218.50 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

STREET RAILWAY MEN—And others engaged in electric railway work will be interested in
THE MOTOR ENGINEERS' AND ELECTRICAL WORKERS' HAND-BOOK.
By WM. LINTERN.
The Motor Engineers' and Electrical Workers' Hand-Book is compiled with a view of furnishing a book of reference in a simple and convenient form for the use of motor engineers and street railway men. The diagrams of controller connections and combinations will be found of great value in practical work. The methods of testing are both simple and reliable. The writer is indebted to the Westinghouse, General Electric, Walker and Steel Motor companies for information cheerfully furnished.
TABLE OF CONTENTS.
Chapter I.—Elementary Principles. Units, Ohm's Law, Watt, Kilowatt, Ampere, Turn, Hour, etc. Potential, E. M. F., Voltage, Drop of Potential, Resistance (Ohmic), Conductivity. **Chapter II.**—Magnetism and Electro-Magnetic Induction. **Chapter III.**—Circuits: Varieties of Circuits, Series, Shunt, Parallel or Multiple Arc, Joint Resistances of Parallel Circuits, Multiple Series, Series Multiple. **Chapter IV.** Dynamo Electric Machine. General Principles, Field Windings, (Varieties), Series, Shunt, Compound, etc. Short Shunt, Long Shunt. **Chapter V.**—Instructions for Operating Generators: Running a Single Generator, To Shut Down a Machine Not Run in Multiple, Sparking, Polarity, Excitation Grounds, Generators in Multiple, Connections, Running Generators in Multiple. To Shut Down a Machine Running in Multiple. **Chapter VI.**—The Electric Motor: General Principles, Counter Electromotive Force and Mechanical Power, Efficiency. **Chapter VII.**—Measurements and Tests of Street Railway Motors—Faults, Measurement by Drop of Potential Method (Examples), Insulation Tests, Voltmeter Method, Description of Voltmeter and Ammeter, The Wheatstone Bridge, Instructions for Operating, Drop of Potential in Motor Circuits. **Chapter VIII.**—Instructions for Operating Car Apparatus: Brushes, Sparking at Brushes, Bearings, Bucking, Fuse, Block, Operating Car, Trolley, etc. **Chapter IX.**—The Electric Motor Car in Detail. Series, Parallel, Controller, Reverse Switch, Rheostat, Fuse Box, Lightning Arrester, Heaters. **Chapter X.**—Definitions of Terms. **Chapter XI.**—Diagrams of Car Wiring and Controllers, with Written Descriptions and Diagrams of Combinations: Westinghouse System (G. No. 14, No. 28 and 28 A). General Electric (K, with W. P. Machines, K 2; General Electric Series Parallel Controller with Magnetic Brake). Walker System (B2, E) Steel Motor Co. System. **Chapter XII.**—General Electrical and Mechanical Information. Belting, Shafting, Pulleys and Gears, Melting Point, Specific Gravity and Relative Conductivity. Table Comparing Wire Gauges, Number, Dimensions, Height, Length and Resistance of Pure Copper Wire, Electrical Units and Formulas, Equivalent Carrying Capacity, Proportions of Gear Teeth Notes, Bill of Material for Span Wire Construction (Single Track) (Double Track), Bracket Construction, (Single Track) (Center Pole) (Double Track).

PAPER COVER, PRICE $1.00.

THE TROUBLE OF OIL ON BELTS OVERCOME BY

OIL EXTRACTING POWDER,

MANUFACTURED SOLELY BY

SHULTZ BELTING COMPANY.

A great many belts get oil on them, which lessens their driving power by causing them to slip, besides rotting the belt. To send them to some place to have the oil extracted is expensive, and another belt must be kept in reserve, to be used while this is being done.

We manufacture an Oil Extracting Powder which can be applied to the belt while it is running on the pulleys, which absorbs the oil and leaves the belt in nice, dry condition. This can be done with little cost and without loss of time or the use of the belt. It also lengthens the life of the belt. We guarantee it to absorb the oil if used as directed.

This Powder is put up in 10 and 25 pound cans.

Price, 30 Cents per Pound.

SHULTZ BELTING COMPANY,

It can be had from our agents. ST. LOUIS, MO.

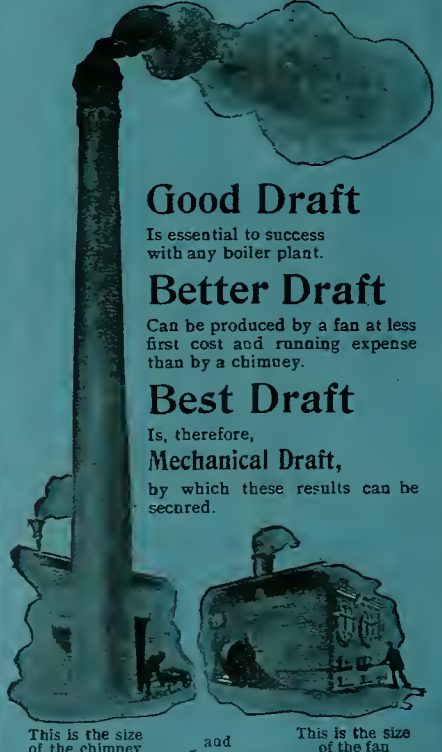
Draft Without a Chimney.



Good Draft

Is essential to success with any boiler plant.

Better Draft

Can be produced by a fan at less first cost and running expense than by a chimney.

Best Draft

Is, therefore,

Mechanical Draft,

by which these results can be secured.

This is the size of the chimney required for the same boiler capacity.

and

This is the size of the fan

COMMENT IS UNNECESSARY.

Mechanical Draft

What It Is and What It Does.

It is draft mechanically produced by means of a fan, and may be introduced either as **forced draft,** by which the air under pressure is delivered to the ash pits, or as **induced draft,** arranged to draw the gases through the fan and to maintain a partial vacuum within the furnace. The method to be adopted must of necessity depend upon the existing conditions.

It does what an ordinary chimney is incapable of doing. Its cost is from 20 to 40 per cent. of that of a chimney; its intensity permits of the burning of finely divided or low-grade fuel; it makes possible the utilization of the heat of the flue gases which a chimney wastes in producing draft; it is independent of the weather; is automatically regulated to maintain constant steam pressure, prevents smoke, increases the capacity of an existing plant, and serves as an auxiliary to a chimney already overburdened; it saves space and is portable.

Detailed Information Regarding **MECHANICAL DRAFT** Will be Cheerfully Furnished by

Write To-day for "Hand-book R" and SPECIAL TERMS FOR OCTOBER ENROLLMENTS.

American School of Correspondence, Boston, Mass., U. S. A.

OUR STUDENTS SUCCEED.

FARMER BECOMES SUPERINTENDENT.

I think there is no better chance to advance than through the Schools. Before I enrolled I was a farmer, and knew practically nothing about electricity or steam engineering. My Courses in Electric Power and Lighting and Stationary Engineering have been a source of great benefit to me, as I now have charge of an electric-light plant, and cheerfully admit that I owe my position and salary to the Schools.

STEPHEN S. YAHNER, *Patton, Pa.*

BECAME CHIEF ENGINEER.

For some time previous to enrolling in the Schools I had been reading everything I could get pertaining to mechanical and electrical engineering, but found that I needed a better education in mathematics. When I enrolled in the Electrical Engineering Course I was second engineer of the Topeka Railway Company. About one year afterwards, I was promoted to the position of chief engineer at a much larger salary.

J. L. CHASE, *Topeka, Kansas*

Nine Electrical Courses. Electrical Engineering, Electrical, Electric Power and Lighting, Electric Lighting, Electric Railways, Telephony, Telegraphy, Electric Mining, Wiring and Bell Work.

Electrical Instruction in charge of PROF. R. B. WILLIAMSON, Formerly professor of Electricity in Lehigh University.

105,000 STUDENTS AND GRADUATES August, 1899. CAPITAL, $1,500,000.

$12 to $70 in Small Monthly Installments pays for a

SALARY-RAISING EDUCATION.

Important Telephone Books.

THE TELEPHONE HANDBOOK. By Herbert Laws Webb. 16mo, 150 pp. Price $1.00.

This handbook is a complete treatise on telephony, and a practical book on telephone working and management, based entirely on standard American practice. It is extremely useful to telephone inspectors and operators.

PATENTED TELEPHONY. A Review of the Patents Pertaining to Telephones and Telephonic Apparatus. Published by the American Electrical Engineering Association. Cloth bound; fully illustrated. Price $1.50.

THE ELECTRIC TELEPHONE. By E. J. Houston, Ph. D., and A. E. Kennelly, Sc. D.; 12mo, cloth, 422 pp., 142 illustrations. Price $1.00.

This book describes the construction of the various forms of transmitting and receiving devices, the signaling mechanisms, and the switchboard apparatus at the central station. It is written by two well-known electricians, and has the merit of being the latest work on the subject.

THE PRACTICAL TELEPHONE HANDBOOK. By Joseph Poole, A. I. E. E. Second edition, revised and enlarged. 360 pp. 288 illustrations. Price $1.50.

In this work the writer has endeavored to produce a manual of moderate size and cost, but thoroughly practical, and detailing, as far as space will allow, the most recent methods of telephone working. While the requirements of telephone employes have been kept constantly in view, it is fully intended also that the book shall be of service as a source of information on telephonic matters to users of the telephone and to the public generally.

TELEPHONE TROUBLES AND HOW TO FIND THEM. A complete handbook for telephone inspectors. By W. Hyde and J. H. McManman, edited by Prof. C. H. Haskins. Sixth edition. 16mo, 50 pp. Price 25 cents.

This little volume is an extremely practical work for telephone employes, written in a popular style and devoid of technicalities.

TELEPHONE LINES AND THEIR PROPERTIES. By Wm. J. Hopkins. Second edition. 272 pp. Illustrated. Price $1.50.

A MANUAL OF TELEPHONY. A new and large edition. By W. H. Preece, F. R. S., and A. J. Stubbs. 508 pages. 333 illustrations. Price $4.50.

HOW TO MAKE AND USE THE TELEPHONE. By Geo. H. Cary. The purpose for which this book is written is to furnish information to those who may desire to construct or use telephone apparatus or lines on a small scale. Price $1.00.

TELEPHONES, THEIR CONSTRUCTION AND FITTING. A Practical Manual on the Fitting Up and Maintenance of Telephone and Auxiliary Apparatus. By F. C. Allsop. 191 pp., 168 illustrations. Price $2.00.

TELEPHONE SYSTEMS ON THE CONTINENT OF EUROPE. By Bennett. 436 pages. 169 illustrations. Price $4.50.

TELEPHONING OF GREAT CITIES. By Bennett. Paper. Price 25 cents.

MAGNETO HAND TELEPHONE. Its Construction, Fitting Up and Adaptability to Everyday Use. By Hughes. 80 pages. 23 illustrations. Price $1.00.

BELL'S ELECTRIC SPEAKING TELEPHONE. Its Invention, Construction, Application, Modification and History. By Prescott. New edition, revised and enlarged. 795 pages. 516 illustrations. Price $4.00.

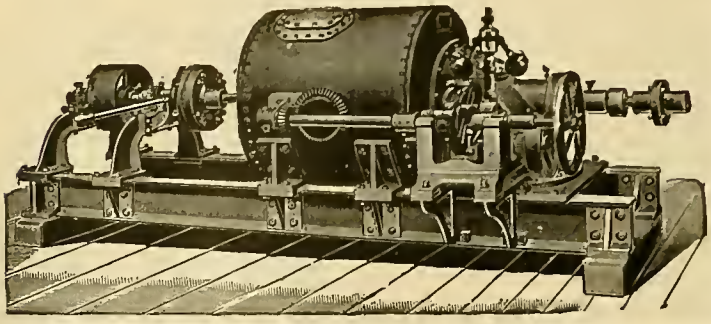
PHILIPP REIS, INVENTOR OF THE TELEPHONE. A Biographical Sketch with Documentary Testimony. By Thompson. Translation of the original papers of the inventor and contemporary publications. 182 pages. 2 plates and 48 engravings. Price $3.00.

ELECTRICAL TRANSMISSION OF INTELLIGENCE AND OTHER ADVANCED PRIMERS OF ELECTRICITY, treating on the telegraph, telephone, etc. By E. J. Houston. 330 pages. 88 illustrations. Price $1.00.

The Above, or Any Other Electrical Works Published, Sent on Receipt of Price.

ELECTRICIAN PUBLISHING CO., 510 MARQUETTE BLDG. CHICAGO.

Victor Turbines Operating Dynamos.



That there are more Victor Turbines in use supplying power for electric generators than any other is due to the many points of superiority possessed by this Turbine.

FEATURES WORTH REMEMBERING:

High Speed, Close Regulation,
Great Capacity, High Efficiency,
Perfect Cylinder Gate, Steady Motion.

TELEPHONE MEN AND ALL USERS OF MAGNET COILS HAVE YOUR MAGNET COILS WOUND BY MACHINERY.

HERE'S THE OBJECT LESSON— A PLAIN FACT

These 28 3+lbs. spools (91 lbs. total) of No. 36 single silk-covered wire will cost you $243 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm bridging-bell magnets. Your winding labor will cost you at least $5 additional, making a total cost of your own 1,000 magnets finished at factory, $248.

The above box contains 1,000 "Duplex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $218.70 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

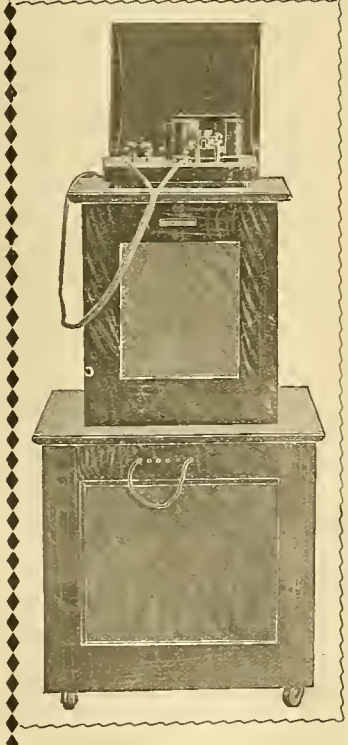
Electrician Publishing Co., 510 Marquette Building, CHICAGO.

The Warner Telephone Generator Cabinet.



SIMPLE, DURABLE, EFFICIENT.

It is rapidly taking the place of the old magneto-generator outfit for ringing subscribers' bells. Is just the thing for selective signal ringing; is furnished fitted with either dry or storage batteries. One set of dry batteries is guaranteed to give 600,000 signals, allowing about five seconds to each signal. It is guaranteed to ring the heaviest loaded toll lines and to do harder work than any magneto made. It is just the thing for exchanges, both large and small. Is the cheapest and most reliable method of obtaining power for this purpose. You cannot afford to be without it. It is fully guaranteed and is sold by all responsible telephone supply houses.

TROLLEY HARP

"THE JANDUS"

ENCLOSED ARC LAMP

Has a record for economical operation that is without an equal. A record that appeals to the judgment of every thoughtful buyer.

DURING A PERIOD OF

6

YEARS

THE AVERAGE ANNUAL COST FOR REPAIRS HAS BEEN

25 Cents

PER LAMP.

This economy means that for each dollar invested in a "Jandus" arc lamp, the buyer receives **MORE VALUE** than can be obtained from the investment of an equal amount in any other make of lamp.

Jandus enclosed arc lamps are manufactured for all circuits.

We call the special attention of Railway managers to the "Jandus" Series-Multiple Arc Lamp for Railway and Power Circuits. SUCCESSFUL operation GUARANTEED. Two lamps in circuit on 200 volts and six on 600 volts.

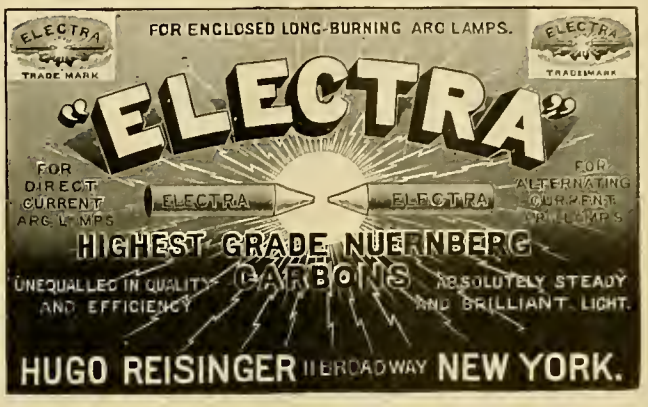
The Jandus Electric Co.,

CHICAGO:
1537 MONADNOCK BLDG.

CLEVELAND, O.

The "ELECTRA" Highest Grade Nuernberg Carbons are recognized as standard all the world over.

All genuine "ELECTRA" carbons are put up in packages bearing the label with the trade mark "ELECTRA."



Good carbons mean less cost for current.

All the excellence in dynamos and arc lamps counts for but little where poor carbons are used in lamps.

Our NEW IMPROVED BATTERY keeps the

We have the Largest and Most Complete Electrical

REPAIR SHOPS

In the West. ELECTRICAL REPAIRS AND MACHINE WORK OF EVERY DESCRIPTION. In having your repair work done by a company operating hundreds of dynamos and motors you are sure of good work and get the benefit of our experience.

CHICAGO EDISON COMPANY,

76 MARKET STREET, CHICAGO.

DOES

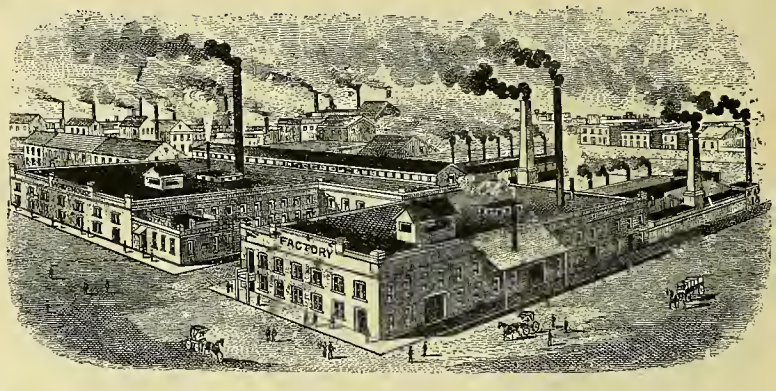
Your Electric Light or Street Railway Plant Pay Satisfactory Dividends?

If not, why don't you remodel and put it on a paying basis? That's a specialty of our business.

HAYS CONSTRUCTION CO.,

CONSULTING ENGINEERS,

TROY, OHIO.



We Are Still Doing Business

at the old stand, and desire to announce to the trade that we are running full time and manufacturing and selling everything in the battery and specialty line.

We have discontinued the manufacture of electric light carbons and street railway motor brushes of every description.

Our products ARE THE BEST.

Our facilities are UNSURPASSED.

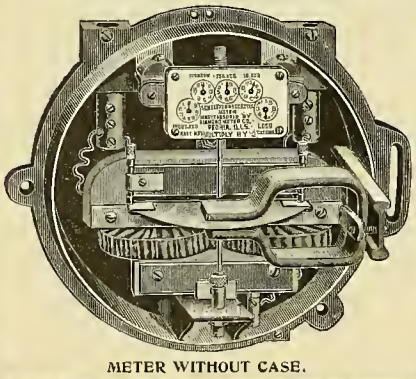
We are in a position to MAKE PRICES to meet the requirements of the times or COMPETITION of the World.

Our stock is complete, and we solicit your business.

PHOENIX BATTERY MFG. CO.,

ST. LOUIS, MO.

SCHEEFFER RECORDING WATT-METERS.



METER WITHOUT CASE.

Accurate on All Loads.
Will Start and Register Correctly on 5 Watts.
Shunt loss LESS than one Watt on 60 Cycles.
Dust Proof.
Correct on All Inductive Loads.

DIAMOND METER CO.,

PEORIA, ILL., U. S. A.

METER WITH CASE.

"HE GEM" STRAIGHT LINE HANGER

Has distinct deserving features. The Beaded Skirt forces rain and moisture to drip instead of run off—making a net current saving. The solid-piece Cap and Yoke eliminates the wear of part on part. The Automatic Locking Device reduces parts and cost. The fact of manufacture by the CENTRAL UNION BRASS CO. is a guaranty of good material and workmanship.

Central Electric Company,

264-270 Fifth Avenue, CHICAGO.

ELECTRIC RAILWAY SUPPLIES.

PARAGON REFLECTORS

Silver-Plated Mirror Reflectors.

A deep cone, for use with any system of incandescent electric light, where it is desired to concentrate a very powerful light on a small space. Lined with silver-plated mirror-plate glass. Increases the light from twelve to fifteen times. Most valuable in show windows and over machines, work-benches, type cases, etc., etc.

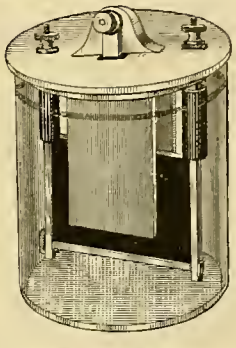
Thousands of this style used in show windows. Get our Catalogue and Prices.

American Reflector & Lighting Co.,

271-273 FRANKLIN ST., CHICAGO.

EDISON LALANDE BATTERIES.

FOR GAS ENGINES, SLOT MACHINES, AUTOMOBILES, RAILROAD SIGNALS, CROSSING BELLS, SMALL MOTORS, ETC.



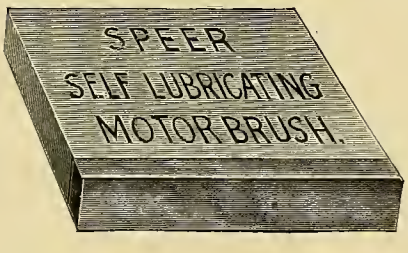
CONSTANT CURRENT. NO LOCAL ACTION, WILL NOT FREEZE. LIQUID TIGHT CELLS FOR PORTABLE WORK.

FULL DESCRIPTION IN BOOKLET NO. 4.

EDISON MANUFACTURING COMPANY,

THOMAS A. EDISON, PROPRIETOR. 135 FIFTH AVENUE, NEW YORK.

CARBON MOTOR BRUSHES



ANNOUNCEMENT:

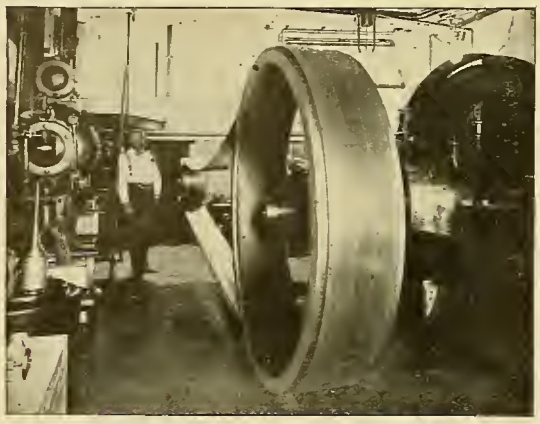
The Speer Carbon Co., organized with Capital $200,000, has just completed a large, expensive and modern factory at St. Marys, Pa., and now solicits your orders.

These Brushes are made under the direct personal supervision of Mr. J. S. Speer, who was for nine years a manufacturer of carbon brushes at Sandusky, O., which is the Company's guarantee of the first-class nature of its products.

SPEER CARBON CO.,

Andrew Kaul, Pres. Louis Streuber, Vice-Pres.
Andrew Kaul, Jr., Secy. and Treas. J. S. Speer, Gen'l Mgr.

OFFICE AND FACTORY: **ST. MARYS, PA.**



BROWN, DURRELL & CO.

Cling-Surface Mfg. Co., Buffalo, N. Y. Boston, Mass., Aug. 1, 1899.

Dear Sirs:—Having tried Cling-Surface on my 12-inch dynamo belt (16 feet between centers), I have been able to carry full load with 22-inch sag on belt with no perceptible slip. It surpasses my expectations and I can recommend it to do all that is claimed for it, if directions are followed. Yours respectfully, E. B. PRESCOTT, Engineer.

AN EASY BELT MADE POSSIBLE BY

CLING-SURFACE

Means a saving of time, money, belt and bearings, to say nothing of the engineer's comfort.

There is no better belt preservative known than Cling-Surface.

We have something to say.
Write Us.

CLING-SURFACE MFG. CO.,

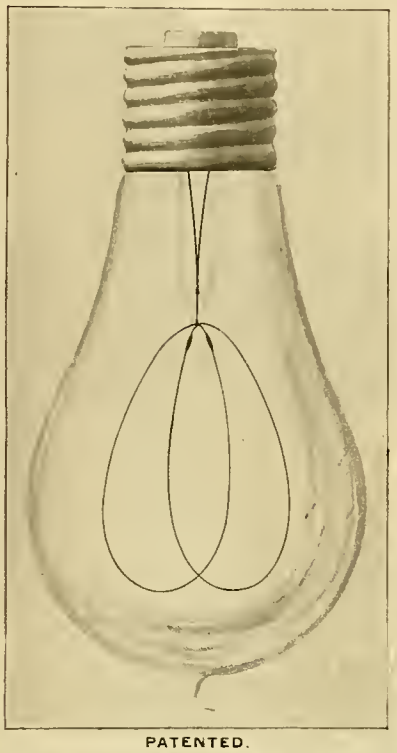
Made to burn in series on 500, 525 and 550 Volt Circuits.



PATENTED.

"NEW LYNN" STREET CAR LAMP.

This lamp has proven itself especially adapted to street railway use and to general use where a very strong lamp is required.

The filament is anchored and can not droop or be broken by motion of the car.

This lamp is carefully selected for current and all are therefore uniform and long lived.

It has absolutely no weak points, as its popularity testifies.

If you say so we will send you a barrel of these lamps to try. If not satisfactory they may be returned at our expense.

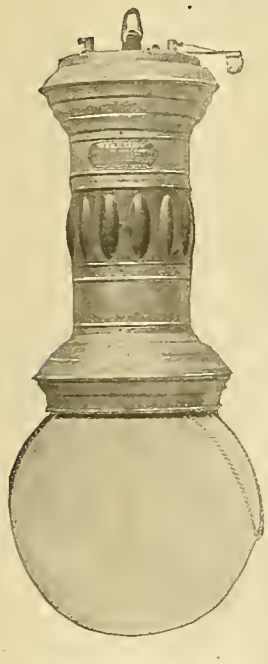
We can maintain your supply at a lower figure than is offered by any other first-class lamp manufacturer.

Write us for prices and full particulars.

LYNN INCANDESCENT LAMP CO.,

LYNN, MASS.

BY EVERY TEST THE BEST.



Constant Potential, 3 to 5 Amperes.

Constant Current Series, 5 to 7 Amperes.

Alternating Current, 3½ and 6 Amperes.

STERLING ARC LAMP CO.,

214-222 West 26th St., NEW YORK.

Western Office: GATES & RANDOLPH, 13 Monadnock Block, Chicago, Ill.

Petite Alternating Enclosed Long-Burning Arc Lamp.

Adapted for great variations in voltage and frequency. Ordinary changes in voltage and frequency do not produce flickering or unsteadiness of the arc. Standard adjustment 104 volts; with this adjustment the lamps will burn steadily under variations from 90 to 115 volts.

Reasonable cost.
High efficiency.
No framework in sight.
Shade reflects upward rays downward.
For indoor and outdoor use.
26 inches long.
Easily trimmed.

PETITE ALTERNATING ENCLOSED ARC LAMP, STANDARD M SHADE AND EGG GLOBE.

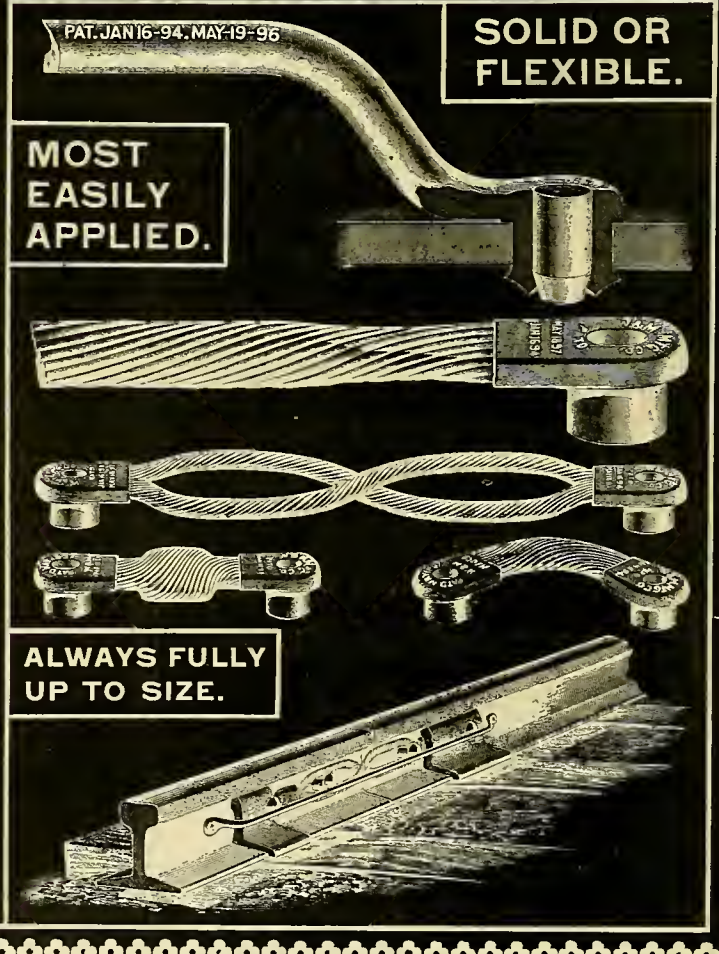
MANUFACTURERS OF THE WORLD RENOWNED

"CROWN" RAIL BONDS.

PERFECT AND ELECTRICALLY MECHANICALLY.

One man can apply two "Crown" Bonds in same time required to apply one Bond of any other make. The saving thus effected will in many cases equal the price of the Bonds.

The number of "Crown" Rail Bonds sold annually is undoubtedly greater than the combined sales of all other makes of Rail Bonds.

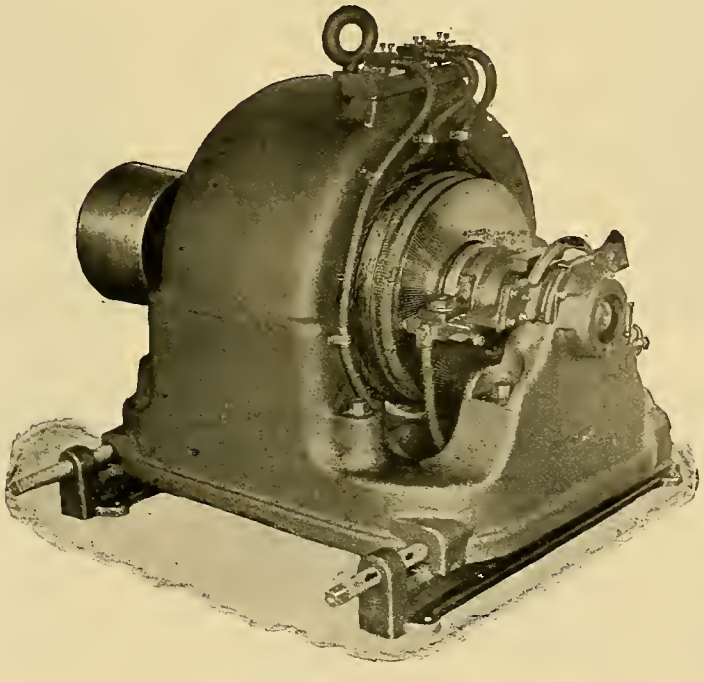


Transformers of all Kinds.

Wagner Products are High-Grade Products.

They are Efficient, Reliable, Simple and Guaranteed.

We are prepared to build any kind of static transformer for any voltage. Write us for prices and information.



Single-Phase A. C. Motor.

Our single-phase motors are going to all parts of the world. We are sending in one shipment 36 on the order of one company to a single South American city. We will be pleased to send descriptive circulars. These motors are self-starting with load and one-quarter (more if specified). Highly efficient. Noiseless in operation.

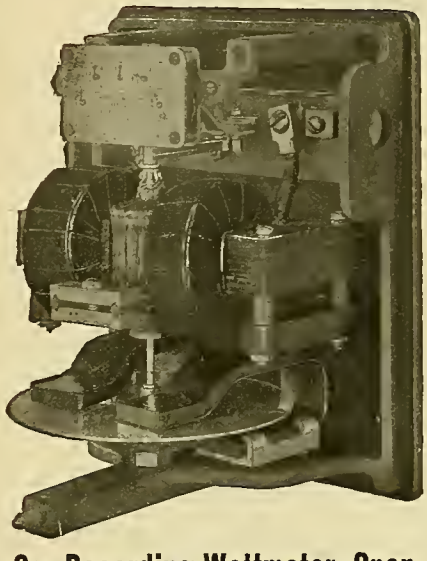
THE GENERAL ELECTRIC COMPANY'S

STREET CAR METER



Car Recording Wattmeter, Open.

Is equivalent to a dynamometer record for every car which has it.

Car Recording Wattmeter, Closed.

This Street Car Meter enables the management of a street car company to distinguish between efficient and inefficient motormen. It shows the increased power cost of poor track. It picks out motors in need of repairs. It answers every purpose served by coal premiums in steam railway service. These statements can be fully proved by a trial of its utility.

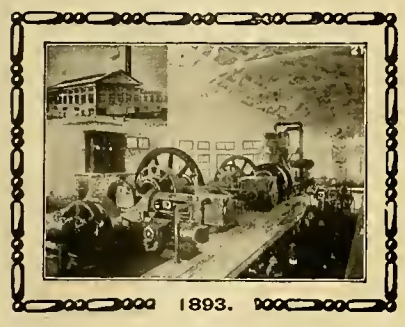
WE DESIGN AND BUILD

Complete Electric Power Properties.

OUR RECORD.

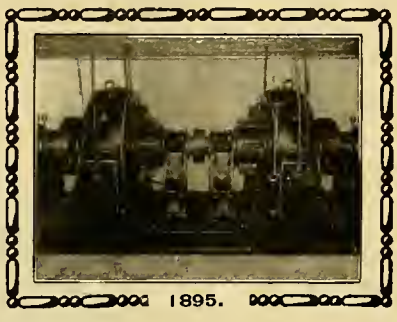
The plants of the following companies were built from the designs of the president of this company, while acting in the capacity of consulting engineer.



1893.

COLUMBIAN INTRAMURAL RAILWAY,
AT THE WORLD'S FAIR.

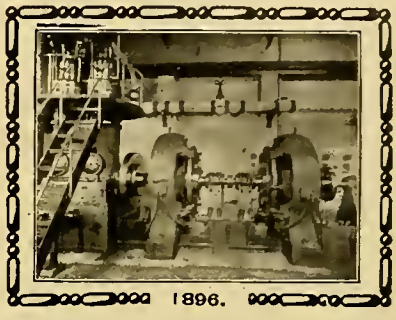
The FIRST successful elevated electric road in the United States.



1895.

CHICAGO BOARD OF TRADE.

The FIRST isolated plant to successfully operate arc lights, incandescent lamps, motors and electric elevators off one set of mains by means of a storage battery.

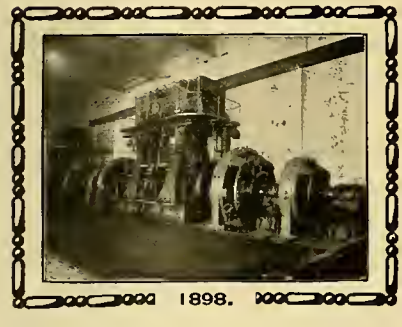


1896.

ENCLEWOOD & CHICAGO ELECTRIC RAILWAY.

The FIRST successful storage battery road in the United States.

THIS COMPANY DESIGNED AND BUILT

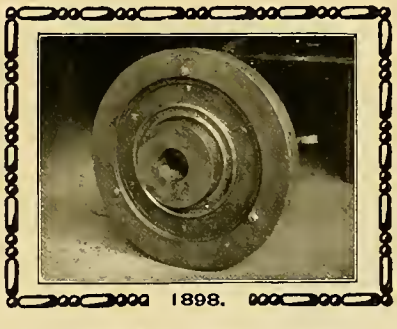


1898.

The power station of

THE IMPERIAL ELECTRIC LIGHT, HEAT & POWER CO.
OF ST. LOUIS.

The FIRST direct-current central station in the United States to successfully operate incandescent lamps, arc lamps and 250 and 500 volt motors off one set of mains.

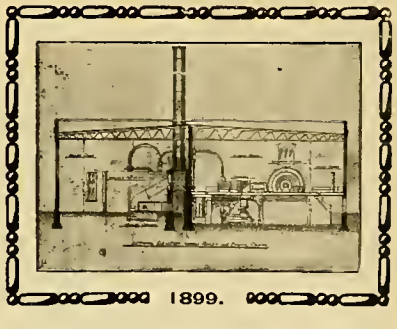


1898.

The complete light, heat and power plant of the

CHICAGO GREAT WESTERN RAILWAY CO.
AT OELWEIN, IA.

The FIRST plant to utilize magnetic clutches for connecting shafting.



1899.

The entire equipment excepting track of the

CHICAGO & MILWAUKEE ELECTRIC RAILWAY.

The FIRST long-distance electric railway operated from a central steam station, using three-phase transmission, rotary converters, sub-stations and battery auxiliaries.

In each of the plants built by this company a stipulated economy was guaranteed under a bonus and forfeiture contract.

This company is prepared to submit propositions on complete electric plants for any purpose under reliable guarantees, after learning particulars.

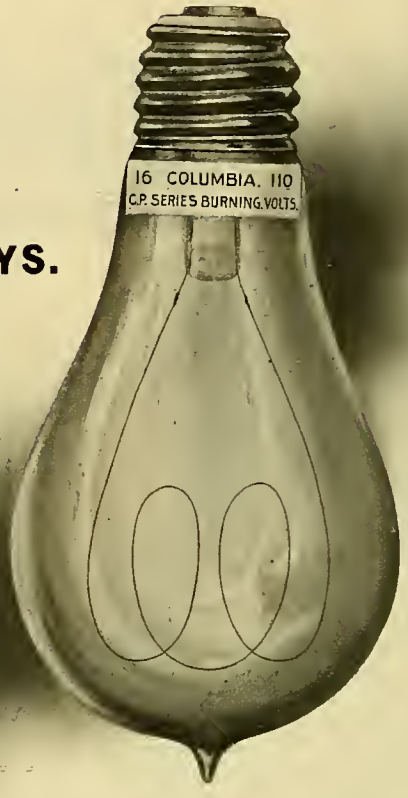
ARNOLD ELECTRIC POWER STATION COMPANY,

SUITE 1540 MARQUETTE BUILDING, ...CHICAGO.

ESTABLISHED 1889.

COLUMBIA LAMPS.

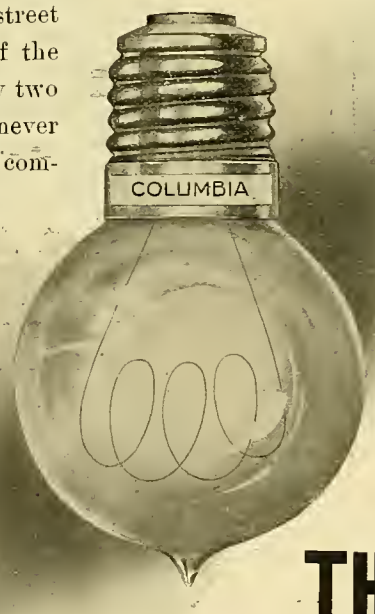
UNEQUALED IN QUALITY.



SPECIAL SERIES BURNING LAMPS FOR ELECTRIC STREET RAILWAYS.

The accompanying is a full size cut of the **Columbia Railway Lamp** for series burning on street railway circuits, and can be furnished as follows: 16 candle power only. Voltage, 90 to 125 for series of 5 on circuits of 450 to 600 volts. Efficiency, 4 watts per c. p. Plain glass, frosted or superficially colored. Genuine colored glass—ruby, blue, green amber and opal.

We guarantee our railway lamps absolutely uniform in current consumption, thereby giving a uniform distribution of light throughout the car. The filament is unanchored, having a 2½-turn coil, which gives it necessary stability and prevents any possibility of breakage from vibration. Our present type of railway lamp has been in use on some of the largest street railway systems of the country for nearly two years and we have never received a single complaint.



The accompanying cut is a full size reproduction of the COLUMBIA ROUND BULB OR WINDOW LAMP, which is used for show window and decorative lighting. It is also made for headlight purposes on electric street railway circuits and for decorative lighting in trolley party cars. For street railway service it is made in 16 c. p. only and in 4 watts efficiency, so that it can be operated in series with the other lamps in the cars. In ordering please specify "Headlight Lamps" if for use on street railway circuits.

Our regular lamps for commercial lighting are guaranteed uniformly high grade.

Trial order solicited.

THE COLUMBIA INCANDESCENT LAMP CO.

Main Office and Factory, 1910-12-14 OLIVE STREET, ST. LOUIS, MO.

NEW YORK OFFICE: 1311 Havemeyer Building.
CHICAGO: Central Electric Co.
SAN FRANCISCO: 120 Sutter Street.
MINNEAPOLIS, 295 Syndicate Arcade.

ALWAYS READY. NEVER DISAPPOINTS.

OUR OWN design and a sure winner with any current.

Stands up under most trying conditions.

Carries all kinds of tensions and can easily win in competition.

Has a peculiar resistance to water, all its own.

Equally as good in the air, underground or in the water.

It is certainly a good purchase. Ever tried it?

MONA COMMUTATOR COMPOUND,

The most efficient lubricator, is the only article that is guaranteed to stop sparking. It can be used on leaf, carbon or gauze wire brushes with the greatest safety. Puts a beautiful luster on the Commutator. Does away with the use of sandpaper or any other material that wears out or destroys its surface. It is the largest and most economical stick manufactured. It comes in two sizes. Small size, $3.00 per dozen. Large size, $5.00. Samples mailed free on application. For sale by all supply houses throughout the United States, England and Canada.

TROTTER'S COMMUTATOR COMPOUND NEW YORK

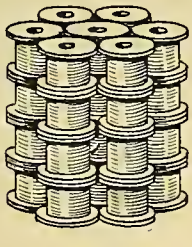
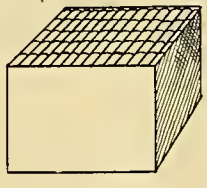
TELEPHONE MEN AND ALL USERS OF MAGNET COILS HAVE YOUR MAGNET COILS WOUND BY MACHINERY



HERE'S THE OBJECT LESSON— A PLAIN FACT



These 28 3+lbs. spools (91 lbs. total) of No. 36 single silk-covered wire will cost you $243 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm bridging-bell magnets. Your winding labor will cost you at least $5 additional, making a total cost of your own 1,000 magnets finished at factory, $218.

The above box contains 1,000 "Duplex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $218.70 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

THE VARLEY DUPLEX MAGNET CO.

A PERFECT CLUTCH

In your arc lamps will decrease your repair bill, increase the efficiency of your lamps, give better satisfaction to your customers and increase your profits.

The Knutson Gravity Clutch

Does all this and more. Its superiority over ALL others has been demonstrated. It is daily replacing inferior clutches.

YOUR OLD T.-H. ARC LAMPS will be good as new if you fix them up RIGHT, and BETTER if you take out old-style clutches and fit them up with the **KNUTSON GRAVITY CLUTCH,** the only clutch ever made that can be put in a lamp without taking rods out. We can FIX your T.-H. lamps and make them better than they ever were.

The Knutson Clutch has given entire satisfaction to thousands of users all over the country; it can do the same for YOU. Let us interest you sufficiently to give it a trial. It is CHEAPER than any other clutch and vastly SUPERIOR.

Why continue to get out of patience with other clutches when the Knutson Clutch gives such satisfaction? The troubles of the lamp trimmer are reduced to a minimum where the Knutson Clutch is used.

One electric light company saved over $200 in repairs in one year through the use of the Knutson Clutch. Samples, prices and descriptive circular mailed to interested parties.

THE DEMAND

..FOR..

C. & H. RHEOSTATS

Has increased so rapidly that our present quarters have become inadequate and a three-story brick building has been erected for us in Milwaukee, Wis., which we will occupy on and after November 1st, and where all communications for us should be sent. This building will be equipped with the latest and most improved machinery, and with these improved facilities we will be able to fill orders for special apparatus in a prompt and efficient manner. We will continue to carry a stock of 2,000 standard motor starters and motor speed regulators and these can be shipped the same day an order is received.

THE SEAL OF APPROVAL

Has been placed on the use of Automobiles by the high social factors of the country and another year no member of elite society will be up-to-date or strictly correct in every respect in his equipage unless he is the possessor of one or more Automobiles. Anticipating this, the **Woods Motor Vehicle Company** have developed and perfected beyond all further experiment under the Woods system of electrical propulsion correct styles for the coming year in over thirty different forms of vehicles, including Buggies, Traps, Brakes, Broughams, Victorias and Cabs, all of which are so simple in their operation and care that the same servants now employed can be retained, and in the lighter vehicles for ladies' and gentlemen's driving an hour's time is sufficient to learn their every manipulation.

Cost to run per mile, ½ cent. STANHOPE. Price, $2,000.00 net.

STANDARD OF THE WORLD.

Weight, 1,800 Pounds.

Mileage capacity, one charge, 35 miles.

Speed per hour, 12 miles.

The Stanhope illustrated here fills in every particular the requirements of the fastidious carriage user, as it has every feature of refinement in design and style which constitutes a carriage and not a mere machine, and one of the greatest delights in store for ladies is the usage of this character of vehicle. We strongly recommend the placing of orders early this fall and winter for spring delivery in order to insure no delay in getting such vehicles for a full season's use next year. Send for book of magnificent illustrations in latest styles of Automobiles.

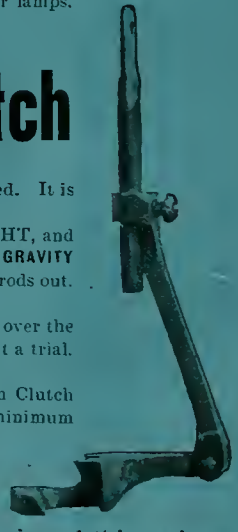
A PERFECT CLUTCH

In your arc lamps will decrease your repair bill, increase the efficiency of your lamps, give better satisfactiou to your customers and increase your profits.

The Knutson Gravity Clutch



Does all this and more. Its superiority over ALL others has been demonstrated. It is daily replacing inferior clutches.

YOUR OLD T.-H. ARC LAMPS will be good as new if you fix them up RIGHT, and BETTER if you take out old-style clutches and fit them up with the KNUTSON GRAVITY CLUTCH, the only clutch ever made that can be put in a lamp without taking rods out. We can FIX your T.-H. lamps and make them better than they ever were.

The Knutson Clutch has given entire satisfaction to thousands of users all over the country; it can do the same for YOU. Let us interest you sufficiently to give it a trial. It is CHEAPER than any other clutch and vastly SUPERIOR.

Why continue to get out of patience with other clutches when the Knutson Clutch gives such satisfaction? The troubles of the lamp trimmer are reduced to a minimum where the Knutson Clutch is used.

One electric light company saved over $200 in repairs in one year through the use of the Knutson Clutch. Samples, prices and descriptive circular mailed to interested parties.

We also wish to call the attention of arc lamp users to our ONE-PIECE upper and lower carbon holders for ½-in. and ⅝-in. carbons.

FOREIGN AND DOMESTIC

CARBONS

WRITE FOR PRICES.

CHICAGO EDISON COMPANY,

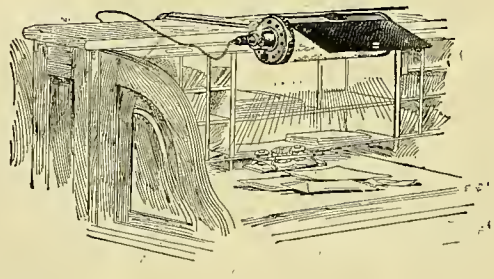
139 ADAMS STREET, CHICAGO.

SAVE YOUR EYES

BY USING THE

KINSMAN DESK LAMP.

Beware of Spurious Imitations.



Has many advantages over any desk light, shade or reflector in the market. Finished in nickel plate, polished brass or dark green enamel.

The eye shade, which serves as a reflector as well, may be moved by a touch to any desired angle, so that the desk alone may be illuminated, or an illumination may be obtained a short distance from the desk.

The inner glass cylinder has one clear glass surface and one of ground glass to soften the light, if desired. Turned by a knob at further side.

There is an adjustable arm, enabling the light to be drawn forward or pushed back at pleasure.

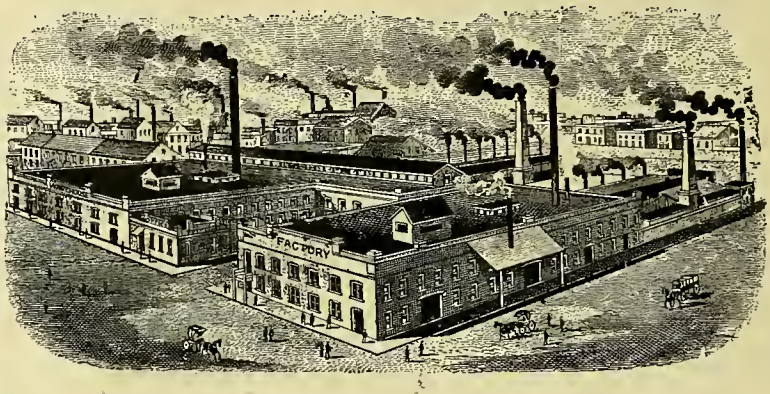
All these changes in use may be made readily, without rising from one's chair. The fixture may be clamped to the desk without marring it.

Send for Pocket Catalogue and Prices.

McLeod, Ward & Co.,

29 THAMES ST., NEW YORK.

PHOENIX.



We Are Still Doing Business

at the old stand, and desire to announce to the trade that we are running full time and manufacturing and selling everything in the battery and specialty line.

We have discontinued the manufacture of electric light carbons and street railway motor brushes of every description.

Our products ARE THE BEST.

Our facilities are UNSURPASSED.

We are in a position to MAKE PRICES to meet the requirements of the times or COMPETITION of the World.

Our stock is complete, and we solicit your business.

Convention Reports

Show value of attention to details and use of improved methods.

The details of

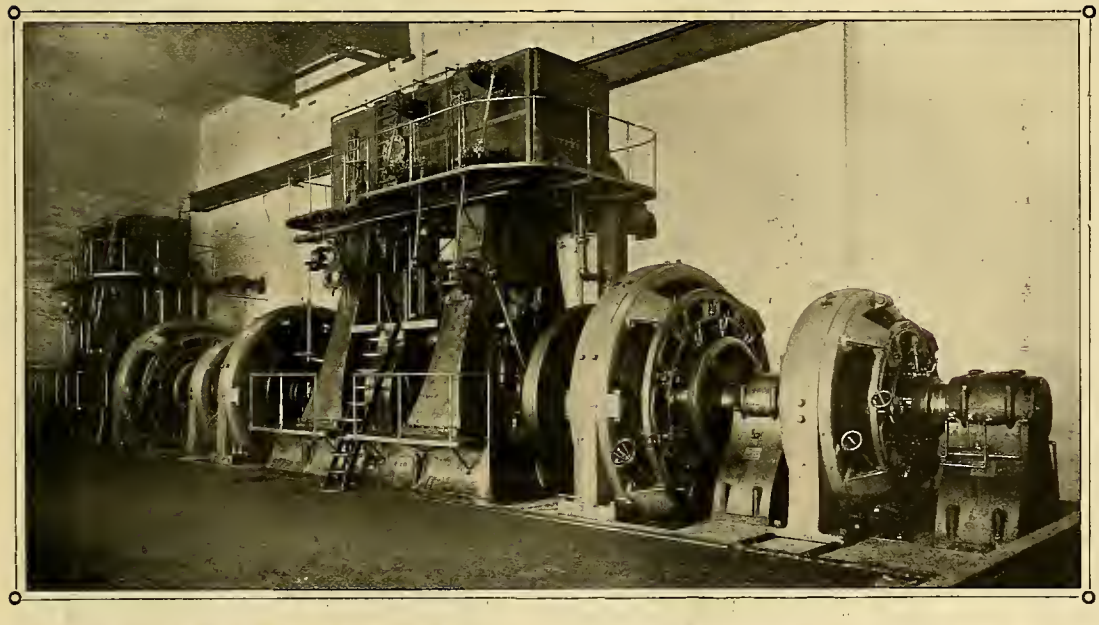
Bullock Engine Type Generators

Are worked out under most modern practice, with a large co-efficient for range of work and overload. Slow speed, while increasing first cost, gives length of operative life. Ventilation of fields and armature is given broadest regard, while insulation is not considered effective until dryness is assured by baking coils under pressure.

This machinery has features worthy of investigation. Send for Bulletin No. 34.

Electric Railway Supplies.

WE DESIGN AND BUILD COMPLETE PLANTS.

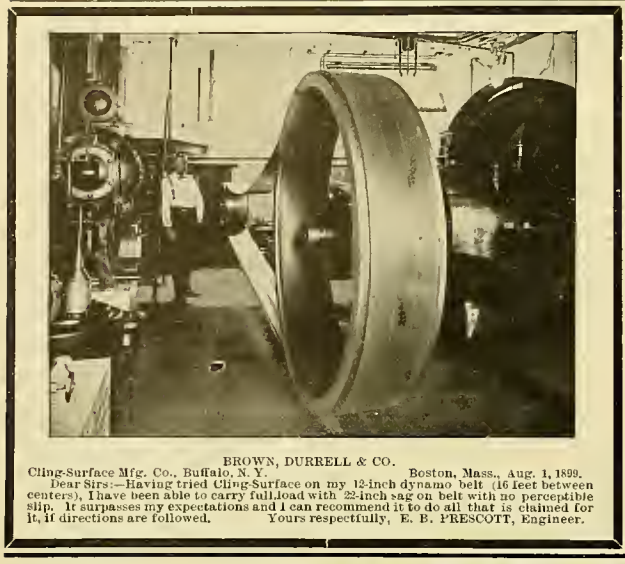


THE accompanying cut shows an interior view of the plant of the Imperial Electric Light, Heat & Power Co., St. Louis, Mo. Present capacity, 2,000 K. W. Built complete by the Arnold Electric Power Station Co., after designs furnished with its proposition. The First Central Station to adopt the Arnold Magnetic Clutch.

IF YOU HAVE A POWER PLANT or a complete electric railway or lighting plant to build we are prepared to submit to you or to your consulting engineer a proposition upon the entire job. We will guarantee the operation of the complete plant, both in regard to operation and also economy. We can save you time, annoyance and money. Suppose you write to us about it.

Arnold Electric Power Station Co.,

SUITE 1540 MARQUETTE BUILDING, ... CHICAGO.



BROWN, DURRELL & CO.

Cling-Surface Mfg. Co., Buffalo, N. Y. Boston, Mass., Aug. 1, 1899.

Dear Sirs:—Having tried Cling-Surface on my 12-inch dynamo belt (16 feet between centers), I have been able to carry full load with 22-inch sag on belt with no perceptible slip. It surpasses my expectations and I can recommend it to do all that is claimed for it, if directions are followed. Yours respectfully, E. B. PRESCOTT, Engineer.

AN EASY BELT

MADE POSSIBLE BY

CLING-SURFACE

Means a saving of time, money, belt and bearings, to say nothing of the engineer's comfort.

There is no better belt preservative known than Cling-Surface.

We have something to say.
Write Us.

EDISON INCANDESCENT LAMPS.

The Experience of Customers who use over 10 Million Lamps per year is that

IT PAYS TO USE THE EDISON.

Edison Lamps may cost slightly more at first. In the end they cost less than all others. This is so because of:

1. Their long useful life.--Fewer lamps required.
2. Their better maintained candle power.--More light for less power.
3. Their uniform and exact rating. C. P. correct, Wattage correct. } Uniform Results.
4. Absence of all mechanical and physical defects--every lamp perfect.

3,500,000 Standard Lamps now in Stock. Monthly Production, 1,000,000 Completed Lamps. Prompt Shipments. All Kinds. In Any Quantity.

EUGENE FIELD'S POEMS. A $7.00 BOOK

THE Book of the century Handsomely Illustrated by thirty-two of the World's Greatest Artists.

Given Free

to each person interested in subscribing to the Eugene Field Monument Souvenir Fund. Book contains a selection desired. Subscriptions as low as $1.00 will entitle donor to his daintily artistic volume

"FIELD FLOWERS"

(cloth bound, 8x11), as a certificate of subscription to fund of Field's best and most representative works and is ready for delivery.

But for the noble contribution of the world's greatest artists this book could not have been manufactured for less than $7.00.

The Fund created is divided equally between the family of the late Eugene Field and the Fund for the building of a monument to the memory of the beloved poet of childhood. Address

EUGENE FIELD MONUMENT SOUVENIR FUND,
(Also at Book Stores) 180 Monroe St., Chicago
If you also wish to send postage, enclose 10 cts.

OUR STUDENTS SUCCEED.

FARMER BECOMES SUPERINTENDENT.

I think there is no better chance to advance than through the Schools. Before I enrolled I was a farmer, and knew practically nothing about electricity or steam engineering. My Courses in Electric Power and Lighting and Stationary Engineering have been a source of great benefit to me, as I now have charge of an electric-light plant, and cheerfully admit that I owe my position and salary to the Schools.

STEPHEN S. YAHNER, *Patton, Pa.*

BECAME CHIEF ENGINEER.

For some time previous to enrolling in the Schools I had been reading everything I could get pertaining to mechanical and electrical engineering, but found that I needed a better education in mathematics. When I enrolled in the Electrical Engineering Course I was second engineer of the Topeka Railway Company. About one year afterwards, I was promoted to the position of chief engineer at a much larger salary.

J. L. CHASE, *Topeka, Kansas.*

Nine Electrical Courses. Electrical Engineering, Electrical, Electric Power and Lighting, Electric Lighting, Electric Railways, Telephony, Telegraphy, Electric Mining, Wiring and Bell Work.

Electrical Instruction in charge of PROF. R. B. WILLIAMSON, Formerly professor of Electricity in Lehigh University.

105,000 STUDENTS AND GRADUATES August, 1899. CAPITAL, $1,500,000.

$12 to $70 in Small Monthly Installments pays for a

New Dynamo Tenders' Hand-Book.

By F. B. BADT.

226 Pages, 140 Illustrations. Flexible Cloth Binding. Size of Type Page 5 1-2x3 inches. Price $1.00.

This is, as the name indicates, a NEW BOOK, much more complete than the old one, with all the information, instructions and rules which are required by practical men, as Dynamo Tenders, Linemen, Stationary Engineers, and owners and operators of all kinds of Electric Plants. It is the only book of the kind published in the English language. 9,000 copies of the old Dynamo Tenders' Hand-Book sold, and over 7,000 of the new.

THE MOTOR ENGINEERS' AND ELECTRICAL WORKERS' HAND-BOOK.

By WM. LUYTERN.

The Motor Engineers' and Electrical Workers' Hand-Book is compiled with a view of furnishing a book of reference in a simple and convenient form for the use of motor engineers and street railway men. The diagrams of controller connections and combinations will be found of great value in practical work. The methods of testing are both simple and reliable. The writer is indebted to the Westinghouse, General Electric, Walker and Steel Motor companies for information cheerfully furnished.

TABLE OF CONTENTS.

Chapter I.—Elementary Principles. Units, Ohm's Law, Watt, Kilowatt, Ampere, Turn, Hour, etc. Potential, E. M. F., Voltage, Drop of Potential, Resistance (Ohmic), Conductivity. **Chapter II.**—Magnetism and Electro-Magnetic Induction. **Chapter III.**—Circuits: Varieties of Circuits, Series, Shunt, Parallel or Multiple Arc, Joint Resistances of Parallel Circuits, Multiple Series, Series Multiple. **Chapter IV.** Dynamo Electric Machine. General Principles. Field Windings, (Varieties), Series, Shunt, Compound, etc. Short Shunt, Long Shunt. **Chapter V.**—Instructions for Operating Generators: Running a Single Generator, To Shut Down a Machine Not Run in Multiple, Sparking, Polarity, Excitation Grounds, Generators in Multiple, Connections, Running Generators in Multiple. To Shut Down a Machine Running in Multiple. **Chapter VI.**—The Electric Motor: General Principles, Counter Electromotive Force and Mechanical Power, Efficiency. **Chapter VII.**—Measurements and Tests of Street Railway Motors—Faults, Measurement by Drop of Potential Method (Examples), Insulation Tests, Voltmeter Method, Description of Voltmeter and Ammeter, The Wheatstone Bridge, Instructions for Operating, Drop of Potential in Motor Circuits. **Chapter VIII.**—Instructions for Operating Car Apparatus: Brushes, Sparking at Brushes, Bearings, Bucking, Fuse, Block, Operating Car, Trolley, etc. **Chapter IX.**—The Electric Motor Car in Detail. Series, Parallel, Controller, Reverse Switch, Rheostat, Fuse Box, Lightning Arrester, Heaters. **Chapter X.**—Definitions of Terms. **Chapter XI.**—Diagrams of Car Wiring and Controllers, with Written Descriptions and Diagrams of Combinations: Westinghouse System (G. No. 14, No. 28 and 28 A). General Electric (K. with W. P. Machines, K 2; General Electric Series Parallel Controller with Magnetic Brake). Walker System (B2, E) Steel Motor Co. System. **Chapter XII.**—General Electrical and Mechanical Information. Belting, Shafting, Pulleys and Gears, Melting Point, Specific Gravity and Relative Conductivity, Table Comparing Wire Gauges, Number, Dimensions, Height, Length and Resistance of Pure Copper Wire, Electrical Units and Formulas, Equivalent Carrying Capacity, Proportions of Gear Teeth Notes, Bill of Material for Span Wire Construction (Single Track) (Double Track), Bracket Construction, (Single Track) (Center Pole) (Double Track).

160 pages. Handsomely bound in cloth, $1.00. Heavy boards, 50c. Sent on receipt of price.

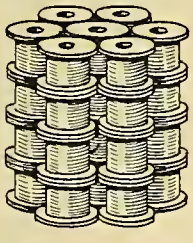
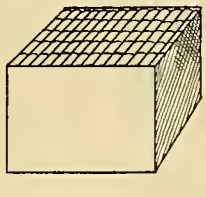
TELEPHONE MEN AND ALL USERS OF MAGNET COILS HAVE YOUR MAGNET COILS WOUND
BY MACHINERY



HERE'S THE OBJECT LESSON—
A PLAIN FACT



These 28 3+lbs. spools (91 lbs total) of No. 36 single silk-covered wire will cost you $245 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm bridging-bell magnets. Your winding labor will cost you at least $5 additional, making a total cost of your own 1,000 magnets finished at factory, $248.

The above box contains 1,000 "Duplex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $218.70 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

THE VARLEY DUPLEX MAGNET CO.

To the Unconverted!

IN our efforts to secure your business we have often longed for that gift of prophecy which seems so easily acquired by many of our Telephone friends, that we might be able to give you the exact dates when all competitors would be wiped off from the face of the earth. Failing in this accomplishment, we have sighed for that spirit of poetry which would enable us to melt your icy heart and cause you to sweat blood as a penalty for not using the W. & C. Bi-polar Receiver and our complete Telephone Equipment. But we have no such ability. Our only salvation seems to be in making the best telephone apparatus on earth, and some day you will find it out.

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagoetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circoit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magoet Telephones.
11. The Gower, Ader and D'Arsooval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neomayer and Böttcher Receivers.
13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.
28. Metallic Circuit.
29. Underground Wires.
30. Lightning Arresters.
31. Inside Wiring.
32. Installation of Telephone Instruments.
33. Inspection and Maintenance.
34. The Condenser; Its Use in Telephony.
35. Electromagnetic Retardation.
36. Exchange Working.
37. Small Exchanges.
38. Party Lines: The Bridging Bell.
39. Long Distance Telephony.
40. Duplex Telephony.
41. Simultaneous Telegraphy and Telephony.
42. Recent Progress. Appendix.

PRACTICAL KNOWLEDGE
FOR
Stationary and Marine Engineers, Firemen, Electricians, Motormen, Ice Machine Men and Mechanics in General.

New and Original. All Modern Machinery fully described and explained. Technical Points made Clear by Word and Drawing. Questions and Answers for Civil Service Examinations, etc.

SUBJECTS TREATED:

WATER, STEAM, COMBUSTION, SMOKE PREVENTION, BOILERS, BOILER CONSTRUCTION, TESTING AND MANAGEMENT, SAFETY VALVES, INJECTORS, PUMPS AND GOVERNORS, STEAM GAUGES, LUBRICATORS, ENGINES, COMMON SLIDE VALVE, TANDEM COMPOUND, CROSS COMPOUND, RECEIVER ENGINES, HOT AIR AND COMPRESSED AIR ENGINES, TRACTION ENGINES, ELECTRIC ENGINES, AUTOMATIC AND CORLISS ENGINES, CONDENSERS, JET AND SURFACE, ECCENTRIC, BALANCED SLIDE VALVE, LINK MOTION, HORSE POWERS IN DETAIL, INDICATOR, REFRIGERATION, ABSORPTION AND COMPRESSION METHODS, BRINE AND DIRECT EXPANSION SYSTEMS, PUMPS, VALVES, TESTS, TABLES, AMMONIA, AMMONIA FITTINGS, LIQUID AIR, MACHINE SHOP PRACTICE, STANDARD NUMBERS AND RULES, PULLEY SPEED CALCULATION, SQUARE ROOT, LEVERAGE, ELECTRICITY, DYNAMOS, ACCUMULATOR, RHEOSTAT, TRANSFORMER, VARIETIES OF DYNAMOS, PARALLEL AND SERIES WIRING, THREE-WIRE SYSTEM, MANAGEMENT AND CARE OF ELECTRIC PLANT, REPAIRS, ELECTRICAL MEASUREMENTS, MOTORS, STATIONARY, TROLLEY AND THIRD RAIL SYSTEMS, CONTROLLER, ELECTRIC LOCOMOTIVE, ELECTRIC HEATING AND COOKING, HOUSE WIRING, DIFFERENTIAL GEAR, FRICTION CLUTCH, COMPOUND CYLINDERS, REVERSING GEAR, THE STACKER. ALSO, THE ELEMENTS OF ALGEBRA MADE EASY.

336 Pages. 240 Illustrations.

PRICE, $1.00. Sent anywhere prepaid on receipt of price.

ELECTRICIAN PUBLISHING COMPANY,
510 Marquette Bldg., Chicago.

DOES

Your Electric Light or Street Railway Plant Pay Satisfactory Dividends?

If not, why don't you remodel and put it on a paying basis? That's a specialty of our business.

THE LATEST BOOK.

"ELECTRIC LIGHTING,"

A PRACTICAL EXPOSITION OF THE ART FOR THE USE OF

Engineers, Students and Others Interested in the Installation or Operation of Electrical Plants.

BY FRANCIS B. CROCKER,

Professor of Electrical Engineering, Columbia University, New York.

Price $3, Prepaid. - Practical and Up-to-Date.

Just the Book you want. 450 Pages, over 150 Illustrations. Read the

TABLE OF CONTENTS:

Chapter I, Introduction; Chapter II, History of Electric Lighting; Chapter III, General Units and Measures; Chapter IV, Classification and Selection of Electric Lighting System; Chapter V, The Location and General Arrangement of Electric Lighting Plants; Chapter VI, Buildings for Electric Lighting Plants; Chapter VII, Possible Sources of Electrical Energy; Chapter VIII, The Steam Engine, History and General Principles; Chapter IX, Steam Boilers for Electric Lighting; Chapter X, Steam Engines for Electric Lighting, General Construction; Chapter XI, Typical Forms of Steam Engine for Electric Lighting; Chapter XII, Steam Engines for Electric Lighting, Selection, Installation and Management; Chapter XIII, Gas, Oil and Hot Air Engines; Chapter XIV, Water Wheels and Windmills; Chapter XV, Mechanical Connections between Engines and Dynamos, Direct Coupling, Belting and Shafting; Chapter XVI, Toothed, Friction and Other Gearing; Chapter XVII, Principles, Construction and Management; Chapter XXI, Applications of Accumulators in Electric Lighting; Chapter XXII, Switchboards, Including Switches, Fuses and Circuit-Breakers; Chapter XXIII, Electrical Measuring Instruments; Chapter XXIV, Lightning Arresters.

Every Engineer and Electrician who desires to thoroughly master the Art of Electric Lighting should have a copy of this book. Sent promptly.

OKONITE

TRADE MARK.

The Okonite Company, Ltd.

Central Electric Company,

Electrical Supplies,

264-266-268-270 Fifth Avenue,

Chicago, Nov. 1st, 1899.

To the Central Station Manager,

Dear Sir:-

As demands for Electrical Supplies change with the season, we are pleased to announce our careful preparation for the Fall and Winter requirements of INSIDE WIRING MATERIAL.

We believe that twelve years' electrical experience permits us to select for an actual and maintained stock such general and reliable staples as will meet all the usual needs of the well-posted buyer.

In announcing our complete stock for Fall and Winter service, we, at the same time, wish to thank our Central Station Friends for their liberal favors for Construction Material during the season just now closing and to express a hope that we may now gain their valued orders for the material to be used in the season about to open.

To those who have just entered the lighting field, we desire to recommend ourselves as maintaining the largest stocks, combined with unequaled shipping facilities, and naming prices consistent with stock shipments.

To any in the trade we shall be pleased to send prepaid a copy of our 1899 General Catalogue, which thoroughly covers INSIDE WIRING MATERIAL.

Yours very truly,

CENTRAL ELECTRIC COMPANY.

SAMPLES FREE. Let us know your voltage, base and efficiency and we will mail you a sample lamp and write you how we can maintain your supply of lamps at a lower figure than is offered by any other first-class lamp manufacturer in the United States.

We have the **Largest and Most Complete Electrical**

REPAIR SHOPS

In the West. ELECTRICAL REPAIRS AND MACHINE WORK OF EVERY DESCRIPTION. In having your repair work done by a company operating hundreds of dynamos and motors you are sure of good work and get the benefit of our experience.

CHICAGO EDISON COMPANY,

76 MARKET STREET, CHICAGO.

THE SEAL OF APPROVAL

Has been placed on the use of Automobiles by the high social factors of the country and another year no member of elite society will be up-to-date or strictly correct in every respect in his equipage unless he is the possessor of one or more Automobiles. Anticipating this, the **Woods Motor Vehicle Company** have developed and perfected beyond all further experiment under the Woods system of electrical propulsion correct styles for the coming year in over thirty different forms of vehicles, including Buggies, Traps, Brakes, Broughams, Victorias and Cabs, all of which are so simple in their operation and care that the same servants now employed can be retained, and in the lighter vehicles for ladies' and gentlemen's driving an hour's time is sufficient to learn their every manipulation.

Cost to run per mile, ½ cent. STANHOPE. Price, $2,000.00 net.

STANDARD OF THE WORLD.

Weight, 1,800 Pounds.

Mileage capacity, one charge, 35 miles.

Speed per hour, 12 miles.

The Stanhope illustrated here fills in every particular the requirements of the fastidious carriage user, as it has every feature of refinement in design and style which constitutes a carriage and not a mere machine, and one of the greatest delights in store for ladies is the usage of this character of vehicle. We strongly recommend the placing of orders early this fall and winter for spring delivery in order to insure no delay in getting such vehicles for a full season's use next year. Send for book of magnificent illustrations in latest styles of Automobiles.

WOODS MOTOR VEHICLE COMPANY,

547-551 WABASH AVENUE, CHICAGO.

Correct on All Inductive Loads.

DIAMOND METER CO.,

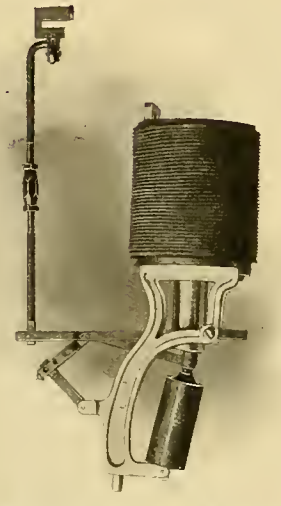
PEORIA, ILL., U. S. A.

METER WITH CASE.

THE BELDEN ARC LAMP

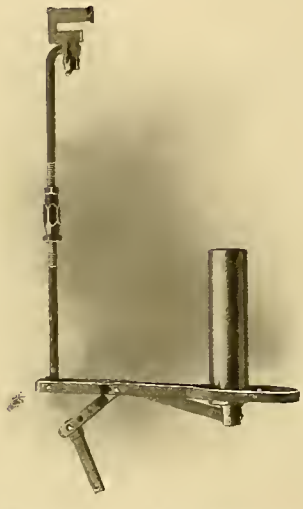
IS SUPERIOR TO OTHER LAMPS

BECAUSE



By Means of This Toggle

The carbons have a range of separation of over three times the distance at which they normally burn.



By Means of This Toggle

The magnet has an extraordinary leverage, thereby allowing the use of the heavy gravity pull.

Simple and light but very powerful mechanism.

Gives the largest possible life for one ½ in. x 12 in. carbon.

No alignment necessary.

Clutch releases itself without striking a trip-post of any kind.

No shadows cast from carbon points.

Absence of metal of any kind on inside of inner globe prevents chance of coloring ashes deposited on globe.

All springs usually employed in mechanism of arc lamps eliminated.

Permanent adjustment at all times regardless of changes of temperature.

No sliding contacts to corrode and cause trouble. No carbon rods.

No part of lamp (except globes) needs cleaning or polishing at any time, as parts cannot become corroded or dirty enough to interfere with proper working of lamp.

Short and very light in weight.

Has extraordinarily strong frame, built like a bicycle.

Trims as easily as an open arc lamp.

Lamp is so insulated that when current is on no uninsulated portion is exposed.

Easy access to working parts.

Long, steady and powerful pull of toggle produces no flickering.

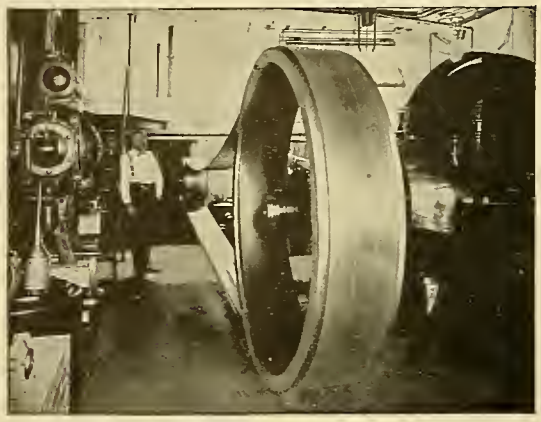
Danger-proof against fire.

If Interested send for Descriptive Catalog. See Illustrated Article in Western Electrician Issue October 28.

MANUFACTURED BY

BELDEN-LARWILL ELECTRIC & MFG. CO.,

FORT WAYNE, INDIANA, U. S. A.



BROWN, DURRELL & CO.

Cling-Surface Mfg. Co., Buffalo, N. Y. Boston, Mass., Aug. 1, 1899.

Dear Sirs:—Having tried Cling-Surface on my 12-inch dynamo belt (16 feet between centers), I have been able to carry full load with 22-inch sag on belt with no perceptible slip. It surpasses my expectations and I can recommend it to do all that is claimed for it, if directions are followed. Yours respectfully, E. B. PRESCOTT, Engineer.

AN EASY BELT MADE POSSIBLE BY

CLING-SURFACE

Means a saving of time, money, belt and bearings, to say nothing of the engineer's comfort.

There is no better belt preservative known than Cling-Surface.

We have something to say.
Write Us.

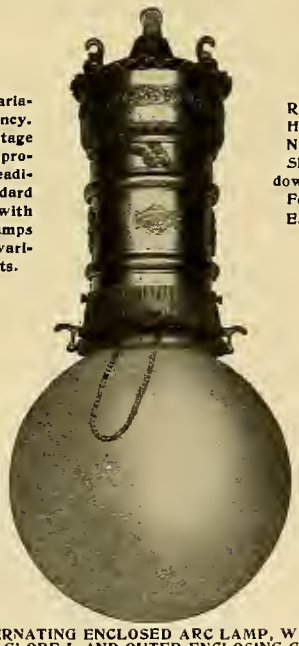
STERLING ARC LAMP CO.,

214-222 West 26th St., NEW YORK.

Western Office: GATES & RANDOLPH, 13 Monadnock Block, Chicago, Ill.

Petite Alternating Enclosed Long-Burning Arc Lamp.

Adapted for great variations in voltage and frequency. Ordinary changes in voltage and frequency do not produce flickering or unsteadiness of the arc. Standard adjustment 104 volts; with this adjustment the lamps will burn steadily under variations from 90 to 115 volts.



Reasonable cost.
High efficiency.
No framework in sight.
Shade reflects upward rays downward.
For indoor and outdoor use.
Easily trimmed.

PETITE ALTERNATING ENCLOSED ARC LAMP, WITH STANDARD INNER GLOBE L AND OUTER ENCLOSING GLOBE S.

EDISON INCANDESCENT LAMPS.

The Experience of Customers who use over 10 Million Lamps per year is that

IT PAYS TO USE THE EDISON.

Edison Lamps may cost slightly more at first. In the end they cost less than all others. This is so because of:

1. **Their long useful life.--Fewer lamps required.**
2. **Their better maintained candle power.--More light fo less power.**
3. **Their uniform and exact rating. C. P. correct, Wattage correct. } Uniform Results.**
4. **Absence of all mechanical and physical defects--every lamp perfect.**

3,500,000 Standard Lamps now in Stock. Monthly Production, 1,000,000 Completed Lamps. Prompt Shipments. All Kinds. In Any Quantity.

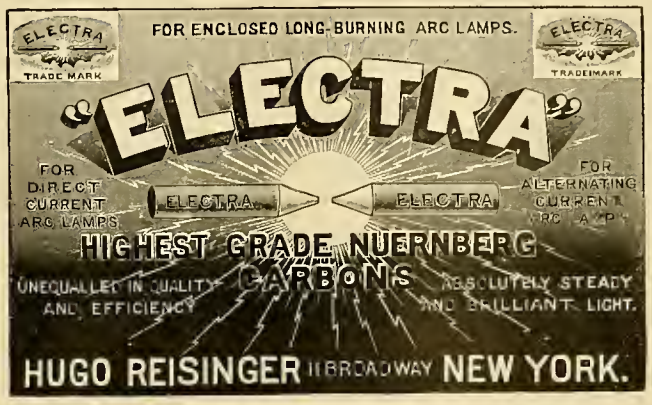
MANHATTAN ELECTRICAL SUPPLY CO.,

32 Cortlandt Street, NEW YORK.

The "ELECTRA" Highest Grade Nuernberg Carbons are recognized as standard all the world over.

All genuine "ELECTRA" carbons are put up in packages bearing the label with the trade mark "ELECTRA."



Good carbons mean less cost for current.

All the excellence in dynamos and arc lamps counts for but little where poor carbons are used in lamps.

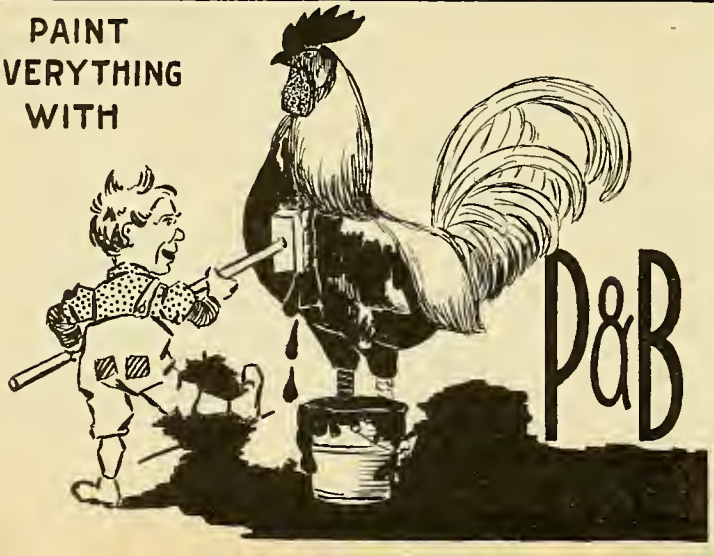
PAINT EVERYTHING WITH



A new T.-H. Arc Lamp is hard to beat, and you CAN'T beat it if you fit it up with the **Knutson Gravity Clutch.**

YOUR OLD T.-H. ARC LAMPS

Will be good as new if you fix them up RIGHT, and BETTER if you take out old-style clutches and fit them up with the

Knutson Gravity Clutch,

The only clutch ever made that can be put in a lamp without taking rods out. We can FIX your T.-H. Lamps and make them better than they ever were.

We wish also to call the attention of arc lamp users to our one-piece upper and lower carbon holders for ½-inch and ⅝-inch carbons.

Write Us for Prices and Particulars.

THE "CLARK" WIRE.

FOR SWITCHBOARD, RAILWAY and MOTOR USE.

All sizes of Stranded and Flexible Wire and Cables with Clark's Insulation

Inspector Boston Fire Underwriters' Union says:
"A thoroughly reliable and desirable wire in every respect."

The Clark wire has been before the public and in use for the past ten years, and has met with universal favor. We guarantee our insulation wherever used, Aerial, Underground or Submarine, and our net prices are as low, if not lower, than any other first-class insulated wire. We shall be pleased to mail Catalogues, with terms and discounts for quantities.

WATER TUBE

FEED WATER HEATER AND PURIFIER.
UNIQUE
in its effectiveness and up-to-date in every respect, at a price that will assure consideration. Vastly superior to any Feed Water Heater on the market.

Benj. F. Kelley & Son,
91 Liberty St., New York.

2d HAND Heaters, 2,000, 1,500, 1,200, 1,000, 800, 500, 300, 80 horse power and others. Largest stock in America. Mostly all taken in trade for our Improved Berryman.

CAN I BECOME AN ELECTRICIAN?

Yes, you can. We teach **Electrical Engineering** at your home by mail at a cost within the reach of anyone. No matter where you live, if you can read and write, we guarantee to teach you thoroughly. Our Institute is endorsed by **Thomas A. Edison** and other prominent men of the country. We teach also **Mechanical Engineering, Mechanical Drawing, Telegraphy, Telephony, X-Rays, Electro-Therapeutics, Electro-Chemistry, Electric Mining, Elementary Mathematics**, etc., by mail. Write for our **FREE ILLUSTRATED BOOK, 120 PAGES.** State subject you wish to study.

THE ELECTRICAL ENGINEER INSTITUTE OF CORRESPONDENCE INSTRUCTION,

I consider the Electrical Engineer Institute conducted by Messrs. Webster and Manton to be of great value to those who desire an Electrical education. Thomas A. Edison

Dept. K, 120-122 Liberty St. New York.

TROTTER'S COMMUTATOR COMPOUND NEW YORK

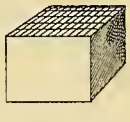
MONA COMMUTATOR COMPOUND,

The most efficient lubricator, is the only article that is guaranteed to stop sparking. It can be used on leaf, carbon or gauze wire brushes with the greatest safety. Puts a beautiful luster on the Commutator. Does away with the use of sandpaper or any other material that wears out or destroys its surface. It is the largest and most economical stick manufactured. It comes in two sizes. Small size, $3.00 per dozen. Large size, $5.00. Samples mailed free on application. For sale by all supply houses throughout the United States, England and Canada.

Manufactured only by TROTTER'S MONA MFG. CO., Ltd., 320 Broadway, New York, N.Y.
Messrs. GOLOMARK & WALLACE are the Sole Agents for the United States, 121 Worth St., New York City
SATISFACTION GUARANTEED OR MONEY REFUNDED.

TELEPHONE MEN AND ALL USERS OF MAGNET COILS HAVE YOUR MAGNET COILS WOUND BY MACHINERY.

HERE'S THE OBJECT LESSON— A PLAIN FACT



These 28 3+lbs. spools (91 lbs. total) of No. 36 single silk-covered wire will cost you $243 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm bridging-bell magnets. Your winding labor will cost you at least $5 additional, making a total cost of your own 1,000 magnets finished at factory, $248.

The above box contains 1,000 "Dup ex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $218.70 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

THE VARLEY DUPLEX MAGNET CO. DOES IT BY MACHINERY
138 7TH ST. JERSEY CITY N.J. WE CAN SAVE YOU CONSIDERABLE MONEY.

WATER WHEELS

For all Heads from 3 Ft. to 2000 Ft.
Especially adapted to all kinds of
ELECTRIC POWER AND LIGHTING PLANTS.

Recent tests at Holyoke enable us to guarantee:
The Largest Power ever obtained from a wheel of the same diameter. The highest speed ever obtained for the same power. The highest mean efficiency ever realized when running from half to full gate. We guarantee also: *A runner of the greatest possible strength. A gate unequaled in quickness and ease of opening and closing. Tests show over 81 per cent. average efficiency with half to full water.*

State your Head and send for 124 page pamphlet.

JAMES LEFFEL & CO., Springfield, Ohio, U. S. A.

GRAPHITE FOR RESISTANCE...

Made in almost any form required and of 1 ohm or 1,000,000 ohms as desired. We also make graphite boxes and crucibles resisting heats of 4,000 degrees. . . . . .

The Lord of the Dynamos

Is sent free of charge to anyone.

This tale is a weird description of an East Indian dynamo tender in one of the great London Power Stations.

It will hold your interest from start to finish. Our catalogue of Technical Books is included in the application. Write for "THE LORD OF THE DYNAMOS."

A NEW AND VALUABLE WORK

ELECTRICITY MADE EASY

BY SIMPLE LANGUAGE and COPIOUS ILLUSTRATION

By Edwin J. Houston, A. M., Ph.D., and Arthur E. Kennelly, Sc.D.

TABLE OF CONTENTS:

Chapter.	
I.	The Turning of an Electric Lamp in the House.
II.	How the Electric Wires are Distributed Through the House.
III.	How the Electric Street Mains Supply the House.
IV.	How the Street Mains are Supplied with Electricity.
V.	The Electric Lighting Station.
VI.	How the Incandescent Lamp Operates.
VII.	How the Incandescent Lamp is Made.
VIII.	How the Electric Current Supplied to the House is Measured.
IX.	How the Arc Lamp Operates.
X.	How the Light of Electric Lamps is Best Distributed.
XI.	The Voltaic Cell and How it Operates.
XII.	The Electric Bell and How it Operates.
XIII.	The Electric Telegraph and How it Operates.
XIV.	How the Dynamo Operates.
XV.	How the Electric Motor Operates.
XVI.	The Telephone and How it Operates.
XVII.	Some Other Applications of Electricity.

THE authors have taken great pains to tell the story of electricity in a clear, comprehensive style so that beginners and laymen cannot fail to be greatly benefited by reading this new work. Many analogies are given which simplify what is usually a difficult technical subject. The authors are famous for their ability to explaining technical matters, without the use of the higher mathematics. Whether you make the science of electricity your profession or not, much knowledge can be gained by reading this work, as it gives anyone a clear idea of the application of electricity.

One Vol., 12mo, Cloth, over 200 Illustrations and 300 Pages, $1.50.

BROOKLYN, N. Y.

THE TROUBLE OF OIL ON BELTS OVERCOME BY
OIL EXTRACTING POWDER,
MANUFACTURED SOLELY BY
SHULTZ BELTING COMPANY.

A great many belts get oil on them, which lessens their driving power by causing them to slip, besides rotting the belt. To send them to some place to have the oil extracted is expensive, and another belt must be kept in reserve, to be used while this is being done.
We manufacture an Oil Extracting Powder which can be applied to the belt while it is running on the pulleys, which absorbs the oil and leaves the belt in nice, dry condition. This can be done with little cost and without loss of time or the use of the belt. It also lengthens the life of the belt. We guarantee it to absorb the oil if used as directed.
This Powder is put up in 10 and 25 pound cans.

Price, 30 Cents per Pound.

SHULTZ BELTING COMPANY,
It can be had from our agents. ST. LOUIS, MO.

THE BELDEN ARC LAMP

IS SUPERIOR TO OTHER LAMPS

BECAUSE

By Means of This Toggle

The carbons have a range of separation of over three times the distance at which they normally burn.

By Means of This Toggle

The magnet has an extraordinary leverage, thereby allowing the use of the heavy gravity pull.

Simple and light but very powerful mechanism.

Gives the largest possible life for one ½ in. x 12 in. carbon.

No alignment necessary.

Clutch releases itself without striking a trip-post of any kind.

No shadows cast from carbon points.

Absence of metal of any kind on inside of inner globe prevents chance of coloring ashes deposited on globe.

All springs usually employed in mechanism of arc lamps eliminated.

Permanent adjustment at all times regardless of changes of temperature.

No sliding contacts to corrode and cause trouble. No carbon rods.

No part of lamp (except globes) needs cleaning or polishing at any time, as parts cannot become corroded or dirty enough to interfere with proper working of lamp.

Short and very light in weight.

Has extraordinarily strong frame, built like a bicycle.

Trims as easily as an open arc lamp.

Lamp is so insulated that when current is on no uninsulated portion is exposed.

Easy access to working parts.

Long, steady and powerful pull of toggle produces no flickering.

Danger-proof against fire.

If Interested send for Descriptive Catalog. See Illustrated Article in Western Electrician Issue October 28.

BOXED, CONNECTED, COMPLETE, READY TO BE HITCHED TO ENGINE.

POINTS IN ORDERING.

1. Name of engine.
2. Number of revolutions per minute.
3. Number of sparks per minute.
4. Mode of ignition, whether by spark coil or induction coil.
5. If spark coil, whether butting or wiping spark.
6. Kind of spark contact points, whether platinum, steel or other material.
7. Average number of hours per day engine is run.

Central Electric Company,

264-270 FIFTH AVENUE, CHICAGO.

OKONITE
IT NEVER DISAPPOINTS

Federal Batteries
Using... Federal Salt

ARE STRONGER THAN ANY

Salammoniac Cell...In the World.

Initial Voltage 1.6 to 1.8.

FEDERAL SALT

USED IN

Carbon Cylinder Batteries

GIVES

33 MORE E. M. F.
AND **33 LONGER LIFE**
THAN SALAMMONIAC.

Absolutely no crystalizing Salts.

ESPECIALLY ADAPTED

TELEPHONES, HOUSE BELLS,
RAILROAD SIGNALS AND ALL
HARD OPEN-CIRCUIT WORK.

MADE BY

FEDERAL BATTERY COMPANY,

11 PINE STREET,

ALL DEALERS. NEW YORK.

CATALOGUE No. 11 NOW READY, 352 PAGES.

MANHATTAN ELECTRICAL SUPPLY CO.

32 Cortlandt Street, NEW YORK.

1,000,000 sold during the past twelve months.

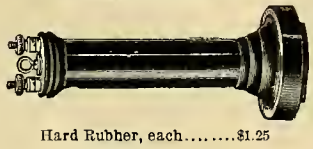
Mesco Dry Battery.

Acknowledged the Best Dry Cell Manufactured.

Price each, 40c.

Standard size, 2⅛x6⅛
We make all sizes.

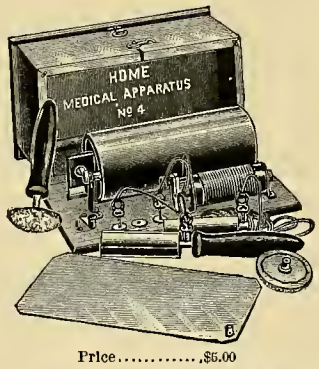
Telephone Receivers.



Hard Rubber, each.....$1.25

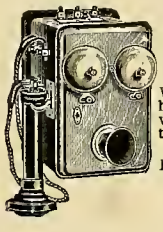
Battery Zincs.

We have purchased the plant of the Carr Metal Company and can furnish the Carr composite zincs in all forms and quality heretofore supplied by that company.



Price.....,$5.00

We make a number of different styles.

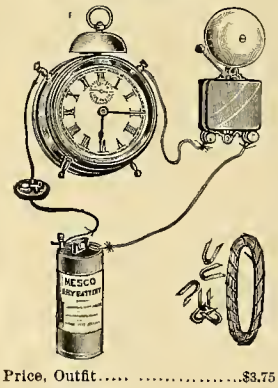


Telephone Outfit, No. 14,

With our high-grade carbon transmitter, which will be sent on approval to responsible parties.

Price, with two cells Mesco Dry Battery, $9.00.

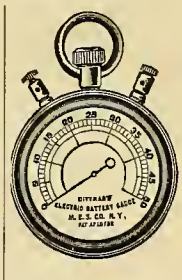
Alarm Clock Outfit, No. 1½.



Price, Outfit.....$3.75
" Clock only..... 2 25

Pony Telephone Receiver.

Retail price, 90 cents.



Dittmar Pocket Battery Gauge.

Will register the strength of open or closed circuit batteries.

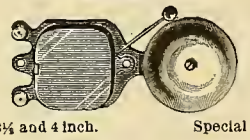
Price each, $3.50.

Desk Telephone Outfit, No. 11.

Price.....$9.00

We make a dozen different Telephone Outfits.

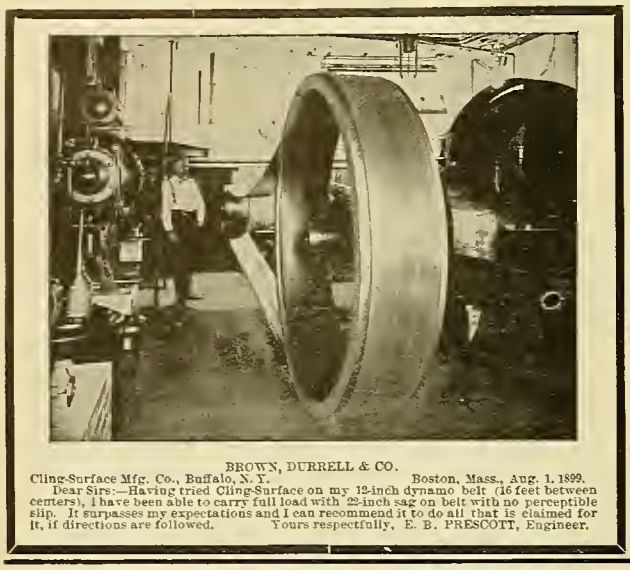
Iron Box Bells, No. 97.



2½, 3, 3½ and 4 inch. Special prices

OUR PRICES given above do not fairly represent quotations to the trade or to parties ordering quantities.
WE MANUFACTURE a large percentage of the goods found in our catalogue.

MANHATTAN ELECTRICAL SUPPLY CO., 32 CORTLANDT STREET, NEW YORK.



BROWN, DURRELL & CO.

Cling-Surface Mfg. Co., Buffalo, N. Y. Boston, Mass., Aug. 1, 1899.

Dear Sirs:—Having tried Cling-Surface on my 12-inch dynamo belt (16 feet between centers), I have been able to carry full load with 22-inch sag on belt with no perceptible slip. It surpasses my expectations and I can recommend it to do all that is claimed for it, if directions are followed. Yours respectfully, E. B. PRESCOTT, Engineer.

AN EASY BELT MADE POSSIBLE BY

CLING-SURFACE

Means a saving of time, money, belt and bearings, to say nothing of the engineer's comfort.

There is no better belt preservative known than Cling-Surface.

We have something to say.
Write Us.

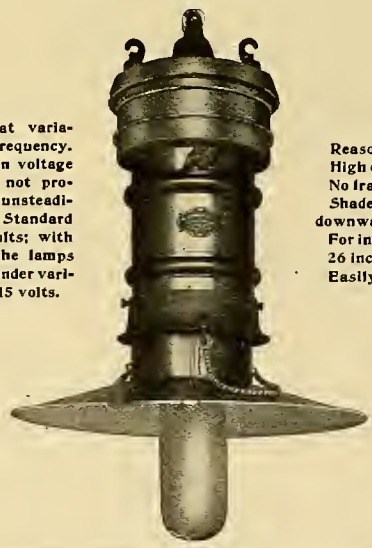
STERLING ARC LAMP CO.,

214-222 West 26th St., NEW YORK.

Western Office: GATES & RANDOLPH, 13 Monadnock Block, Chicago, Ill.

Petite Alternating Enclosed Long-Burning Arc Lamp.

Adapted for great variations in voltage and frequency. Ordinary changes in voltage and frequency do not produce flickering or unsteadiness of the arc. Standard adjustment 104 volts; with this adjustment the lamps will burn steadily under variations from 90 to 115 volts.



Reasonable cost.
High efficiency.
No framework in sight.
Shade reflects upward rays downward.
For indoor and outdoor use.
26 inches long.
Easily trimmed.

PLAIN WEATHERPROOF LAMP, WITH METAL SHADE AND STANDARD ENCLOSING GLOBE L.

OUR STUDENTS SUCCEED.

FARMER BECOMES SUPERINTENDENT.

I think there is no better chance to advance than through the Schools. Before I enrolled I was a farmer, and knew practically nothing about electricity or steam engineering. My Courses in Electric Power and Lighting and Stationary Engineering have been a source of great benefit to me, as I now have charge of an electric-light plant, and cheerfully admit that I owe my position and salary to the Schools.

STEPHEN S. YAHNER, *Patton, Pa.*

BECAME CHIEF ENGINEER.

For some time previous to enrolling in the Schools I had been reading everything I could get pertaining to mechanical and electrical engineering, but found that I needed a better education in mathematics. When I enrolled in the Electrical Engineering Course I was second engineer of the Topeka Railway Company. About one year afterwards, I was promoted to the position of chief engineer at a much larger salary.

J. L. CHASE, *Topeka, Kansas.*

Nine Electrical Courses. Electrical Engineering, Electrical, Electric Power and Lighting, Electric Lighting, Electric Railways, Telephony, Telegraphy, Electric Mining, Wiring and Bell Work.

Electrical Instruction in charge of PROF. R. B. WILLIAMSON, Formerly professor of Electricity in Lehigh University.

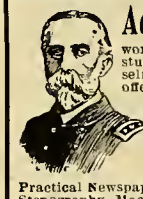
105,000 STUDENTS AND GRADUATES August, 1890. CAPITAL, $1,500,000.

$12 to $70 in Small Monthly Installments pays for a

SALARY-RAISING EDUCATION.

Write for Circulars and Local References to the

INTERNATIONAL CORRESPONDENCE SCHOOLS, BOX 1002, SCRANTON, PA.



Admiral Sampson

worked on a farm when a boy. By study at night he prepared himself for a brilliant career. We offer you greater advantages for a successful future if you study "between times," through **Education by Mail**, in Electrical, Mechanical, Steam, Mining and Civil Engineering; Metallurgy, Art, Architecture, Practical Newspaper Work, English Branches, Stenography, Machine Design and Mechanical Drawing. Low price; easy terms. The most thorough and complete course of any correspondence school in the world. Send to

POSITIVELY THE BEST.

No. 25.

We do not manufacture **cheap** apparatus, but have **spared no pains** to make our product not only **attractive in appearance,** but of the **highest degree of perfection,** electrically and mechanically, yet attained. Our efforts have met with the earnest and gratifying support of all who have given our goods a trial.

We assure you, **you will be making a mistake,** unless you examine our No. 25 Phones before placing your large orders.

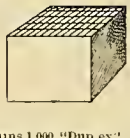
Our **Magneto Bells, Receivers, Switchboard Generators and Transmitters Lead the World.**

THE WILLIAMS ELECTRIC CO.,

CLEVELAND, OHIO.

TELEPHONE MEN AND ALL USERS OF MAGNET COILS HAVE YOUR MAGNET COILS WOUND BY MACHINERY.

HERE'S THE OBJECT LESSON— A PLAIN FACT



These 28 3+lbs. spools (91 lbs. total) of No. 36 single silk-covered wire will cost you $2.43 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm bridging-bell magnets. Your winding labor will cost you at least $5 additional, making a total cost of your own 1,000 magnets finished at factory, $8.

The above box contains 1,000 "Duplex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $2.18.70 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

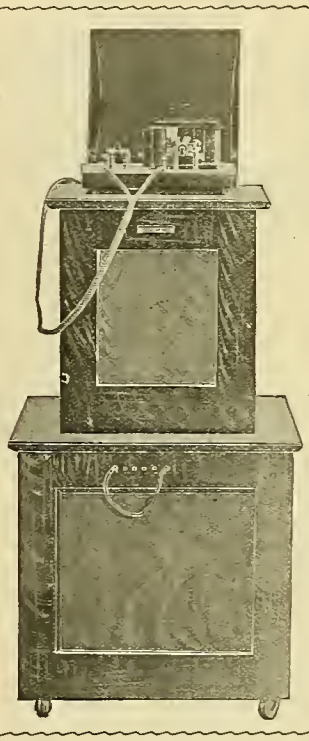
SHAFTING, GEARING, PULLEYS, PILLOW BLOCKS, GOVERNORS, ETC.

The Warner Telephone Generator Cabinet.



SIMPLE, DURABLE, EFFICIENT.

It is rapidly taking the place of the old magneto-generator outfit for ringing subscribers' bells. Is just the thing for selective signal ringing; is furnished fitted with either dry or storage batteries. One set of dry batteries is guaranteed to give 600,000 signals, allowing about five seconds to each signal. It is guaranteed to ring the heaviest loaded toll lines and to do harder work than any magneto made. It is just the thing for exchanges, both large and small. Is the cheapest and most reliable method of obtaining power for this purpose. You cannot afford to be without it. It is fully guaranteed and is sold by all responsible telephone supply houses.

THE EMERSON ELECTRIC MFG. CO., ST. LOUIS, MO.

The Best Lubricator Is the Cheapest.

Trotter's Mona Commutator Compound is the most efficient lubricator, the only article that is guaranteed to stop sparking. It is used in the largest electric power plants throughout the United States and Canada. It puts that beautiful luster on your commutator, lubricates the brushes, and keeps the surface in that condition that you have long sought to obtain. Does away with the use of sandpaper or any other material that wears out or destroys its surface. If you want your machine to run noiseless and sparkless, thus obtaining your equilibrium and quietness, you will certainly adopt its use.

"The Mona" comes in two sizes: Small, $3 00 per doz ; large, $5.00. For sale at all supply houses throughout the world. A sample will be mailed free upon application, with directions for use, by addressing

TROTTER'S MONA MFG. CO., Ltd., No. 320 Broadway,

The Lord of the Dynamos

Is sent free of charge to anyone.

This tale is a weird description of an East Indian dynamo tender in one of the great London Power Stations.

It will hold your interest from start to finish. Our catalogue of Technical Books is included in the application. Write for "THE LORD OF THE DYNAMOS."

Mathematics Simplified for Laymen.

Algebra Made Easy.

By EDWIN J. HOUSTON, Ph. D., and ARTHUR E. KENNELLY, Sc. D.

THIS new work is of great value to all students, but particularly to the students and laymen who desire to read mathematical formulæ found in so many scientific works.

Readers of Prof. Thompson's works on Dynamo-Electric Machinery and Polyphase Electric Currents will find this little book of special value, as it explains in a very comprehensive manner all of the mathematical equations and formulæ found in those works.

The work is specially designed for the beginner, and for all engineers and electricians who have not been able to avail themselves of a college education.

THE CONTENTS INCLUDE:

CHAPTER.
I.—Introduction.
II.—The Symbols Commonly Employed in Algebra, with Their Meanings.
III.—Powers and Roots.
IV.—Radicals.
V.—Logarithms.
VI.—Trigonometry.
VII.—Differential Calculus.
VIII.—Integral Calculus.

Students will find this work of valuable assistance in the study of the higher mathematics.

One Vol., 16mo, Cloth, With Diagrams, 75 cents.

We have the Largest and Most Complete Electrical

REPAIR SHOPS

In the West. ELECTRICAL REPAIRS AND MACHINE WORK OF EVERY DESCRIPTION. In having your repair work done by a company operating hundreds of dynamos and motors you are sure of good work and get the benefit of our experience.

CHICAGO EDISON COMPANY,

76 MARKET STREET, CHICAGO.

DOES

Your Electric Light or Street Railway Plant Pay Satisfactory Dividends?

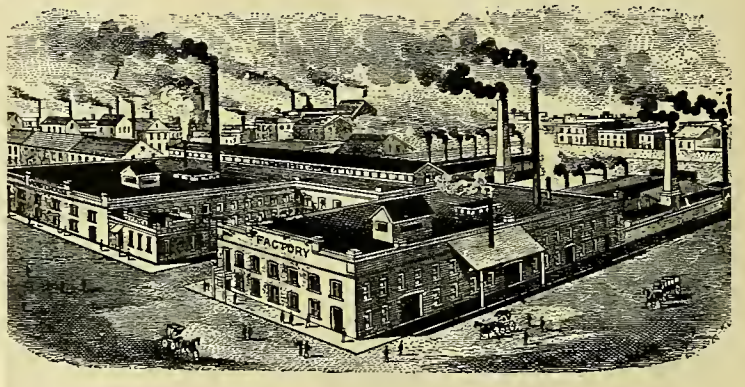
If not, why don't you remodel and put it on a paying basis? That's a specialty of our business.

HAYS CONSTRUCTION CO.,

CONSULTING ENGINEERS,

TROY, OHIO.

PHOENIX



We Are Still Doing Business

at the old stand, and desire to announce to the trade that we are running full time and manufacturing and selling everything in the battery and specialty line.

We have discontinued the manufacture of electric light carbons and street railway motor brushes of every description.

Our products ARE THE BEST.

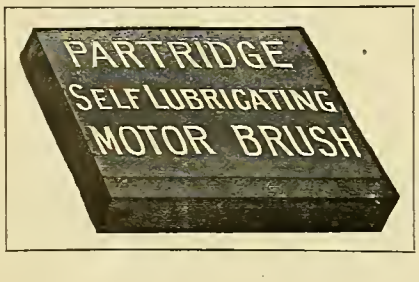
Our facilities are UNSURPASSED.

We are in a position to MAKE PRICES to meet the requirements of the times or COMPETITION of the World.

Our stock is complete, and we solicit your business.

PHOENIX BATTERY MFG. CO.,

ST. LOUIS, MO.



GOOD BRUSHES ARE CHEAPER THAN COMMUTATORS.

USE

"PARTRIDGE"

AND SAVE MONEY.

PARTRIDGE CARBON WORKS,

SANDUSKY, OHIO.

Wagner Transformers

TYPE F

ARE ADAPTED FOR

Central Station Use.

Efficient,
Compact,
Best Mechanical
Workmanship.

Central Electric Company,

264-270 FIFTH AVENUE, CHICAGO.

DEKONITE
IT NEVER DISAPPOINTS

Federal Batteries

Using... **Federal Salt**

ARE STRONGER THAN ANY

Salammoniac Cell...In the World.

Initial Voltage 1.6 to 1.8.

FEDERAL SALT

USED IN

Carbon Cylinder Batteries

GIVES

33% MORE E. M. F.
AND 33% LONGER LIFE
THAN SALAMMONIAC.

Absolutely no crystalizing Salts.

ESPECIALLY ADAPTED

TELEPHONES, HOUSE BELLS,
RAILROAD SIGNALS AND ALL
HARD OPEN-CIRCUIT WORK.

MADE BY

FEDERAL BATTERY COMPANY,

11 PINE STREET,

ALL DEALERS. NEW YORK.

CATALOGUE No. 11 NOW READY, 352 PAGES.

MANHATTAN ELECTRICAL SUPPLY CO.

32 Cortlandt Street, NEW YORK.

1,000,000 sold during the past twelve months.

Mesco Dry Battery.

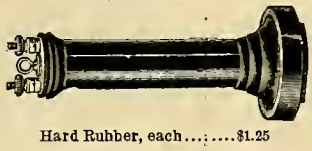
Acknowledged the Best Dry Cell Manufactured.

Price each, 40c.

Standard size, 2¼x6½

We make all sizes.

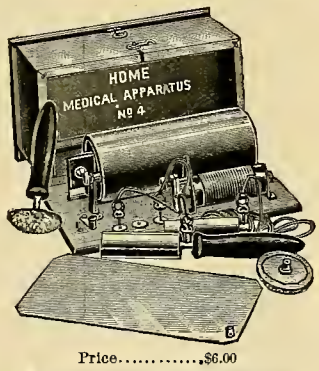
Telephone Receivers.



Hard Rubber, each.....$1.25

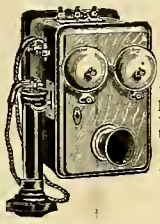
Battery Zincs.

We have purchased the plant of the Carr Metal Company and can furnish the Carr composite zincs in all forms and quality heretofore supplied by that company.



Price.....$6.00

We make a number of different styles.

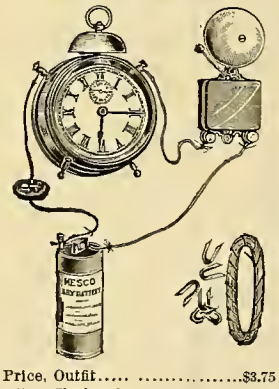


Telephone Outfit, No. 14,

With our high-grade carbon transmitter, which will be sent on approval to responsible parties.

Price, with two cells Mesco Dry Battery, $9.00.

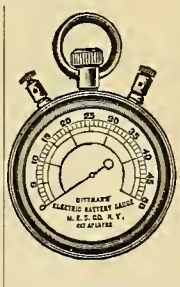
Alarm Clock Outfit, No. 1½.



Price, Outfit.....$3.75
" Clock only..... 2 25

Pony Telephone Receiver.

Retail price, 90 cents.



Dittmar Pocket Battery Gauge.

Will register the strength of open or closed circuit batteries.

Price each, $3.50.

Desk Telephone Outfit, No. 11.

Price.....$9.00

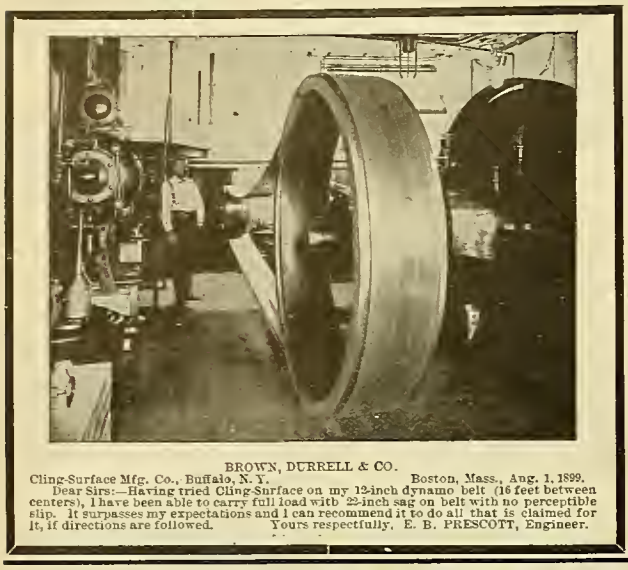
We make a dozen different Telephone Outfits.

Iron Box Bells, No. 97.

2½, 3, 3½ and 4 inch. Special prices

OUR PRICES given above do not fairly represent quotations to the trade or to parties ordering quantities.
WE MANUFACTURE a large percentage of the goods found in our catalogue.

MANHATTAN ELECTRICAL SUPPLY CO., 32 CORTLANDT STREET, NEW YORK.



BROWN, DURRELL & CO.

Cling-Surface Mfg. Co., Buffalo, N. Y. Boston, Mass., Aug. 1, 1899.

Dear Sirs:—Having tried Cling-Surface on my 12-inch dynamo belt (16 feet between centers), I have been able to carry full load with 22-inch sag on belt with no perceptible slip. It surpasses my expectations and I can recommend it to do all that is claimed for it, if directions are followed. Yours respectfully, E. B. PRESCOTT, Engineer.

AN EASY BELT

MADE POSSIBLE BY

CLING-SURFACE

Means a saving of time, money, belt and bearings, to say nothing of the engineer's comfort.

There is no better belt preservative known than Cling-Surface.

We have something to say.
Write Us.

THE GENERAL ELECTRIC COMPANY'S

SERIES ALTERNATING SYSTEM

50-Light Constant Current Transformer, Complete.

of

Enclosed Arc Lighting

Has been adopted during the past year by

60 Central Stations

aggregating

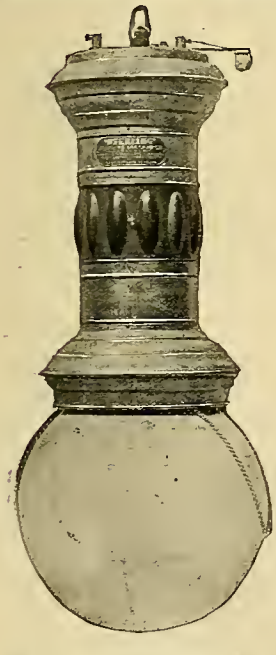
5,500-Light Capacity.

Series Alternating Lamp.

THE GENERAL ELECTRIC COMPANY,

Main Office: SCHENECTADY, N. Y.

BY EVERY TEST THE BEST.



Constant Potential, 3 to 5 Amperes.

Constant Current Series, 5 to 7 Amperes.

Alternating Current, 3½ and 6 Amperes.

Series Alternating Current.

WRITE FOR NEW CATALOGUE.

A few good territories open for live agents.

STERLING ARC LAMP CO.,

214-222 West 26th St., NEW YORK.

Western Office: GATES & RANDOLPH, 13 Monadnock Block, Chicago, Ill.

Petite Alternating Enclosed Long-Burning Arc Lamp.

Adapted for great variations in voltage and frequency. Ordinary changes in voltage and frequency do not produce flickering or unsteadiness of the arc. Standard adjustment 104 volts; with this adjustment the lamps will burn steadily under variations from 90 to 115 volts.

Reasonable cost.
High efficiency.
No framework in sight.
Shade reflects upward rays downward.
For indoor and outdoor use.
Easily trimmed.

PLAIN WEATHERPROOF LAMP, WITH INNER ENCLOSING GLOBE L AND OUTER ENCLOSING GLOBE S.

PARIS, 46 Avenue de Breteuil.

THE SEAL OF APPROVAL

Has been placed on the use of Automobiles by the high social factors of the country and another year no member of elite society will be up-to-date or strictly correct in every respect in his equipage unless he is the possessor of one or more Automobiles. Anticipating this, the **Woods Motor Vehicle Company** have developed and perfected beyond all further experiment under the Woods system of electrical propulsion correct styles for the coming year in over thirty different forms of vehicles, including Buggies, Traps, Brakes, Broughams, Victorias and Cabs, all of which are so simple in their operation and care that the same servants now employed can be retained, and in the lighter vehicles for ladies' and gentlemen's driving an hour's time is sufficient to learn their every manipulation.

Cost to run per mile, ½ cent. STANHOPE. Price, $2,000.00 net.

STANDARD OF THE WORLD.

Weight, 1,800 Pounds.

Mileage capacity, one charge, 35 miles.

Speed per hour, 12 miles.

The Stanhope illustrated here fills in every particular the requirements of the fastidious carriage user, as it has every feature of refinement in design and style which constitutes a carriage and not a mere machine, and one of the greatest delights in store for ladies is the usage of this character of vehicle. We strongly recommend the placing of orders early this fall and winter for spring delivery in order to insure no delay in getting such vehicles for a full season's use next year. Send for book of magnificent illustrations in latest styles of Automobiles.

THE BELDEN-LARWILL ELECTRIC & MFG. CO.,

FORT WAYNE, IND., U. S. A.

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.
13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.
28. Metallic Circuit.
29. Underground Wires.
30. Lightning Arresters.
31. Inside Wiring.
32. Installation of Telephone Instruments.
33. Inspection and Maintenance.
34. The Condenser; Its Use in Telephony.
35. Electromagnetic Retardation.
36. Exchange Working.
37. Small Exchanges.
38. Party Lines: The Bridging Bell.
39. Long Distance Telephony.
40. Duplex Telephony.
41. Simultaneous Telegraphy and Telephony.
42. Recent Progress. Appendix.

A new T.-H. Arc Lamp is hard to beat, and you CAN'T beat it if you fit it up with the **Knutson Gravity Clutch.**

YOUR OLD T.-H. ARC LAMPS

Will be good as new if you fix them up RIGHT, and BETTER if you take out old-style clutches and fit them up with the

Knutson Gravity Clutch,

The only clutch ever made that can be put in a lamp without taking rods out. We can FIX your T.-H. Lamps and make them better than they ever were.

We wish also to call the attention of arc lamp users to our one-piece upper and lower carbon holders for ½-inch and ⅝-inch carbons.

Write Us for Prices and Particulars.

THE STERLING VARNISH COMPANY, 325 Water St., Pittsburg, Pa.

The Best Lubricator Is the Cheapest.

Trotter's Mona Commutator Compound is the most efficient lubricator, the only article that is guaranteed to stop sparking. It is used in the largest electric power plants throughout the United States and Canada. It puts that beautiful luster on your commutator, lubricates the brushes, and keeps the surface in that condition that you have long sought to obtain. Does away with the use of sandpaper or any other material that wears out or destroys its surface. If you want your machine to run noiseless and sparkless, thus obtaining your equilibrium and quietness, you will certainly adopt its use.

"The Mona" comes in two sizes: Small, $3.00 per doz; large, $5.00. For sale at all supply houses throughout the world. A sample will be mailed free upon application, with directions for use, by addressing

THE BEST ANSWER TO A QUESTION
On Wiring, can be found in the New Book,
"WIRING TABLES,"
"How They are Made and How to Use Them."
BY THOS. C. GRIER.

Whenever you are asked a question on Wiring, refer the questioner to this book, and he will find what he desires.

THE BOOK CONTAINS: The Law of Resistance, Electromotive Force and Current Fully Explained. How to Calculate the Size of Wires. The Different Methods of Wiring, with Diagrams. How to Apply the Simple Formula, in Calculating the Size of Wires Under all Conditions. Diagrams for Wiring 3 Point, 4 Point, Head Light and Heat Regulating Switches.
27 TABLES ON WIRING AND VALUABLE DATA.

Ohm's law is described in such plain and simple language that one cannot fail to clearly understand it.

Bound in Cloth, 80 Pages, Size 5x7½ in. Sent, prepaid, on receipt of price, $1.00.

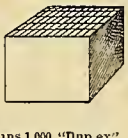
TELEPHONE MEN AND ALL USERS OF MAGNET COILS HAVE YOUR MAGNET COILS

WOUND BY MACHINERY.

HERE'S THE OBJECT LESSON— A PLAIN FACT



These 28 3+lbs. spools (91 lbs. total) of No. 36 single silk-covered wire will cost you $243 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm bridging-bell magnets. Your winding labor will cost you at least $5 additional, making a total cost of your own 1,000 magnets finished at factory, $248.

The above box contains 1,000 "Dap ex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $218.70 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

The Lord of the Dynamos

Is sent free of charge to anyone.

This tale is a weird description of an East Indian dynamo tender in one of the great London Power Stations.

It will hold your interest from start to finish. Our catalogue of Technical Books is included in the application. Write for "THE LORD OF THE DYNAMOS."

65TH THOUSAND NOW READY,
Of which 25,000 were sold in Europe.

A B C of Electricity.

By WILLIAM H. MEADOWCROFT.
Endorsed by THOS. A. EDISON.

THIS excellent primary book has taken the first place in elementary scientific works. It has received the endorsement of Thomas A. Edison. It is for every person desiring a knowledge of electricity, and is written in simple style so that a child can understand the work. It is what its title indicates, the first flight of steps in electricity.

WHAT THE PRESS SAYS:

"A clear and comprehensive little treatise."—*N. Y. Sun.*

"Electric science is making magnificent strides and this book fills a useful office in setting forth the features and characters of these advances."—*Brooklyn Times.*

"The need of such a book has undoubtedly been felt by many . . . we predict for it a splendid sale."—*The Age of Steel.*

"A book like this should be largely read."—*N. Y. Herald.*

"The book is well illustrated, and no pains have been spared to make it accurate and reliable throughout."—*Electrical Review.*

"In simple language the author lays bare the secrets of electrical science and application."—*Electrical World.*

"A vast amount of useful information."—*Washington Post.*

FROM THE LABORATORY OF THOS. A. EDISON, ORANGE, N. J.

MR. W. H. MEADOWCROFT, New York City.

DEAR SIR:—I have read your MS. of the "A BC of Electricity" and find that the statements you have made therein are correct. Your treatment of the subject and arrangement of the matter have impressed me favorably.

Yours truly,
THOS. A. EDISON.

ELECTRICITY FOR ENGINEERS.

Latest Edition, Now Published in One Complete Volume, 424 Pages, Profusely Illustrated. Just the Work for Engineers, Electricians, Dynamo Tenders, etc.

PART I. CONTENTS.—CHAPTER I: Electricity; Positive and Negative; Conductors, Non-Conductors and Insulators; Electro-Motive Force; Volts; Resistance; Ohms; Current; Amperes.—CHAPTER II: Dynamos; Magnets; Field Coils; Electro Magnets; Permanent Magnets.—CHAPTER III: Armatures, Construction of, Different Kinds of; Commutators, How Made and Connected; Heating of Armatures; Eddy Currents.—CHAPTER IV: The Current; How Produced; Induction; Series Wound Dynamos; Shunt Wound Dynamos; Exciting the Fields; Constaot Current and Constant Potential Dynamos; Series and Parallel; Parallel or Multiple Arc System.—CHAPTER V: Incandescent Lamps; Filaments; Connections; Flashing; Exhausting; Testing; Candle Power; Operated in Series; Automatic Cut-Out; In Multiple Arc or Parallel; Multiple Series; Multiple Series Cut-Out; Three Wire System.—CHAPTER VI: The Arc Light; How Formed; Causes of Unsteadiness; Remedy; Effect of Shades or Globes; Shape of Carbons Under Different Conditions of Burning; Arc Lamps; Regulating and Cut-Out Mechanism; Action of Current; Clutch Lamps; Clockwork Lamps; Double Lamps; Troubles in Lamps.—CHAPTER VII: Commutators and Brushes; The Brush Commutators; Brushes; Different Styles of Brushes; Double Brushes; Single Brushes; Troubles with Commutators and Brushes; Correct Position of Brushes; Sparking at Brushes; Care of Brushes and Commutators; Flashing.—CHAPTER VIII: Current Regulation; Hand Regulation; By Position of Brushes; Resistance Box; Resistance Coils.—CHAPTER IX: American System of Automatic Current Regulation; The Dynamo; Regulator; Action of Regulator. CHAPTER X: Brush System of Automatic Current Regulation; Brush Armature; Diagram of Circuits through Dynamo, Regulator and Lamps; Dial or Regulator; Care and Adjustment of Dial; Dial Controller; Circuits and Connections of No. 8 Brush Dynamo; Circuits of Compound Wound Constant Potential Brush Dynamo.—CHAPTER XI: The Edison System; Automatic Regulator; Circuits of Regulator: Circuits of Dynamo; Action of Regulator; Howell Pressure Indicator; Diagram of Circuits; Description of Parts and Operation.—CHAPTER XII: Excelsior System of Automatic Current Regulation; Dynamo; Armature; Diagram of Circuits; The Regulator and Motor; Action of Regulator.—CHAPTER XIII: Schuyler System of Automatic Current Regulation; Dynamo; Armature, Commutator and Brushes; Diagram of Circuits in Armature and Field; Regulator; Circuits in Regulator.—CHAPTER XIV: Thomson-Houston System of Automatic Current Regulation; Dynamo; Armature; Commutator and Brushes; Controlling Magnet; Wall Controller; Diagram of Circuits; Air Blast.—CHAPTER XV: Waterhouse System of Three-Brush Automatic Current Regulation; Dynamo; Extra Brush; Resistance Coils and Regulator. CHAPTER XVI: Ampere Meters; Tangential Scale; Solenoid Meters.—CHAPTER XVII: Voltmeters; Pressure and Potential Indicators.—CHAPTER XVIII: Testing; Galvanometers; Astatic Needle; Differential Apparatus.—CHAPTER XIX: Wheatstone Bridge or Electrical Balance; Diagram of Circuits and Methods of use; Bridge and Rheostat; Round Form; Square Form.—CHAPTER XX: The Magneto as a Testing Instrument; Armature; Field; Bell; Diagram of Circuits.—CHAPTER XXI: Coupling Dynamos Together; In Series; In Shunt; Series, Shunt and Compound Wound Machines.—CHAPTER XXII: Switches and Switchboards; Loop Switch; Plug and Socket; Change Over Plug and Socket; Conclusion. CHAPTER XXXIII: Electric Motors; General Principles the Same as in Dynamos; Types; Shunt and Series Motors Suitable for all General Purposes; Regulation of Shunt Motors; Of Series Motors; Counter E. M. F.; Direction of Rotation and Direction of Current; Starting Motors; Diagram of Connection.

PART II. CONTENTS.—CHAPTER I: Alternate Current Dynamos; Principles of the Field; Field Current Armature; Winding; Connections; Lamination; Different Types of Alternators; Regulation; Leading Systems; The Brush Generators; Magnets; Armature; Principles of Induction.—CHAPTER II: Dynamos, Continued; The Mordey Alternator; Stationary Armatures; Field Magnets; Ferranti Armature; Field Magnets; Winding; Collectors.—CHAPTER III: Dynamos Concluded; Siemens Dynamo; Best Magnetic Circuits; Stanley Constant Current Dynamo; The Armature; Self Induction; Regulation.—CHAPTER IV: Induction Coils; Converters; Transformers; Economy of Distribution; An Electrical H. P.; Losses in Conductor; Induction Coils; Effect of Induction; Transformers.—CHAPTER V: Transformers Continued; Induction Coils; Converters; Transforming Up and Down; Design of Transformers; The Static Charge; Protection Against; Grounding the Secondary; Other Devices; The Foil Protector; Different Types of Transformers.—CHAPTER VI: Transformers, Concluded; Fuses; Regulation; Winding of Transformers; Connecting to Circuit; Regulation; Safety Fuses.—CHAPTER VII: Parallel System; Series Arc Light System; Diagram of Circuits; Parallel System; Primary Circuit; Secondary Circuit; Placing of Transformers; Fuses; Diagram of Series Arc Light Circuit.—CHAPTER VIII: Lines of Force; Hysteresis; Magnetic Penetration; The Circuit of Lines of Force; Experiments with Magnet; Rapidity of Reversals and Hysteresis.—CHAPTER IX: Arc Lamps; In Series; The Westinghouse Arc Lamp; Diagram of Circuits in Lamp; Action of the Mechanism; Flat Carbons.—CHAPTER X; Arc Lamps, in Multiple; Slattery Differential Lamp; Mechanism of Lamp; Its Operation.—CHAPTER XI: Measuring and Indicating Apparatus; Instruments for Use with Alternating Currents Differ from those used with Continuous Currents; Ammeters; Voltmeters; Description of Several Forms of Instruments.—CHAPTER XII: Measuring Instruments, Continued; Hot Wire Instruments; The Cardew Voltmeter; Details of the Instrument; Low Potential Voltmeter.—CHAPTER XIII: Voltmeters; Double Coil Voltmeter; Two Types.—CHAPTER XIV: Spring Meters; Curled Spring Meter.—CHAPTER XV: Twisted Strip Instruments; Diagram of Connections and Operation of Instrument.—CHAPTER XVI: Recording Meters; Stanley Meter; Construction and Principles of Operation; Diagrams of Parts; Slattery Induction Meter; Description of Parts and Principles of Operation; Watt Meter; Thomson Meter.—CHAPTER XVII: Generators in Parallel; Difficulties in Operating; Alternate Current Generators in Parallel; Arrangements of Circuits and Machines for Operating in Parallel; Diagram of Common Arrangement of Machines and Circuits.—CHAPTER XVIII: Ohm's Law; Strength of Current; Formulas and Examples; Power and Heating Effects of Currents.—CHAPTER XIX: Ground Alarms and Leak Detectors.

THE GENERAL ELECTRIC COMPANY'S

SERIES ALTERNATING SYSTEM

50-Light Constant Current Transformer, Complete.

of

Enclosed Arc Lighting

Has been adopted during the past year by

60 Central Stations

aggregating

5,500-Light Capacity.

Series Alternating Lamp.

THE GENERAL ELECTRIC COMPANY,

Main Office: SCHENECTADY, N. Y.

THE

Light in weight.
Easily trimmed.
Easy access to working parts.

BELDEN

Absence of complicated mechanism, so common in other makes.

ARC

Burns long and absolutely without flickering.
Has many other good points.

LAMP

Our Booklet will explain.
See illustrated article in Western Electrician, Issue Oct. 28.

—THE—

BELDEN-LARWILL

Electric & Mfg. Co.,

FT. WAYNE, IND., U. S. A.

Petite Alternating Enclosed Long-Burning Arc Lamp.

Adapted for great variations in voltage and frequency. Ordinary changes in voltage and frequency do not produce flickering or unsteadiness of the arc. Standard adjustment 104 volts; with this adjustment the lamps will burn steadily under variations from 90 to 115 volts.

Reasonable cost.
High efficiency.
No framework in sight.
Shade reflects upward rays downward.
For indoor and outdoor use.
26 inches long.
Easily trimmed.

ORNAMENTAL PETITE ARC LAMP FOR INDOOR USE, WITH M SHADE AND STANDARD GLOBE L.

TO LOS ANGELES AND SOUTHERN CALIFORNIA.

Every Friday night, at 10:35 p. m., a through Tourist Car for Los Angeles and Southern California leaves the Chicago, Milwaukee & St. Paul Railway Union Passenger Station, Chicago, via Omaha, Colorado Springs and Salt Lake City, for all points in Colorado, Utah, Nevada and California.

In addition to the regular Pullman porter, each car is accompanied by an intelligent, competent and courteous "courier," who will attend to the wants of passengers en route. This is an entirely new feature of tourist-car service, and will be appreciated by families or by ladies traveling alone. Particular attention is paid to the care of children, who usually get weary on a long journey.

These tourist cars are sleeping cars supplied with all the accessories necessary to make the journey comfortable and pleasant, and the berth rate (each berth will accommodate two persons) is only $6 from Chicago to California. Ask the nearest ticket agent for a tourist-car folder, or address Geo. H. Heafford, General Passenger and Ticket Agent, Chicago, Ill.

OUR STUDENTS SUCCEED.

FARMER BECOMES SUPERINTENDENT.

I think there is no better chance to advance than through the Schools. Before I enrolled I was a farmer, and knew practically nothing about electricity or steam engineering. My Courses in Electric Power and Lighting and Stationary Engineering have been a source of great benefit to me, as I now have charge of an electric-light plant, and cheerfully admit that I owe my position and salary to the Schools.
STEPHEN S. YAHNER, *Patton, Pa.*

BECAME CHIEF ENGINEER.

For some time previous to enrolling in the Schools I had been reading everything I could get pertaining to mechanical and electrical engineering, but found that I needed a better education in mathematics. When I enrolled in the Electrical Engineering Course I was second engineer of the Topeka Railway Company. About one year afterwards, I was promoted to the position of chief engineer at a much larger salary.
J. L. CHASE, *Topeka, Kansas.*

Nine Electrical Courses. Electrical Engineering, Electrical, Electric Power and Lighting, Electric Lighting, Electric Railways, Telephony, Telegrophy, Electric Mining, Wiring and Bell Work.
Electrical Instruction in charge of PROF. R. B. WILLIAMSON,
Formerly professor of Electricity in Lehigh University.
105,000 STUDENTS AND GRADUATES August, 1899. CAPITAL, $1,500,000.
$12 to $70 in Small Monthly Installments pays for a
SALARY-RAISING EDUCATION.

To the Unconverted!

IN our efforts to secure your business we have often longed for that gift of prophecy which seems so easily acquired by many of our Telephone friends, that we might be able to give you the exact dates when all competitors would be wiped off from the face of the earth. Failing in this accomplishment, we have sighed for that spirit of poetry which would enable us to melt your icy heart and cause you to sweat blood as a penalty for not using the W. & C. Bi-polar Receiver and our complete Telephone Equipment. But we have no such ability. Our only salvation seems to be in making the best telephone apparatus on earth, and some day you will find it out.

COUCH & SEELEY CO.,

212 SUMMER STREET, - BOSTON, MASS.

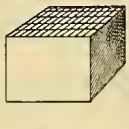
Jackson Blvd., Cor. Canal,
CHICAGO.

TELEPHONE MEN AND ALL USERS OF MAGNET COILS HAVE YOUR MAGNET COILS WOUND BY MACHINERY.

HERE'S THE OBJECT LESSON— A PLAIN FACT



These 28 3+lbs. spools (91 lbs. total) of No. 36 single silk-covered wire will cost you $243 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm bridging-bell magnets. Your winding labor will cost you at least $5 additional, making a total cost of your own 1,000 magnets finished at factory, $248.

The above box contains 1,000 "Dup ex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $218.70 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

The Best Lubricator Is the Cheapest.

Trotter's Mona Commutator Compound is the most efficient lubricator, the only article that is guaranteed to stop sparking. It is used in the largest electric power plants throughout the United States and Canada. It puts that beautiful luster on your commutator, lubricates the brushes, and keeps the surface in that condition that you have long sought to obtain. Does away with the use of sandpaper or any other material that wears out or destroys its surface. If you want your machine to run noiseless and sparkless, thus obtaining your equilibrium and quietness, you will certainly adopt its use.
"The Mona" comes in two sizes: Small, $3 00 per doz ; large, $5.00. For sale at all supply houses throughout the world. A sample will be mailed free upon application, with directions for use, by addressing

WESTON Electrical Instrument Co.,

114-120 William St., NEWARK, N. J., U. S. A.

Illuminated Dial Station Instruments.

These instruments are based upon the same general principle and are just as accurate as our regular Standard Portable Direct Current Voltmeters and Ammeters, but are much larger, and the working parts are inclosed in a neatly designed, dust-proof cast-iron case which effectively shields the instruments from disturbing influences of external magnetic fields.

Weston Standard Illuminated Dial Station Ammeter, Style B.

Weston Standard

Portable Direct Reading Voltmeters and Millivoltmeters. Ammeters and Milammeters, Wattmeters and Voltmeters, for Alternating and Direct Current Circuits.

Our portable instruments are recognized as standards throughout the civilized world.

Our Semi-Portable Laboratory Standard Voltmeters and Ammeters are still better.

They are the most reliable, absolute standards for Laboratory use.

Mention the WESTERN ELECTRICIAN when writing for catalogues.

THE BEST—THE "NEW STYLE" Receptacle and Attachment Plug.

The latest in this line is the "NEW STYLE" made by

WM. T. PRINGLE, 1026 Filbert Street, PHILADELPHIA.

BROWN, DURRELL & CO.

Cling-Surface Mfg. Co., Buffalo, N. Y. Boston, Mass., Aug. 1, 1899.

Dear Sirs:—Having tried Cling-Surface on my 12-inch dynamo belt (16 feet between centers), I have been able to carry full load with 22-inch sag on belt with no perceptible slip. It surpasses my expectations and I can recommend it to do all that is claimed for it, if directions are followed. Yours respectfully, E. B. PRESCOTT, Engineer.

AN EASY BELT MADE POSSIBLE BY

CLING-SURFACE

Means a saving of time, money, belt and bearings, to say nothing of the engineer's comfort.

There is no better belt preservative known than Cling-Surface.

We have something to say. Write Us.

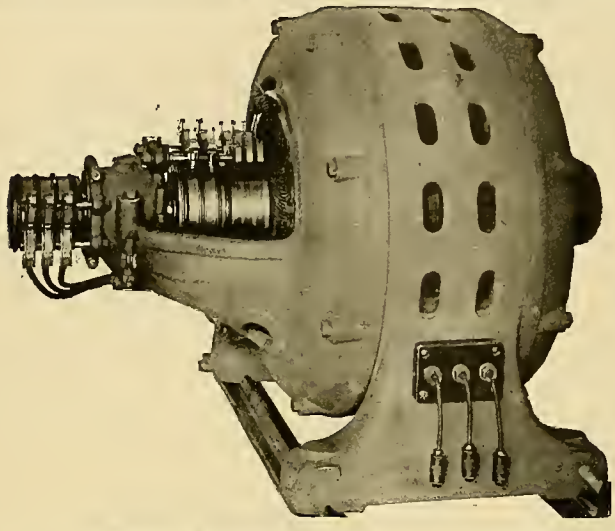
THE GENERAL ELECTRIC COMPANY'S
NEW TYPE OF ALTERNATOR.



75 K. W. G. E. Compensated Revolving Field Combined Alternator and Direct-coupled Exciter.

Without change of adjustment this type of alternator gives accurate automatic voltage regulation when loaded with lights, with motors or with a combination of the two, while the compounding of all other alternators requires special adjusting for similar loads. **WRITE FOR BULLETIN 4206.**

Main Office: SCHENECTADY. **Sales Offices in all Large Cities.**

"FEDERAL SALT"
PATENTED.

Packed in boxes only.

FOR ALL OPEN-CIRCUIT BATTERIES
GIVES
33% More Current
AND
33% Longer Life
THAN
Sal Ammoniac.

Absolutely No Crystallizing Salts.

"FEDERALITE"
PATENTED.

SOLD IN BULK,

Gives More Current, Lasts Longer and is Cheaper than Sal Ammoniac.

THE SEAL OF APPROVAL

Has been placed on the use of Automobiles by the high social factors of the country and another year no member of elite society will be up-to-date or strictly correct in every respect in his equipage unless he is the possessor of one or more Automobiles. Anticipating this, the **Woods Motor Vehicle Company** have developed and perfected beyond all further experiment under the Woods system of electrical propulsion correct styles for the coming year in over thirty different forms of vehicles, including Buggies, Traps, Brakes, Broughams, Victorias and Cabs, all of which are so simple in their operation and care that the same servants now employed can be retained, and in the lighter vehicles for ladies' and gentlemen's driving an hour's time is sufficient to learn their every manipulation.

Cost to run per mile, ½ cent. STANHOPE. Price, $2,000.00 net.

STANDARD OF THE WORLD.

Weight, 1,800 Pounds.

Mileage capacity, one charge, 35 miles.

Speed per hour, 12 miles.

The Stanhope illustrated here fills in every particular the requirements of the fastidious carriage user, as it has every feature of refinement in design and style which constitutes a carriage and not a mere machine, and one of the greatest delights in store for ladies is the usage of this character of vehicle. We strongly recommend the placing of orders early this fall and winter for spring delivery in order to insure no delay in getting such vehicles for a full season's use next year. Send for book of magnificent illustrations in latest styles of Automobiles.

LAMP USERS

Do you want a Lamp

That will burn a minimum of 150 hours with a single 12x½ inch carbon—

That contains a clutch which will release itself without striking a trip post of any kind, a feature other manufacturers have long sought—

That throws absolutely no shadow—

That needs no alignment—

That is Ball Bearing?

THE

BELDEN LAMP

Has the above special features and many others which it will pay you to investigate if you are in the market for lamps.

Let us send you full particulars of this money maker.

CAN I BECOME AN ELECTRICIAN?

Yes, you can. We teach ELECTRICAL ENGINEERING at your home BY MAIL at a cost within the reach of anyone. No matter where you live, if you can read and write, we guarantee to teach you thoroughly. Our institute is endorsed by THOMAS A. EDISON and other prominent men of the country. We teach also MECHANICAL ENGINEERING, MECHANICAL DRAWING, MACHINE DESIGN, TELEGRAPHY, TELEPHONY, ELECTRIC RAILWAYS, ELECTRO-THERAPEUTICS, ELECTRIC MINING, etc., by mail. Write for our free illustrated book (120 pages). State subject you wish to study. The Electrical Engineer Institute of Correspondence Instruction,

I consider the Electrical Engineer Institute conducted by Messrs Wright and Martin to be of great value to those who desire an Electrical education.

SCRAP PLATINUM WANTED

We are in the market to buy any quantity of SCRAP PLATINUM from Incandescent Lamp Bases, for which we pay the highest cash prices. We are also in the market at all times to buy any quantity of **BURNT-OUT INCANDESCENT LAMP BASES.** We extract the Platinum, for which we allow the full market value, less the cost of extracting. We are also large buyers of SCRAP COPPER WIRE, BRASS, Etc., from electric-light and street-railway plants.

We supply the electrical trade with our "high grade" BABBITT METALS, BAR, SOLDER, WIRE SOLDER and COTTON WASTE. If in want of anything in our line, it will pay you to communicate with us before placing your orders elsewhere.

THE POLYGLOT CO., - 120 LIBERTY ST., NEW YORK.

The Best Lubricator Is the Cheapest.

Trotter's Mona Commutator Compound is the most efficient lubricator, the only article that is guaranteed to stop sparking. It is used in the largest electric power plants throughout the United States and Canada. It puts that beautiful luster on your commutator, lubricates the brushes, and keeps the surface in that condition that you have long sought to obtain. Does away with the use of sandpaper or any other material that wears out or destroys its surface. If you want your machine to run noiseless and sparkless, thus obtaining your equilibrium and quietness, you will certainly adopt its use.

"The Mona" comes in two sizes: Small, $3 00 per doz; large, $5.00. For sale at all supply houses throughout the world. A sample will be mailed free upon application, with directions for use, by addressing

TROTTER'S MONA MFG. CO., Ltd., No. 320 Broadway,
Or Messrs. Goldmark & Wallace, 121 Worth St., New York.
Satisfaction Guaranteed or Money Refunded. Telephone Call, 1962 Franklin.

STREET RAILWAY MEN

—And others engaged in electric railway work will be interested in

THE MOTOR ENGINEERS' AND ELECTRICAL WORKERS' HAND-BOOK.

By WM. LIVTERN.

The Motor Engineers' and Electrical Workers' Hand-Book is compiled with a view of furnishing a book of reference in a simple and convenient form for the use of motor engineers and street railway men. The diagrams of controller connections and combinations will be found of great value in practical work. The methods of testing are both simple and reliable. The writer is indebted to the Westinghouse, General Electric, Walker and Steel Motor companies for information cheerfully furnished.

TABLE OF CONTENTS.

Chapter I.—Elementary Principles. Units, Ohm's Law, Watt, Kilowatt, Ampere, Turn, Hour, etc. Potential, E. M. F., Voltage, Drop of Potential, Resistance (Ohmic), Conductivity. **Chapter II.**—Magnetism and Electro-Magnetic Induction. **Chapter III.**—Circuits: Varieties of Circuits, Series, Shunt, Parallel or Multiple Arc, Joint Resistances of Parallel Circuits, Multiple Series, Series Multiple. **Chapter IV.** Dynamo Electric Machine. General Principles, Field Windings, (Varieties), Series, Shunt, Compound, etc. Short Shunt, Long Shunt. **Chapter V.**—Instructions for Operating Generators: Running a Single Generator, To Shut Down a Machine Not Run in Multiple, Sparking, Polarity, Excitation Grounds, Generators in Multiple, Connections, Running Generators in Multiple. To Shut Down a Machine Running in Multiple. **Chapter VI.**—The Electric Motor: General Principles, Counter Electromotive Force and Mechanical Power, Efficiency. **Chapter VII.**—Measurements and Tests of Street Railway Motors—Faults, Measurement by Drop of Potential Method (Examples), Insulation Tests, Voltmeter Method, Description of Voltmeter and Ammeter, The Wheatstone Bridge, Instructions for Operating, Drop of Potential in Motor Circuits. **Chapter VIII.**—Instructions for Operating Car Apparatus: Brushes, Sparking at Brushes, Bearings, Bucking, Fuse, Block, Operating Car, Trolley, etc. **Chapter IX.**—The Electric Motor Car in Detail: Series, Parallel, Controller, Reverse Switch, Rheostat, Fuse Box, Lightning Arrester, Heaters. **Chapter X.**—Definitions of Terms. **Chapter XI.**—Diagrams of Car Wiring and Controllers, with Written Descriptions and Diagrams of Combinations: Westinghouse System (G. No. 14, No. 28 and 28 A). General Electric (K. with W. P. Machines, K 2; General Electric Series Parallel Controller with Magnetic Brake). Walker System (B2, E) Steel Motor Co. System. **Chapter XII.**—General Electrical and Mechanical Information. Belting, Shafting, Pulleys and Gears, Melting Point, Specific Gravity and Relative Conductivity, Table Comparing Wire Gauges, Number, Dimensions, Height, Length and Resistance of Pure Copper Wire, Electrical Units and Formulas, Equivalent Carrying Capacity, Proportions of Gear Teeth Notes, Bill of Material for Span Wire Construction (Single Track) (Double Track), Bracket Construction, (Single Track) (Center Pole) (Double Track).

160 pages. Handsomely bound in cloth, $1.00. Sent on receipt of price.

ELECTRICIAN PUBLISHING CO., 510 MARQUETTE BLDG., CHICAGO.

MACHINERY AND SUPPLIES IN GENERAL.

TO LOS ANGELES AND SOUTHERN CALIFORNIA.

Every Friday night, at 10:35 p. m., a through Tourist Car for Los Angeles and Southern California leaves the Chicago, Milwaukee & St. Paul Railway Union Passenger Station, Chicago, via Omaha, Colorado Springs and Salt Lake City, for all points in Colorado, Utah, Nevada and California.

In addition to the regular Pullman porter, each car is accompanied by an intelligent, competent and courteous "courier," who will attend to the wants of passengers en route. This is an entirely new feature of tourist-car service, and will be appreciated by families or by ladies traveling alone. Particular attention is paid to the care of children, who usually get weary on a long journey.

These tourist cars are sleeping cars supplied with all the accessories necessary to make the journey comfortable and pleasant, and the berth rate (each berth will accommodate two persons) is only $6 from Chicago to California. Ask the nearest ticket agent for a tourist-car folder, or address Geo. H. Heafford, General Passenger and Ticket Agent, Chicago, Ill.

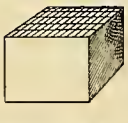
TELEPHONE MEN AND ALL USERS OF MAGNET COILS HAVE YOUR MAGNET COILS **WOUND BY MACHINERY.**

HERE'S THE OBJECT LESSON— A PLAIN FACT



These 28 3-4lbs. spools (91 lbs. total) of No. 36 single silk-covered wire will cost you $243 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm bridging-bell magnets. Your winding labor will cost you at least $5 additional, making a total cost of your own 1,000 magnets finished at factory, $248.

The above box contains 1,000 "Duplex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $218.70 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

Just the Work for Engineers, Electricians, Dynamo Tenders, etc.

PART I. CONTENTS.—CHAPTER I: Electricity; Positive and Negative; Conductors, Non-Conductors and Insulators; Electro-Motive Force; Volts; Resistance; Ohms; Current; Amperes.—CHAPTER II: Dynamos; Magnets; Field Coils; Electro Magnets; Permanent Magnets.—CHAPTER III: Armatures, Construction of, Different Kinds of; Commutators, How Made and Connected; Heating of Armatures; Eddy Currents.—CHAPTER IV: The Current; How Produced; Induction; Series Wound Dynamos; Shunt Wound Dynamos; Exciting the Fields; Constant Current and Constant Potential Dynamos; Series and Parallel; Parallel or Multiple Arc System.—CHAPTER V: Incandescent Lamps; Filaments; Connections; Flashing; Exhausting; Testing; Candle Power; Operated in Series; Automatic Cut-Out; In Multiple Arc or Parallel; Multiple Series; Multiple Series Cut-Out; Three Wire System.—CHAPTER VI: The Arc Light; How Formed; Causes of Unsteadiness; Remedy; Effect of Shades or Globes; Shape of Carbons Under Different Conditions of Burning; Arc Lamps; Regulating and Cut-Out Mechanism; Action of Current; Clutch Lamps; Clockwork Lamps; Double Lamps; Troubles in Lamps.—CHAPTER VII: Commutators and Brushes; The Brush Commutators; Brushes; Different Styles of Brushes; Double Brushes; Single Brushes; Troubles with Commutators and Brushes; Correct Position of Brushes; Sparking at Brushes; Care of Brushes and Commutators; Flashing.—CHAPTER VIII: Current Regulation; Hand Regulation; By Position of Brushes; Resistance Box; Resistance Coils.—CHAPTER IX: American System of Automatic Current Regulation; The Dynamo; Regulator; Action of Regulator. CHAPTER X: Brush System of Automatic Current Regulation; Brush Armature; Diagram of Circuits through Dynamo, Regulator and Lamps; Dial or Regulator; Care and Adjustment of Dial; Dial Controller; Circuits and Connections of No. 8 Brush Dynamo; Circuits of Compound Wound Constant Potential Brush Dynamo.—CHAPTER XI: The Edison System; Automatic Regulator; Circuits of Regulator; Circuits of Dynamo; Action of Regulator; Howell Pressure Indicator; Diagram of Circuits; Description of Parts and Operation.—CHAPTER XII: Excelsior System of Automatic Current Regulation; Dynamo; Armature; Diagram of Circuits; The Regulator and Motor; Action of Regulator.—CHAPTER XIII: Schuyler System of Automatic Current Regulation; Dynamo; Armature, Commutator and Brushes; Diagram of Circuits in Armature and Field; Regulator; Circuits in Regulator.—CHAPTER XIV: Thomson-Houston System of Automatic Current Regulation; Dynamo; Armature; Commutator and Brushes; Controlling Magnet; Wall Controller; Diagram of Circuits; Air Blast.—CHAPTER XV: Waterhouse System of Three-Brush Automatic Current Regulation; Dynamo; Extra Brush; Resistance Coils and Regulator. CHAPTER XVI: Ampere Meters; Tangential Scale; Solenoid Meters.—CHAPTER XVII: Voltmeters; Pressure and Potential Indicators.—CHAPTER XVIII: Testing; Galvanometers; Astatic Needle; Differential Apparatus.—CHAPTER XIX: Wheatstone Bridge or Electrical Balance; Diagram of Circuits and Methods of use; Bridge and Rheostat; Round Form; Square Form.—CHAPTER XX: The Magneto as a Testing Instrument; Armature; Field; Bell; Diagram of Circuits.—CHAPTER XXI: Coupling Dynamos Together; In Series; In Shunt; Series, Shunt and Compound Wound Machines.—CHAPTER XXII: Switches and Switchboards; Loop Switch; Plug and Socket; Change Over Plug and Socket: Conclusion. CHAPTER XXXIII: Electric Motors; General Principles the Same as in Dynamos; Types; Shunt and Series Motors Suitable for all General Purposes; Regulation of Shunt Motors; Of Series Motors; Counter E. M. F.; Direction of Rotation and Direction of Current; Starting Motors; Diagram of Connection.

PART II. CONTENTS.—CHAPTER I: Alternate Current Dynamos; Principles of the Field; Field Current Armature; Winding; Connections; Lamination; Different Types of Alternators; Regulation; Leading Systems; The Brush Generators; Magnets; Armature; Principles of Induction.—CHAPTER II: Dynamos, Continued; The Mordey Alternator; Stationary Armatures; Field Magnets; Ferranti Armature; Field Magnets; Winding; Collectors.—CHAPTER III: Dynamos Concluded; Siemens Dynamo; Best Magnetic Circuits; Stanley Constant Current Dynamo; The Armature; Self Induction; Regulation.—CHAPTER IV: Induction Coils; Converters; Transformers; Economy of Distribution; An Electrical H. P.; Losses in Conductor; Induction Coils; Effect of Induction; Transformers.—CHAPTER V: Transformers Continued; Induction Coils; Converters; Transforming Up and Down; Design of Transformers; The Static Charge; Protection Against; Grounding the Secondary; Other Devices; The Foil Protector; Different Types of Transformers.—CHAPTER VI: Transformers, Concluded; Fuses; Regulation; Winding of Transformers; Connecting to Circuit; Regulation; Safety Fuses.—CHAPTER VII: Parallel System; Series Arc Light System; Diagram of Circuits; Parallel System; Primary Circuit; Secondary Circuit; Placing of Transformers; Fuses; Diagram of Series Arc Light Circuit.—CHAPTER VIII: Lines of Force; Hysteresis; Magnetic Penetration; The Circuit of Lines of Force; Experiments with Magnet; Rapidity of Reversals and Hysteresis.—CHAPTER IX: Arc Lamps; In Series; The Westinghouse Arc Lamp; Diagram of Circuits in Lamp; Action of the Mechanism; Flat Carbons.—CHAPTER X: Arc Lamps, in Multiple; Slattery Differential Lamp; Mechanism of Lamp; Its Operation.—CHAPTER XI: Measuring and Indicating Apparatus; Instruments for Use with Alternating Currents Differ from those used with Continuous Currents; Ammeters; Voltmeters; Description of Several Forms of Instruments.—CHAPTER XII: Measuring Instruments, Continued; Hot Wire Instruments; The Cardew Voltmeter; Details of the Instrument; Low Potential Voltmeter.—CHAPTER XIII: Voltmeters; Double Coil Voltmeter; Two Types.—CHAPTER XIV: Spring Meters; Curled Spring Meter.—CHAPTER XV: Twisted Strip Instruments; Diagram of Connections and Operation of Instrument.—CHAPTER XVI: Recording Meters; Stanley Meter; Construction and Principles of Operation; Diagrams of Parts; Slattery Induction Meter; Description of Parts and Principles of Operation; Watt Meter; Thomson Meter.—CHAPTER XVII: Generators in Parallel; Difficulties in Operating; Alternate Current Generators in Parallel; Arrangements of Circuits and Machines for Operating in Parallel; Diagram of Common Arrangement of Machines and Circuits.—CHAPTER XVIII: Ohm's Law; Strength of Current; Formulas and Examples; Power and Heating Effects of Currents.—CHAPTER XIX: Ground Alarms and Leak Detectors.

PRICE, $2.50.

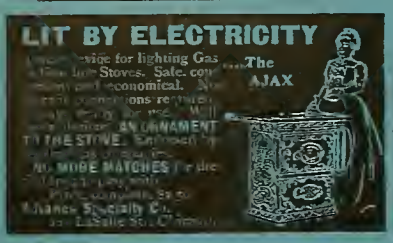
HUEBEL & MANGER, 286 Graham St., BROOKLYN, N. Y.



THE TROUBLE OF OIL ON BELTS OVERCOME BY

OIL EXTRACTING POWDER,

MANUFACTURED SOLELY BY

SHULTZ BELTING COMPANY.

A great many belts get oil on them, which lessens their driving power by causing them to slip, besides rotting the belt. To send them to some place to have the oil extracted is expensive, and another belt must be kept in reserve, to be used while this is being done.

We manufacture an Oil Extracting Powder which can be applied to the belt while it is running on the pulleys, which absorbs the oil and leaves the belt in nice, dry condition. This can be done with little cost and without loss of time or the use of the belt. It also lengthens the life of the belt. We guarantee it to absorb the oil if used as directed.

This Powder is put up in 10 and 25 pound cans.

Price, 30 Cents per Pound.

SHULTZ BELTING COMPANY,

It can be had from our agents. ST. LOUIS, MO.

Sterling Extra Insulating Varnish.

THE STERLING VARNISH COMPANY, 325 Water St., Pittsburg, Pa.

VULCANIZED FIBRE.

CHICAGO EDISON COMPANY,

139 ADAMS STREET, CHICAGO.

DOES

Your Electric Light or Street Railway Plant Pay Satisfactory Dividends?

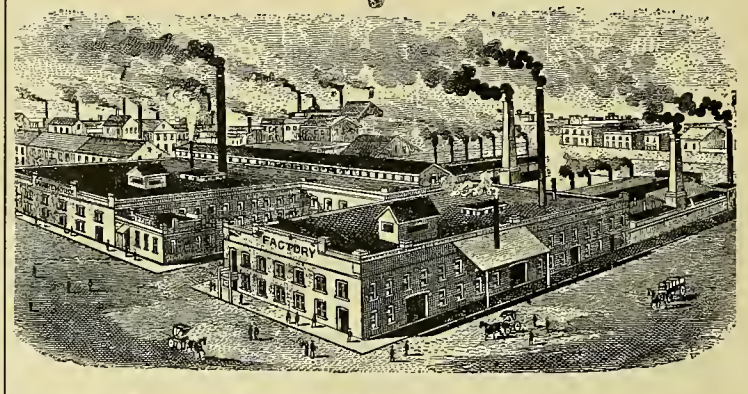
If not, why don't you remodel and put it on a paying basis? That's a specialty of our business.

HAYS CONSTRUCTION CO.,

CONSULTING ENGINEERS,

TROY, OHIO.

PHOENIX



We Are Still Doing Business

at the old stand, and desire to announce to the trade that we are running full time and manufacturing and selling everything in the battery and specialty line.

We have discontinued the manufacture of electric light carbons and street railway motor brushes of every description.

Our products ARE THE BEST.

Our facilities are UNSURPASSED.

We are in a position to MAKE PRICES to meet the requirements of the times or COMPETITION of the World.

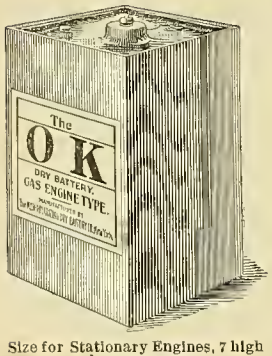
Our stock is complete, and we solicit your business.

PHOENIX BATTERY MFG. CO.,

ST. LOUIS, MO.

OK DRY BATTERY,

NEW GAS ENGINE TYPE.



Size for Stationary Engines, 7 high by 4½ square.
Size for Automobiles, 7 high by 4 square.

THE PROBLEM SOLVED.

No Solution to slop over. No Missing of sparks.
Highest Voltage.
Quickest Recuperation. Long Life.
Unaffected by heat or cold. Compactness.

BOXED, CONNECTED, COMPLETE, READY TO BE HITCHED TO ENGINE.

POINTS IN ORDERING.

1. Name of engine.
2. Number of revolutions per minute.
3. Number of sparks per minute.
4. Mode of ignition, whether by spark coil or induction coil.
5. If spark coil, whether butting or wiping spark.
6. Kind of spark contact points, whether platinum, steel or other material.
7. Average number of hours per day engine is run.

NON-POLARIZING DRY BATTERY CO., 625 BROADWAY, NEW YORK.

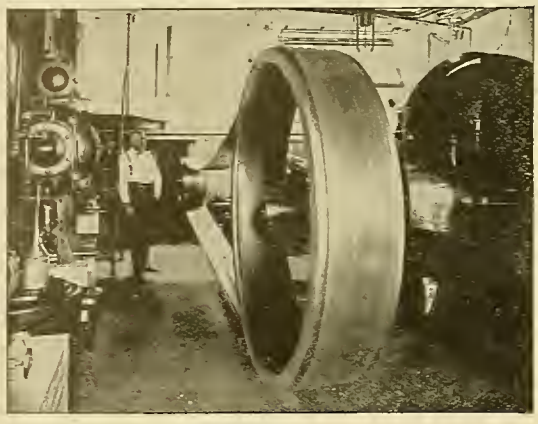
MANHATTAN ELECTRICAL SUPPLY CO., 32 CORTLANDT STREET, NEW YORK.



BROWN, DURRELL & CO.

Cling-Surface Mfg. Co., Buffalo, N. Y. Boston, Mass., Aug. 1, 1899.

Dear Sirs:—Having tried Cling-Surface on my 12-inch dynamo belt (16 feet between centers), I have been able to carry full load with 22-inch sag on belt with no perceptible slip. It surpasses my expectations and I can recommend it to do all that is claimed for it, if directions are followed. Yours respectfully, E. B. PRESCOTT, Engineer.

AN EASY BELT MADE POSSIBLE BY

CLING-SURFACE

Means a saving of time, money, belt and bearings, to say nothing of the engineer's comfort.

There is no better belt preservative known than Cling-Surface.

We have something to say.
Write Us.

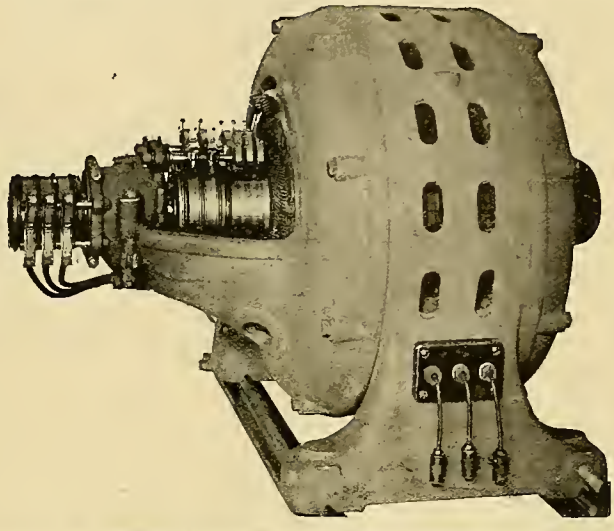
THE GENERAL ELECTRIC COMPANY'S
NEW TYPE OF ALTERNATOR.



75 K. W. G. E. Compensated Revolving Field Combined Alternator and Direct-coupled Exciter.

Without change of adjustment this type of alternator gives accurate automatic voltage regulation when loaded with lights, with motors or with a combination of the two, while the compounding of all other alternators requires special adjusting for similar loads. **WRITE FOR BULLETIN 4206.**

Main Office: SCHENECTADY. **Sales Offices in all Large Cities.**

INCANDESCENT LAMPS
G. & W.

LIFE--Because they are Well Made.
EFFICIENCY--Because the filaments are the Best.
ECONOMY--Because they are Lower in Price and give better light with less consumption of current than any other lamp on the market.

SPECIAL PRICES offered to Electrical Supply Houses, Power Plants, Railways and all large users of Incandescent Lamps.

OUR LAMPS ARE
OUR BEST SALESMEN.
LET US SEND YOU SAMPLES.

GOODCHILD & WELSH,
149 Academy St., NEWARK, N. J.

THE PERFECT **VACUUM** DOES IT.

Made of the Highest Grade Materials, and by Latest Process known. Quality Guaranteed.

EACH LAMP EXHAUSTED INDIVIDUALLY, WHICH INSURES EFFICIENCY, CANDLE POWER AND ECONOMY IN CONSUMPTION OF CURRENT.

MAINTAIN YOUR VOLTAGE

The Lamp Will Do The Rest.

Prices F. O. B., Owensboro, Ky., 8, 10, 16 C. P., Bbl. Lots, 17c each. 32 C. P., Bbl. Lots, 25c each. Either E., T.-H. or W. H. Bases.

TRY A BARREL AND BE CONVINCED.

MANUFACTURED BY...

KENTUCKY ELECTRICAL CO., OWENSBORO, KENTUCKY.
INCORPORATED.

NEW TYPE SUNBEAM.

220 VOLTS. 8, 10, 16, 32, 50 CANDLE POWER.

We make a specialty of High Voltage Incandescent Lamps.

Catalogue 1-S gives complete description and illustration of the New Type Sunbeam lamps, made by new machinery and latest improved methods. Every lamp exhausted individually.

Canadian Branch, Mille Roches, Ont., KEZAR & BENNETT, Agents.

OUR STUDENTS SUCCEED.

FARMER BECOMES SUPERINTENDENT.
I think there is no better chance to advance than through the Schools. Before I enrolled I was a farmer, and knew practically nothing about electricity or steam engineering. My Courses in Electric Power and Lighting and Stationary Engineering have been a source of great benefit to me, as I now have charge of an electric-light plant, and cheerfully admit that I owe my position and salary to the Schools.
STEPHEN S. YAHNER, *Patton, Pa.*

BECAME CHIEF ENGINEER.
For some time previous to enrolling in the Schools I had been reading everything I could get pertaining to mechanical and electrical engineering, but found that I needed a better education in mathematics. When I enrolled in the Electrical Engineering Course I was second engineer of the Topeka Railway Company. About one year afterwards, I was promoted to the position of chief engineer at a much larger salary.
J. L. CHASE, *Topeka, Kansas.*

Nine Electrical Courses. Electrical Engineering, Electrical, Electric Power and Lighting, Electric Lighting, Electric Railways, Telephony, Telegraphy, Electric Mining, Wiring and Bell Work.
Electrical Instruction in charge of PROF. R. B. WILLIAMSON,
Formerly professor of Electricity in Lehigh University.
105,000 STUDENTS AND GRADUATES August, 1899. CAPITAL, $1,500,000.
$12 to $70 in Small Monthly Installments pays for a
SALARY-RAISING EDUCATION.

OF TWO OR THREE CYLINDERS, STATING CONDITION, PRICE, ETC.

ADDRESS P. O. BOX 1637, - MALDEN, MASS.

FOR SALE.

One 90 K. W. Ft. Wayne Generator, compound wound, separately excited, slotted armature, 1,040 revolutions, 1,100 volts, 140 cycle, with exciter, switchboards and instruments. Machine and all attachments in first-class condition. Answer "GENERATOR," care Western Electrician, 510 Marquette Building, Chicago.

SPECIAL SALE OF ELECTRICAL MACHINERY.

We offer for immediate delivery, subject to prior sale, the following new machinery manufactured by the Stanley Electric Manufacturing Company of Pittsfield, Mass., and bought by us for a mining plant in the West. The mining company having failed, the machinery was never started in operation, and is entirely new just as it was received from the factory.

The Type F Generator is 360 K. W., speed 400 R. P. M., shipping weight 89,334 lbs.

The two type A synchronous motors (one 40 H. P. one 60 H. P.), speed 1,333 R. P. M., shipping weight 5,600 lbs. each.

The 200 H. P. synchronous motor, 800 R. P. M., shipping weight 12,000 lbs.

One 3 K. W. exciter, speed 1,000 R. P. M., shipping weight 700 lbs.

Two 1 K. W. C. & C. exciters, speed 2,400 R. P. M., shipping weight 225 lbs.

One 1½ K. W. C. & C. exciter, speed 2,000 R. P. M., shipping weight 275 lbs.

Two 6 A 3 H. P. motors, speed 1,840 R. P. M., shipping weight 480 lbs. each.

Two 10 A. M. 3 H. P. transformers, shipping weight 580 lbs. each.

One 12 A. 10 H. P. motor, speed 1,500 R. P. M., shipping weight 1,800 lbs.

One 14 A. M. 10 H. P. transformer, shipping weight 960 lbs.

Two switchboards, will weigh about 2,000 lbs.

Also the following machine manufactured by the Eddy Electric Manufacturing Company, new and never been used:

One 80 K. W., 500 volt, generator, about 108 H. P.

Also the following wire material:
84,000 ft. No. 0000 copper wire.
112,000 ft. No. 00 copper wire.
6 miles of No. 8 copper wire.
Prices on application.

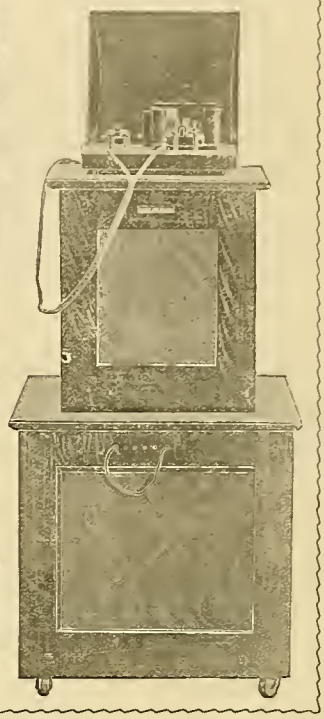
CLEVELAND, 63-75 FRANKFORT ST., OHIO.

The Warner Telephone Generator Cabinet.



SIMPLE, DURABLE, EFFICIENT.

It is rapidly taking the place of the old magneto-generator outfit for ringing subscribers' bells. Is just the thing for selective signal ringing; is furnished fitted with either dry or storage batteries. One set of dry batteries is guaranteed to give 600,000 signals, allowing about five seconds to each signal. It is guaranteed to ring the heaviest loaded toll lines and to do harder work than any magneto made. It is just the thing for exchanges, both large and small. Is the cheapest and most reliable method of obtaining power for this purpose. You cannot afford to be without it. It is fully guaranteed and is sold by all responsible telephone supply houses.

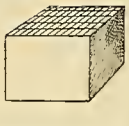
Our **Magneto Bells, Receivers, Switchboard Generators and Transmitters Lead the World.**

THE WILLIAMS ELECTRIC CO.,

CLEVELAND, OHIO.

TELEPHONE MEN AND ALL USERS OF MAGNET COILS HAVE YOUR MAGNET COILS WOUND BY MACHINERY.

HERE'S THE OBJECT LESSON— A PLAIN FACT



These 28 3-lbs. spools (91 lbs. total) of No. 36 single silk-covered wire will cost you $243 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm bridging-bell magnets. Your winding labor will cost you at least $5 additional, making a total cost of your own 1,000 magnets finished at factory, $248.

The above box contains 1,000 "Duplex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $218.70 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

The Best Lubricator Is the Cheapest.

Trotter's Mona Commutator Compound is the most efficient lubricator, the only article that is guaranteed to stop sparking. It is used in the largest electric power plants throughout the United States and Canada. It puts that beautiful luster on your commutator, lubricates the brushes, and keeps the surface in that condition that you have long sought to obtain. Does away with the use of sandpaper or any other material that wears out or destroys its surface. If you want your machine to run noiseless and sparkless, thus obtaining your equilibrium and quietness, you will certainly adopt its use.

"The Mona" comes in two sizes: Small, $3 00 per doz ; large, $5.00. For sale at all supply houses throughout the world. A sample will be mailed free upon application, with directions for use, by addressing

EUGENE FIELD'S POEMS—A $7.00 BOOK

THE Book of the century. Handsomely Illustrated by thirty-two of the World's Greatest Artists. Divided equally between the family of the late Eugene Field and the Fund for the building of a monument to the memory of the beloved poet of childhood. Address EUGENE FIELD MONUMENT SOUVENIR FUND, 180 Monroe St., Chicago
(Also at Book Stores)
If you also wish to send postage, enclose 10 cts.

Given Free

to each person interested in subscribing to the Eugene Field Monument Souvenir Fund. Subscribe any amount desired. Subscriptions as low as $1.00 will entitle donor to his daintily artistic volume "FIELD FLOWERS" (cloth bound, 8x11), as a certificate of subscription to fund. Book contains a selection of Field's best and most representative works and is ready for delivery.

But for the noble contribution of the world's greatest artists this book could not have been manufactured for less than $7.00.

The Fund created is divided equally between the family of the late Eugene Field and the Fund for the building of a monument to the memory of the beloved poet of childhood.

IT IS THE BEST. WHY NOT HAVE IT?

ERICSSON TELEPHONE CO. 296 Broadway N.Y.

Dark Days Call For Bright Lights,

AND A BRIGHT LIGHT MEANS THE

ESPERSEN ADJUSTABLE SHADE LAMP.

When you purchase protection for your eyes, you want the best and that is what we offer you. Why is it that our shade lamp business the past year has doubled? Because our lamps are sold on their merit, and each lamp is the best salesman we can procure. Why is it that thousands of these lamps are sent to Europe and all over the world? Foreigners are practical buyers, they are careful buyers, and they look well to the merit of an article before they purchase. They have given our lamp universal praise.

Remember we are spending large sums of money advertising our lamps in the magazines and journals of the country, educating the consumer and buyer, and we are doing this for you, the dealer and jobber. We create the demand for these lamps, and we constantly receive inquiries from all over the United States and Europe asking us for circulars and catalogues, and we refer them to the dealer. If the dealer does not carry them we ship direct. Do you wish these inquiries? Then carry our goods. Give us a trial order; a sample will convince you, and you will place increased orders with us.

We make our lamps in twenty-five different styles to suit all kinds of people, and we make special lamps to order. Tell us what you wish, and send for our catalogue and discount.

OVER FIVE THOUSAND SHADES SOLD DURING THE MONTH OF NOVEMBER.

Pacific Electric Co., La Crosse, Wis., U. S. A.

"FEDERAL SALT"

(PATENTED.)

DIAMOND METER CO.,

PEORIA, ILL., U. S. A.

METER WITH CASE.

Small Lamps for the Little Folks, Large Ones for the Grown People.

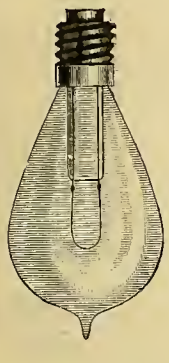
All add to the **Holiday Decorations** and are intended for use on battery or incandescent lighting circuits and furnished either in natural glass or artificial colors.

MINIATURE LAMPS

For battery currents require from 3 to 7 volts and give from 1 to 6 candle power. Those for incandescent circuits of 50 to 110 volts are intended to burn singly or in series. The candle power is from 1 to 8.

COMMERCIAL LAMPS

of Columbia make are from 10 to 50 candle power. The 10 and 16 c. p. are also made in natural glass colors. We artificially color any size of lamp, or will supply Vitro Chrome or Zero Frost for lamp treatment at home.



The "Ever Ready" Banquet and Bedroom Lamps make Attractive and Useful Presents.

THE

Won't chatter like a monkey when the circuit is closed.

BELDEN

Won't flicker and splutter before settling down to work.

ARC

Won't require aligning when carbons are renewed or trimmed.

LAMP

There are several things it WILL do, which our booklet will explain—sent on request.

—THE—

BELDEN-LARWILL Electric & Mfg. Co.,

FT. WAYNE, IND., U. S. A.

THE LIGHTS FLICKER BECAUSE THE BELTS SLIP IN ELECTRIC-LIGHT STATIONS

And the Power is unequal.
Belts filled with Cling-Surface do NOT slip, but run steadily and smoothly. Because they do not slip they can be relieved of tension and run easy, yet will transmit at least fifteen per cent. more power. Cling-Surface is not a belt dressing, but is a belt filler, and does not make a sticky belt—yet they never slip. And Cling-Surface is one of the BEST BELT PRESERVATIVES KNOWN. Your belts are valuable, and you are afraid of belt dressings but so are the BELTS of Fraser & Chalmers, Chicago; Union Traction Co., Philadelphia; American Steel and Wire Co., Worcester, Mass., and General Electric Co. Lamp Works, and they use and value Cling-Surface. Let us tell you more about it.

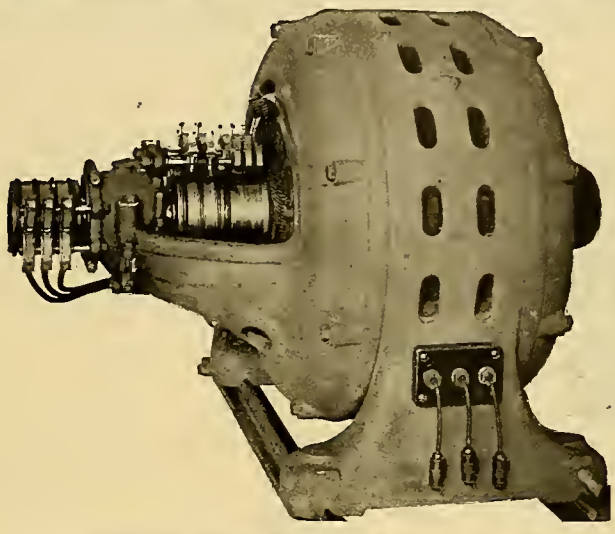
THE GENERAL ELECTRIC COMPANY'S
NEW TYPE OF ALTERNATOR.



75-Kw. G.E. Compeosated Revolving Field Combined Alternator and Direct-coupled Exciter.

Without change of adjustment this type of alternator gives accurate automatic voltage regulation when loaded with lights, with motors or with a combination of the two, while the compounding of all other alternators requires special adjusting for similar loads. WRITE FOR BULLETIN 4206.

Main Office: SCHENECTADY. **Sales Offices in all Large Cities.**

THE SEAL OF APPROVAL

Has been placed on the use of Automobiles by the high social factors of the country and another year no member of elite society will be up-to-date or strictly correct in every respect in his equipage unless he is the possessor of one or more Automobiles. Anticipating this, the **Woods Motor Vehicle Company** have developed and perfected beyond all further experiment under the Woods system of electrical propulsion correct styles for the coming year in over thirty different forms of vehicles, including Buggies, Traps, Brakes, Broughams, Victorias and Cabs, all of which are so simple in their operation and care that the same servants now employed can be retained, and in the lighter vehicles for ladies' and gentlemen's driving an hour's time is sufficient to learn their every manipulation.

Cost to run per mile, ½ cent. STANHOPE. Price, $2,000.00 net.

STANDARD OF THE WORLD.

Weight, 1,800 Pounds.

Mileage capacity, one charge, 35 miles.

Speed per hour, 12 miles.

The Stanhope illustrated here fills in every particular the requirements of the fastidious carriage user, as it has every feature of refinemeot in design and style which constitutes a carriage and not a mere machine, and one of the greatest delights in store for ladies is the usage of this character of vehicle. We strongly recommend the placing of orders early this fall and winter for spring delivery in order to insure no delay in getting such vehicles for a full season's use next year. Send for book of magnificent illustrations in latest styles of Automobiles.

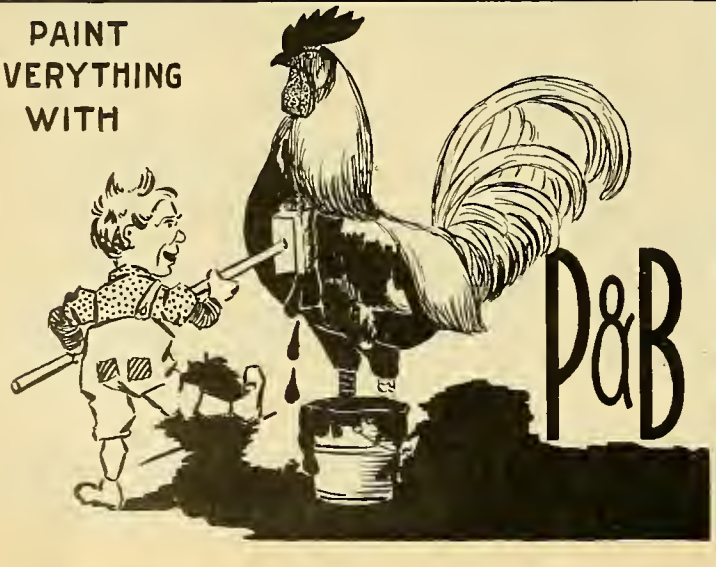
PAINT EVERYTHING WITH



P&B

A new T.-H. Arc Lamp is hard to beat, and you CAN'T beat it if you fit it up with the **Knutson Gravity Clutch.**

YOUR OLD T.-H. ARC LAMPS

Will be good as new if you fix them up RIGHT, and BETTER if you take out old-style clutches and fit them up with the

Knutson Gravity Clutch,

The only clutch ever made that can be put in a lamp without taking rods out. We can FIX your T.-H. Lamps and make them better than they ever were.
We wish also to call the attention of arc lamp users to our one-piece upper and lower carbon holders for ½-inch and ⅝-inch carbons.

Write Us for Prices and Particulars.

THE "CLARK" WIRE.

FOR SWITCHBOARD, RAILWAY and MOTOR USE.

All sizes of Stranded and Flexible Wire and Cables with Clark's Insulation

Inspector Boston Fire Underwriters' Union says:
"A thoroughly reliable and desirable wire in every respect."

The Clark wire has been before the public and in use for the past ten years, and has met with universal favor. We guarantee our insulation wherever used, Aerial, Underground or Submarine, and our net prices are as low, if not lower, than any other first-class insulated wire. We shall be pleased to mail Catalogues, with terms and discounts for quantities.

EASTERN ELECTRIC CABLE COMPANY,

HENRY A. CLARK, Treas. and Gen'l Manager.
HERBERT H. EUSTIS, Pres. and Electrician.

61-63 Hampshire Street,
BOSTON, MASS.

EVERY RHEOSTAT WE MAKE and sell is intended to sell more as a result of its operation. A large number have been sold in that way, and more and more are being sold because those already in service are proving their worth in hard, everyday use. If you want to be sure of getting a high-class Rheostat, get a C. & H.

THE CUTLER-HAMMER MFG. CO.,

12th and St. Paul Sts., MILWAUKEE, WIS. 136 Liberty St., NEW YORK.

The largest and widest exclusive manufacturers of rheostats in the world. Write for prices and particulars.

CAN I BECOME AN ELECTRICIAN?

Yes, you can. We teach ELECTRICAL ENGINEERING at your home BY MAIL at a cost within the reach of anyone. No matter where you live, if you can read and write, we guarantee to teach you thoroughly. Our institute is endorsed by THOMAS A. EDISON and other prominent men of the country. We teach also MECHANICAL ENGINEERING, MECHANICAL DRAWING, MACHINE DESIGN, TELEGRAPHY, TELEPHONY, ELECTRIC RAILWAYS, ELECTRO-THERAPEUTICS, ELECTRIC MINING, etc., by mail. Write for Catalogue. State subject you wish to study. The Electrical Engineer Institute of Correspondence Instruction, Dept. K, 120-122 Liberty St., New York.

I consider the Electrical Engineer Institute of Correspondence Instruction conducted by Messrs. Wheeler and Morton to be of great value to those who desire an Electrical education.

TO LOS ANGELES AND SOUTHERN CALIFORNIA.

Every Friday night, at 10:35 p. m., a through Tourist Car for Los Angeles and Southern California leaves the Chicago, Milwaukee & St. Paul Railway Union Passenger Station, Chicago, via Omaha, Colorado Springs and Salt Lake City, for all points in Colorado, Utah, Nevada and California.

In addition to the regular Pullman porter, each car is accompanied by an intelligent, competent and courteous "courier," who will attend to the wants of passengers en route. This is an entirely new feature of tourist-car service, and will be appreciated by families or by ladies traveling alone. Particular attention is paid to the care of children, who usually get weary on a long journey.

These tourist cars are sleeping cars supplied with all the accessories necessary to make the journey comfortable and pleasant, and the berth rate (each berth will accommodate two persons) is only $6 from Chicago to California. Ask the nearest ticket agent for a tourist-car folder, or address Geo. H. Heafferd, General Passenger and Ticket Agent, Chicago, Ill.

The Best Lubricator Is the Cheapest.

Trotter's Mona Commutator Compound is the most efficient lubricator, the only article that is guaranteed to stop sparking. It is used in the largest electric power plants throughout the United States and Canada. It puts that beautiful luster on your commutator, lubricates the brushes, and keeps the surface in that condition that you have long sought to obtain. Does away with the use of sandpaper or any other material that wears out or destroys its surface. If you want your machine to run noiseless and sparkless, thus obtaining your equilibrium and quietness, you will certainly adopt its use.

"The Mona" comes in two sizes: Small, $3 00 per doz ; large, $5.00. For sale at all supply houses throughout the world. A sample will be mailed free upon application, with directions for use, by addressing

TROTTER'S MONA MFG. CO., Ltd., No. 320 Broadway,

TELEPHONE MEN AND ALL USERS OF MAGNET COILS HAVE YOUR MAGNET COILS WOUND BY MACHINERY.

HERE'S THE OBJECT LESSON— A PLAIN FACT

These 28 3+lbs. spools (91 lbs. total) of No. 36 single silk-covered wire will cost you $2 43 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm trudging-bell magnets. Your winding labor will cost you at least $5 additional, making a total cost of your own 1,000 magnets finished at factory, $8 48.

The above box contains 1,000 "Duplex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $218.70 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

EUGENE FIELD'S POEMS— A $7.00 BOOK

THE Book of the century Handsomely Illustrated by thirty-two of the World's Greatest Artists.

Given Free

to each person interested in subscribing to the Eugene Field Monument Souvenir Fund. Subscribe any amount desired. Subscriptions as low as $1.00 will entitle donor to his daintily artistic volume "FIELD FLOWERS" (cloth bound, 8x11), as a certificate of subscription to fund. Book contains a selection of Field's best and most representative works and is ready for delivery.

But for the noble contribution of the world's greatest artists this book could not have been manufactured for less than $7.00.

The Fund created is divided equally between the family of the late Eugene Field and the Fund for the building of a monument to the memory of the beloved poet of childhood. Address

EUGENE FIELD MONUMENT SOUVENIR FUND,
(Also at Book Stores) 180 Monroe St., Chicago

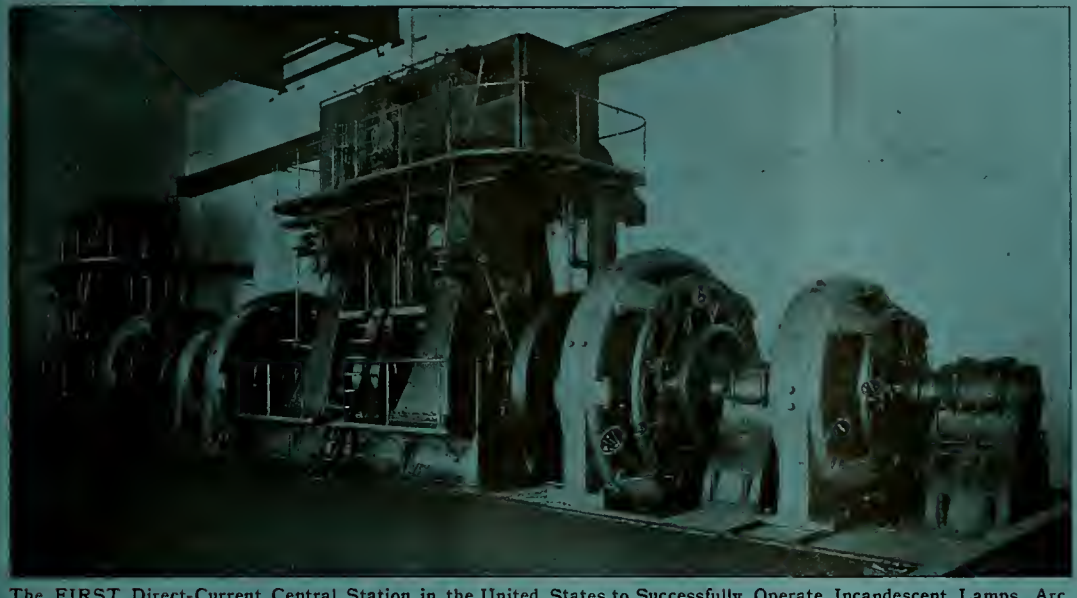
WE DESIGN AND BUILD COMPLETE

ELECTRIC POWER PROPERTIES.

Two of Our Latest Up-to-Date Plants.



The FIRST Direct-Current Central Station in the United States to Successfully Operate Incandescent Lamps, Arc Lamps and 250 and 500 Volt Motors Off One Set of Mains.

Described in This Issue:

Plant of the

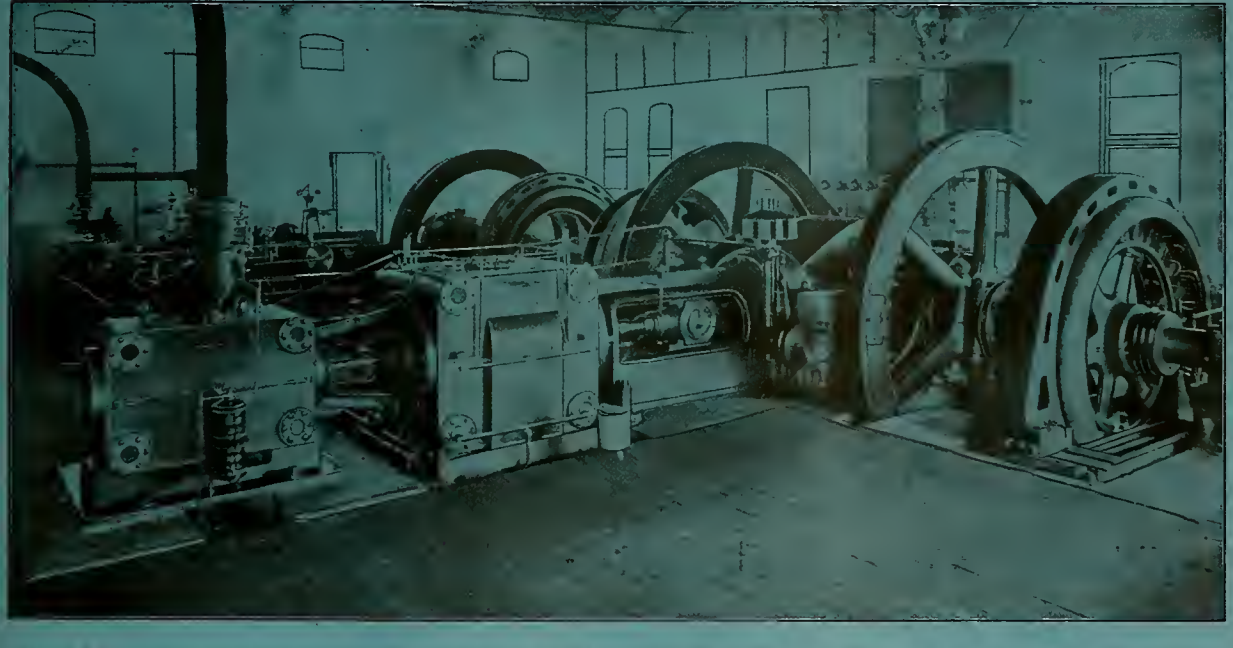
IMPERIAL ELECTRIC LIGHT, HEAT & POWER CO., ST. LOUIS, MO.

The contract for this entire plant, including building, was awarded to the Arnold Electric Power Station Co., upon designs submitted with its proposition. Engines and generators are connected by the

"ARNOLD SYSTEM"

And by

Arnold Magnetic Clutches.



The FIRST Long-Distance Electric Railway Operated from a Central Steam Station Using Three-Phase Transmission Rotary Converters, Sub-stations and Battery Auxiliaries.

DESCRIBED IN WESTERN ELECTRICIAN, OCT. 21, 1899.

Plant of the

Chicago & Milwaukee Electric Railway.

We considered the conditions, developed a system of generation and distribution, submitted a proposition and took the contract for the entire equipment. This is a three-phase electric railway using rotary converters and storage batteries. The engines and generators are connected by the **"Arnold System"** and by **Arnold Magnetic Clutches.**

In each of these plants a stipulated economy was guaranteed under a bonus and forfeiture contract.

We are prepared to submit propositions on complete electric plants for any purpose, under reliable guarantees, after learning particulars.

Washington, D. C.,

November 15, 1899.

The Non-polsrizing Dry Battery Company,

625 Broadway,

New York.

Gentlemen:

I take great pleasure in stating that as fer as our use of "O. K." dry batteries has gone, they have proven all they are represented to be, and we have adopted them as our standard Dry Cell. We used only this make of dry cells in Cuba and Porto Rico and now use them in the Philippines, they lasting longer than any other make we have ever used.

WAR DEPARTMENT SIGNAL OFFICER NOV 15 1899 DISBURSING OFFICE.

Very truly yours,

Eugene A. Disbrow

Captain & Signal Officer, U. S. Vols., Disbursing Officer.

O. K. DRY BATTERIES

Are O.K.'d By All Users.

Read what a Government War Official says of the O. K. Battery.

They are unequaled for Telephones, Fire and Police Telegraph, Railway Signal Work, Burglar Alarms, Electric Clocks, Gas Engines, Etc., Etc.

Used exclusively by U. S. Signal Corps and Pullman Palace Car Co.

Polarization reduced to a minimum. Unaffected by heat or cold. High voltage and amperage. Great recuperative power. Longest life. Compact. Full strength.

Beware of Imitations.

Other manufacturers endeavor to imitate the shape but cannot approach the quality.

3¼x1x1⅞ 4x1¼x1⅝ 4¾x1½x2 5⅝x1¾x2¼ 6x2x2½ 7x2¼x2¾

NON-POLARIZING DRY BATTERY CO.,

625 Broadway, New York.

CHINA SWITCHES

INSIDE WIRING.

Remove Mechanical Appearance to the aid of Artistic Effect.

China Case Coloring permits Matching or Blending with Woodwork or Wall Tints.

Special Catalogue with net prices will soon be distributed.....

Central Electric Company,

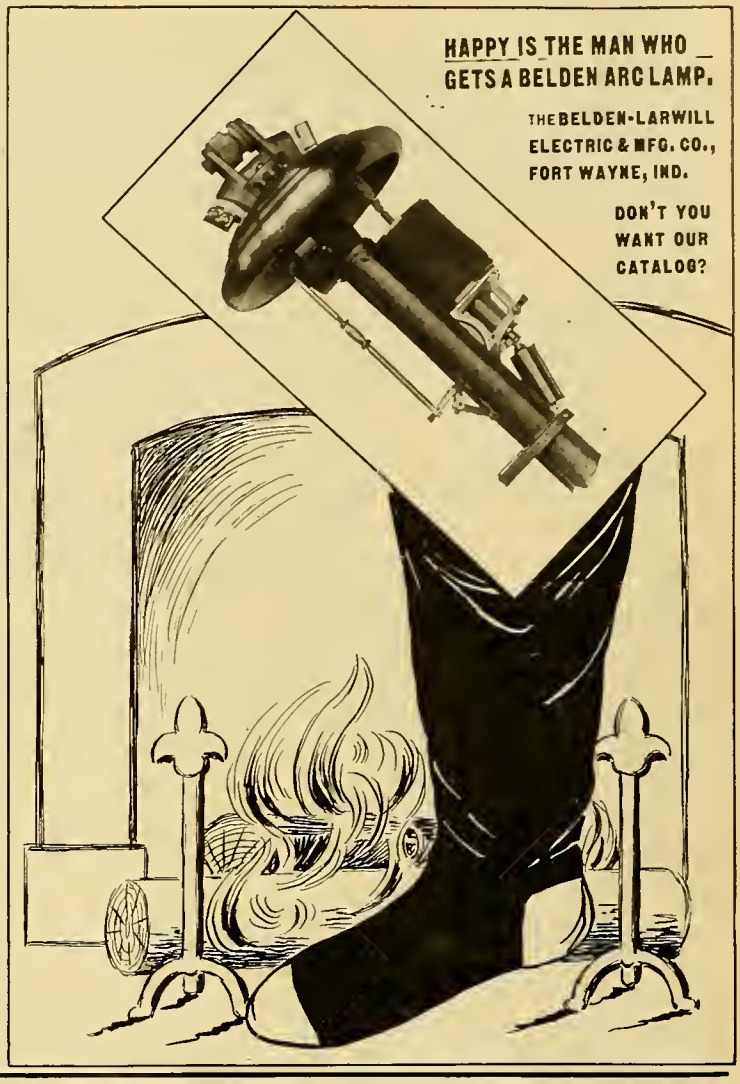
264-270 Fifth Avenue,

CHICAGO, OKONITE IT NEVER DISAPPOINTS *ILLINOIS.*

HAPPY IS THE MAN WHO GETS A BELDEN ARC LAMP.

THE BELDEN-LARWILL ELECTRIC & MFG. CO., FORT WAYNE, IND.

DON'T YOU WANT OUR CATALOG?



PERFECT contact between upper carbon and central tube—supplied through a novel flexible wire arrangement.

Skeleton for solenoids made of vulcabeston, reducing heating effect in coils 25 per cent.

Confinement of all vibration within U-shaped core—an almost absolutely noiseless alternating-current lamp.

Carbons 9½ x ½ inch upper; lower, 5¾ x ½ inch, one cored and one solid.

Length over all 25 inches, or with reflector 24 inches. Weight about 24 lbs.

Life 75 hours, more according to quality of carbons.

Wide range in adjustment, from 50 to 133 cycles on 95 to 125 volts.

Ready access to inner globe and trimming device.

Made for globe or reflector in any finish.

G. I.

YOU MAY NOT BELIEVE US WHEN WE SAY THAT CLING-SURFACE

WILL STOP A BELT'S SLIPPING, SO IT CAN RUN EASY.

BUT YOU MAY BELIEVE

LAKE CITIES ELECTRIC RAILWAY CO., Michigan City, Ind.: "Have been using Cling-Surface on our two main engine belts and are very much pleased with it; as these belts were slack they slipped, but now with Cling-Surface on them, we have no trouble and they run finely."

GENERAL ELECTRIC CO., LAMP WORKS, Harrison, N. J.: "Cling-Surface has given better satisfaction than anything we ever used."

ADAMS & WESTLAKE CO., Chicago: "Have been using Cling-Surface some time and it gives perfect satisfaction."

FRASER & CHALMERS, Chicago: "After 3 years' use of Cling-Surface we can state that it is a good article and has given us entire satisfaction."

FOREHAND ARMS CO., Worcester, Mass.: "Have been using Cling-Surface on 24-inch belt, 35 feet between centers; it is now running with 18-inch sag and gives us perfect satisfaction. Before using Cling-Surface, this belt ran very tight with much trouble from running off pulleys."

WE CAN GIVE YOU PLENTY MORE. ASK US ABOUT CLING-SURFACE.

OUR STUDENTS SUCCEED.

FARMER BECOMES SUPERINTENDENT.

I think there is no better chance to advance than through the Schools. Before I enrolled I was a farmer, and knew practically nothing about electricity or steam engineering. My Courses in Electric Power and Lighting and Stationary Engineering have been a source of great benefit to me, as I now have charge of an electric-light plant, and cheerfully admit that I owe my position and salary to the Schools.

STEPHEN S. YAHNER, *Patton, Pa.*

BECAME CHIEF ENGINEER.

For some time previous to enrolling in the Schools I had been reading everything I could get pertaining to mechanical and electrical engineering, but found that I needed a better education in mathematics. When I enrolled in the Electrical Engineering Course I was second engineer of the Topeka Railway Company. About one year afterwards, I was promoted to the position of chief engineer at a much larger salary.

J. L. CHASE, *Topeka, Kansas.*

Nine Electrical Courses. Electrical Engineering, Electrical, Electric Power and Lighting, Electric Lighting, Electric Railways, Telephony, Telegraphy, Electric Mining, Wiring and Bell Work.

Electrical Instruction in charge of PROF. R. B. WILLIAMSON, Formerly professor of Electricity in Lehigh University.

105,000 STUDENTS AND GRADUATES August, 1899. CAPITAL, $1,500,000.

$12 to $70 in Small Monthly Installments pays for a

SALARY-RAISING EDUCATION.

GEO. F. SCHWALM & CO.,
HARRISON, N. J.

The Best Lubricator Is the Cheapest.

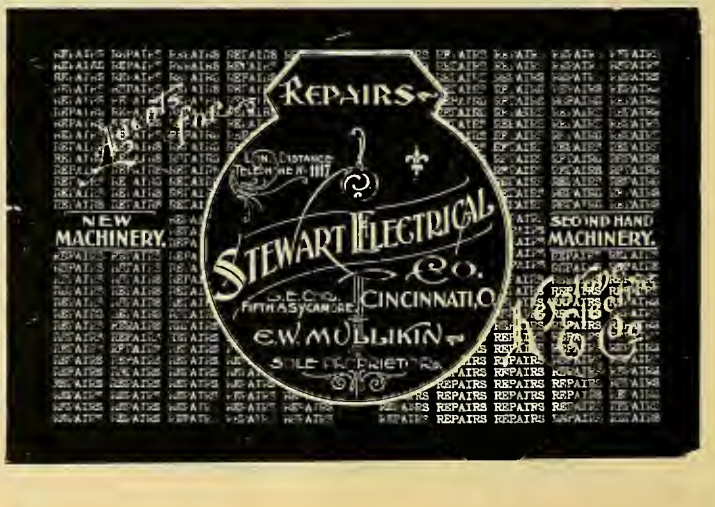
Trotter's Mona Commutator Compound is the most efficient lubricator, the only article that is guaranteed to stop sparking. It is used in the largest electric power plants throughout the United States and Canada. It puts that beautiful luster on your commutator, lubricates the brushes, and keeps the surface in that condition that you have long sought to obtain. Does away with the use of sandpaper or any other material that wears out or destroys its surface. If you want your machine to run noiseless and sparkless, thus obtaining your equilibrium and quietness, you will certainly adopt its use.

"The Mona" comes in two sizes: Small, $3 00 per doz; large, $5.00. For sale at all supply houses throughout the world. A sample will be mailed free upon application, with directions for use, by addressing

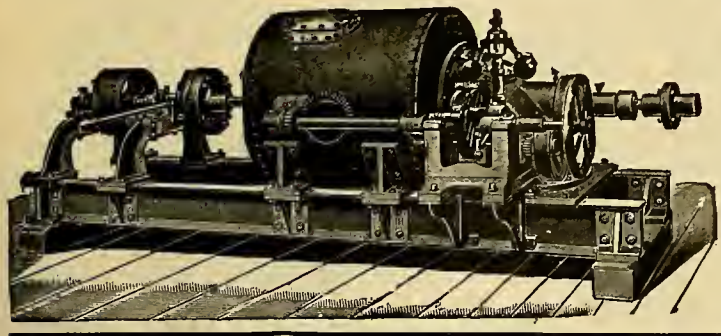
TROTTER'S MONA MFG. CO., Ltd., No. 320 Broadway,
Or Messrs. Goldmark & Wallace, 121 Worth St., New York.

Satisfaction Guaranteed or Money Refunded. Telephone Call, 1962 Franklin.

Please mention Western Electrician when writing.



Victor Turbines Operating Dynamos.



That there are more Victor Turbines in use supplying power for electric generators than any other is due to the many points of superiority possessed by this Turbine.

FEATURES WORTH REMEMBERING:

High Speed, Close Regulation,
Great Capacity, High Efficiency,
Perfect Cylinder Gate, Steady Motion.

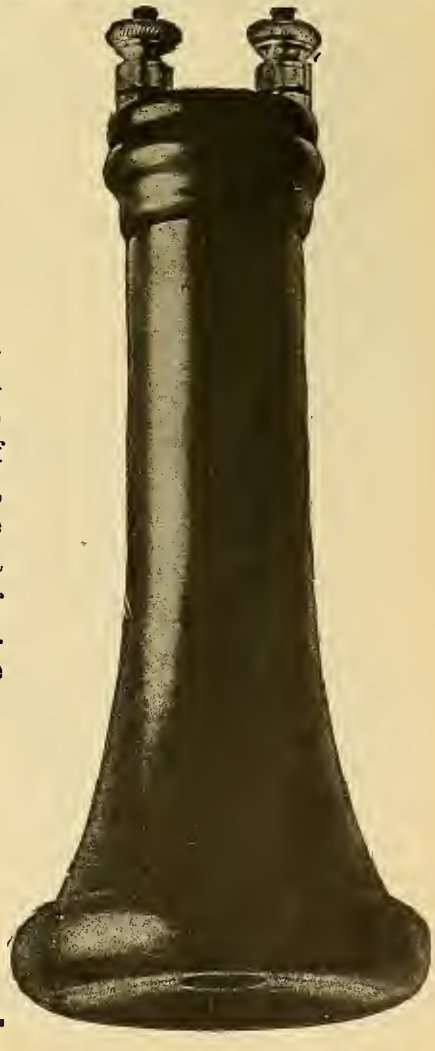
To the Unconverted!



IN our efforts to secure your business we have often longed for that gift of prophecy which seems so easily acquired by many of our Telephone friends, that we might be able to give you the exact dates when all competitors would be wiped off from the face of the earth. Failing in this accomplishment, we have sighed for that spirit of poetry which would enable us to melt your icy heart and cause you to sweat blood as a penalty for not using the W. & C. Bi-polar Receiver and our complete Telephone Equipment. But we have no such ability. Our only salvation seems to be in making the best telephone apparatus on earth, and some day you will find it out.

Your Electrical Books of the **Electrician Publishing Co., Suite 510 Marquette Bldg., Chicago.** You will save **TIME** and **MONEY** by doing so. . . . . .

POSITIVELY THE BEST.

No. 25.

We do not manufacture **cheap** apparatus, but have **spared no pains** to make our product not only **attractive in appearance,** but of the **highest degree of perfection,** electrically and mechanically, yet attained. Our efforts have met with the earnest and gratifying support of all who have given our goods a trial.

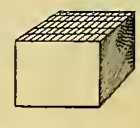
We assure you, **you will be making a mistake,** unless you examine our No. 25 Phones before placing your large orders.

Our **Magneto Bells, Receivers, Switchboard Generators and Transmitters Lead the World.**

THE WILLIAMS ELECTRIC CO.,
CLEVELAND, OHIO.

TELEPHONE MEN AND ALL USERS OF MAGNET COILS HAVE YOUR MAGNET COILS WOUND BY MACHINERY.

HERE'S THE OBJECT LESSON— A PLAIN FACT



These 28 3-lbs. spools (91 lbs. total) of No. 36 single silk-covered wire will cost you $2.43 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm bridging-bell magnets. Your winding labor will cost you at least $5 additional, making a total cost of your own 1,000 magnets finished at factory, $7.48.

The above box contains 1,000 "Duplex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $218.70 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

THE VARLEY DUPLEX MAGNET CO. DOES IT BY MACHINERY
138 7TH ST. JERSEY CITY N.J. WE CAN SAVE YOU CONSIDERABLE MONEY.

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.
13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.
28. Metallic Circuit.
29. Underground Wires.
30. Lightning Arresters.
31. Inside Wiring.
32. Installation of Telephone Instruments.
33. Inspection and Maintenance.
34. The Condenser; Its Use in Telephony.
35. Electromagnetic Retardation.
36. Exchange Working.
37. Small Exchanges.
38. Party Lines: The Bridging Bell.
39. Long Distance Telephony.
40. Duplex Telephony.
41. Simultaneous Telegraphy and Telephony.
42. Recent Progress. Appendix.

COLUMBIA CARBONS

FOR ENCLOSED ARCS

Guaranteed superior to any imported Carbon in uniformity of size and straightness, or subject to return at our expense. Try us and be convinced.

NATIONAL CARBON COMPANY,

1198 West Madison Avenue,
CLEVELAND OHIO.

CARBONS

FOR

Direct and Alternating Incandescent Arc Lamps.

IMPORTED ELECTRA NUERNBERG.

TRADE MARK

A large line in stock,
CORED and SOLID.

These carbons are the best made
and, when used with our

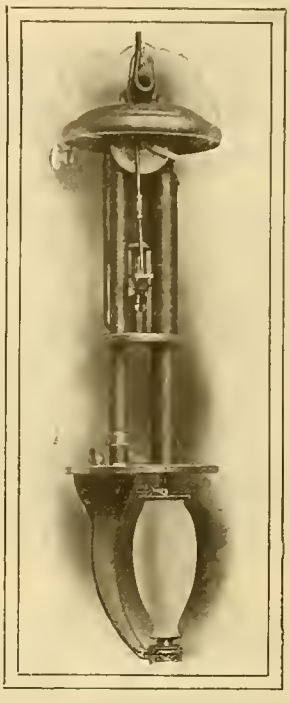
ZECO ARC LAMPS,

assure perfect light.

Central Electric Company,

264-270 Fifth Avenue,
CHICAGO.

OKONITE IT NEVER DISAPPOINTS



THE

Start the New Year right by using the "Belden" Arc Lamp. It will prove a paying investment.

BELDEN

It will burn a minimum of 150 hours with a single 12x½-inch carbon. "There's a saving."

ARC

It can be trimmed while hot and as easy as an open arc. This does away with breakages. "There's a saving."

LAMP

It has no complicated parts, therefore requires less attention than any lamp on the market. "There's a saving."

We pay the postage on our catalog. "There's a saving."

—THE—

BELDEN-LARWILL Electric & Mfg. Co.,

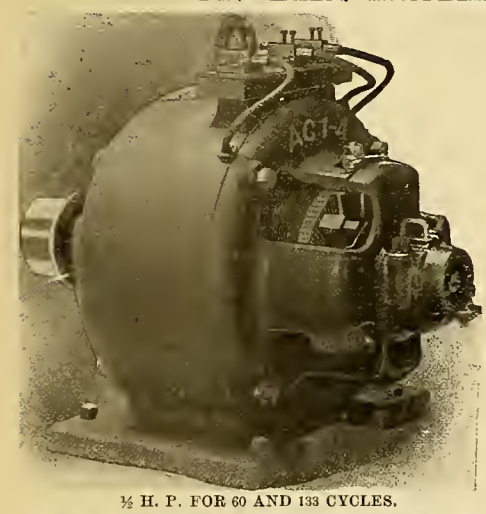
FT. WAYNE, IND., U. S. A.

Watch This Space

FOR THE

LATEST and BEST ELECTRICAL APPARATUS

ON THE MARKET.



½ H. P. FOR 60 AND 133 CYCLES.

Our ½ H. P. Single-Phase Self-Starting A. C. Motors ARE THE LATEST addition to our well-known list of standard sizes.

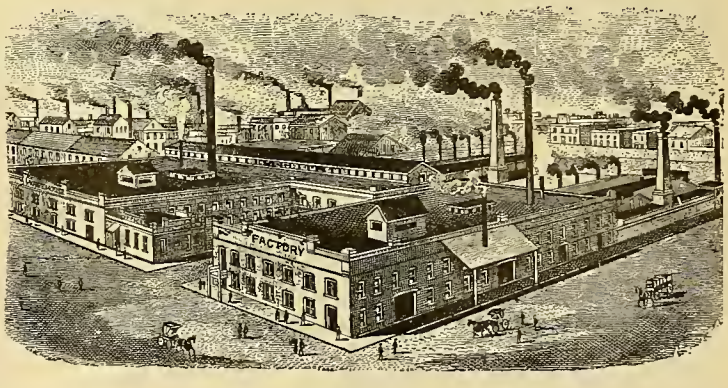
PHOENIX



We Are Still Doing Business

at the old stand, and desire to announce to the trade that we are running full time and manufacturing and selling everything in the battery and specialty line.

We have discontinued the manufacture of electric light carbons and street railway motor brushes of every description.

Our products ARE THE BEST.

Our facilities are UNSURPASSED.

We are in a position to MAKE PRICES to meet the requirements of the times or COMPETITION of the World.

Our stock is complete, and we solicit your business.

PHOENIX BATTERY MFG. CO.,

ST. LOUIS, MO.

THE LIGHTS FLICKER BECAUSE THE BELTS SLIP IN ELECTRIC-LIGHT STATIONS

And the Power is unequal.
Belts filled with Cling-Surface do NOT slip, but run steadily and smoothly. Because they do not slip they can be relieved of tension and run easy, yet will transmit at least fifteen per cent. more power. Cling-Surface is not a belt dressing, but is a belt filler, and does not make a sticky belt—yet they never slip. And Cling-Surface is one of the BEST BELT PRESERVATIVES KNOWN. Your belts are valuable, and you are afraid of belt dressings but so are the BELTS of Fraser & Chalmers, Chicago; Union Traction Co., Philadelphia; American Steel and Wire Co., Worcester, Mass., and General Electric Co. Lamp Works, and they use and value Cling-Surface. Let us tell you more about it.

THE "CLARK" WIRE.

FOR SWITCHBOARD, RAILWAY and MOTOR USE.

All sizes of Stranded and Flexible Wire and Cables with Clark's Insulation

Inspector Boston Fire Underwriters' Union says:
"A thoroughly reliable and desirable wire in every respect."

The Clark wire has been before the public and in use for the past ten years, and has met with universal favor. We guarantee our insulation wherever used, Aerial, Underground or Submarine, and our net prices are as low, if not lower, than any other first-class insulated wire. We shall be pleased to mail Catalogues, with terms and discounts for quantities.

EASTERN ELECTRIC CABLE COMPANY,

The largest and oldest exclusive manufacturers of rheostats in the world. Write for prices and particulars.

CAN I BECOME AN ELECTRICIAN?

Yes, you can. We teach ELECTRICAL ENGINEERING at your home BY MAIL at a cost within the reach of anyone. No matter where you live, if you can read and write, we guarantee to teach you thoroughly. Our institute is endorsed by THOMAS A. EDISON and other prominent men of the country. We teach also MECHANICAL ENGINEERING, MECHANICAL DRAWING, TELEPHONY, ELECTRIC RAILWAYS, ELECTRIC LIGHTING, SHORT POPULAR ELECTRICAL COURSE, ELECTRO-THERAPEUTICS, ELECTRIC MINING, etc., by mail. Write for Catalogue. State subject you wish to study.

The Electrical Engineer Institute of Correspondence Instruction, Dept. K, 120-122 Liberty St., New York.

I consider the Electrical Engineer Institute conducted by Messrs Wagner and Morton one of great value to those who desire an Electrical education. Thomas A. Edison

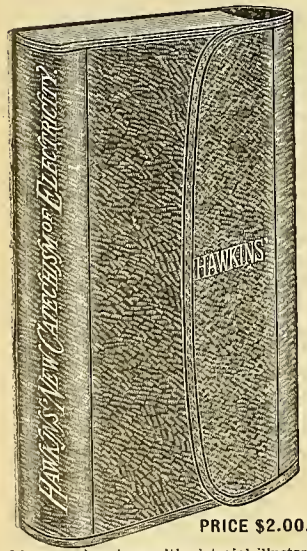
HAWKINS' NEW CATECHISM OF ELECTRICITY.

Plan of the Work, Contents, Etc.



PRICE $2.00.

The New Catechism of Electricity will be found to be surprisingly plain, and free from useless and ambiguous terms. The plan upon which it is arranged is unique.

The book is, first of all, intended to be plain and instructive; some 300 illustrations have been introduced, so that the mere pictures will afford almost a knowledge of the subjects.

It is a school book from the manner in which it proceeds from the simple facts to the abstract principles which the facts indicate; it is also a book of reference through the index of seventeen double columns of fine type pages; by means of this index a thousand items of practical importance are at once available.

It is an up-to-date work, which has cost a large outlay of capital and time, and, in short, it is doubtful if any more attractive book has ever been issued—or one more useful.

The subjects treated upon are as follows: Dedication to Thomas A. Edison, with engraving of Mr. Edison; Preface and Introduction; Nature and Source of Electricity and Magnetism.

The Dynamo; Conductors and Non-Conductors; Symbols, abbreviations and definitions relating to electricity; Parts of the Dynamo; The Motor; The Care and Management of the Dynamo and Motor.

Electric Lighting; Wiring; The rules and requirements of the National Board of Underwriters in full; Electrical Measurements.

The Electric Railway; Line Work; Instruction and Cautions for Linemen and the Dynamo Room; Storage Batteries; Care and Management of the Street Car Motor; Electro Plating.

The Telephone and Telegraph; The Electric Elevator; Accidents and Emergencies, etc., etc.

The full one-third part of the whole work has been devoted to the explanation and illustrations of the dynamo, and particular directions relating to its care and management;—all the directions are given in the simplest and most kindly way to assist rather than confuse the learner. The names of the various parts of the machine are also given with pictorial illustrations of the same.

In the Catechism no less than 25 full page illustrations have been given of the various dynamo machines made in different parts of the country, and an equal number of part page illustrations.

The Best Lubricator Is the Cheapest.

Trotter's Mona Commutator Compound is the most efficient lubricator, the only article that is guaranteed to stop sparking. It is used in the largest electric power plants throughout the United States and Canada. It puts that beautiful luster on your commutator, lubricates the brushes, and keeps the surface in that condition that you have long sought to obtain. Does away with the use of sandpaper or any other material that wears out or destroys its surface. If you want your machine to run noiseless and sparkless, thus obtaining your equilibrium and quietness, you will certainly adopt its use.

"The Mona" comes in two sizes: Small, $3 00 per doz; large, $5.00. For sale at all supply houses throughout the world. A sample will be mailed free upon application, with directions for use, by addressing

TROTTER'S MONA MFG. CO., Ltd., No. 320 Broadway,
Or Messrs. Goldmark & Wallace, 121 Worth St., New York.

Satisfaction Guaranteed or Money Refunded. **Telephone Call, 1962 Franklin.**

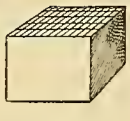
HIGH GRADE TELEPHONE APPARATUS
EXCLUSIVELY.

WRITE FOR 1900 CATALOGUE.

TELEPHONE MEN AND ALL USERS OF MAGNET COILS HAVE YOUR MAGNET COILS WOUND BY MACHINERY.

HERE'S THE OBJECT LESSON— A PLAIN FACT



These 28 3-4 lbs. spools (91 lbs. total) of No. 36 single silk-covered wire will cost you $243 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm bridging-bell magnets. Your winding labor will cost you at least $5 additional, making a total cost of your own 1,000 magnets finished at factory, $248.

The above box contains 1,000 "Duplex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $218.70 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

Important Telephone Books.

THE TELEPHONE HANDBOOK. By Herbert Laws Webb. 16mo, 150 pp. Price $1.00.
This handbook is a complete treatise on telephony, and a practical book on telephone working and management, based entirely on standard American practice. It is extremely useful to telephone inspectors and operators.

PATENTED TELEPHONY. A Review of the Patents Pertaining to Telephones and Telephonic Apparatus. Published by the American Electrical Engineering Association. Cloth bound; fully illustrated. Price $1.50.

THE ELECTRIC TELEPHONE. By E. J. Houston, Ph. D., and A. E. Kennelly, Sc. D.; 12mo, cloth, 422 pp., 142 illustrations. Price $1.00.
This book describes the construction of the various forms of transmitting and receiving devices, the signaling mechanisms, and the switchboard apparatus at the central station. It is written by two well-known electricians, and has the merit of being the latest work on the subject.

THE PRACTICAL TELEPHONE HANDBOOK. By Joseph Poole, A. I. E. E. Second edition, revised and enlarged. 360 pp. 238 illustrations. Price $1.50.
In this work the writer has endeavored to produce a manual of moderate size and cost, but thoroughly practical, and detailing, as far as space will allow, the most recent methods of telephone working. While the requirements of telephone employes have been kept constantly in view, it is fully intended also that the book shall be of service as a source of information on telephonic matters to users of the telephone and to the public generally.

TELEPHONE TROUBLES AND HOW TO FIND THEM. A complete handbook for telephone inspectors. By W. Hyde and J. H. McManman, edited by Prof. C. H. Haskins. Sixth edition. 16mo, 50 pp. Price 25 cents.
This little volume is an extremely practical work for telephone employes, written in a popular style and devoid of technicalities.

TELEPHONE LINES AND THEIR PROPERTIES. By Wm. J. Hopkins. Second edition. 272 pp. Illustrated. Price $1.50.

A MANUAL OF TELEPHONY. A new and large edition. By W. H. Preece, F. R. S., and A. J. Stubbs. 608 pages. 333 illustrations. Price $4.50.

HOW TO MAKE AND USE THE TELEPHONE. By Geo. H. Cary. The purpose for which this book is written is to furnish information to those who may desire to construct or use telephone apparatus or lines on a small scale. Price $1.00.

TELEPHONES, THEIR CONSTRUCTION AND FITTING. A Practical Manual on the Fitting Up and Maintenance of Telephone and Auxiliary Apparatus. By F. C. Allsop. 191 pp., 168 illustrations. Price $2.00.

TELEPHONE SYSTEMS ON THE CONTINENT OF EUROPE. By Bennett. 436 pages. 169 illustrations. Price $4.50.

TELEPHONING OF GREAT CITIES. By Bennett. Paper. Price 35 cents.

MAGNETO HAND TELEPHONE. Its Construction, Fitting Up and Adaptability to Everyday Use. By Hughes. 80 pages. 23 illustrations. Price $1.00.

BELL'S ELECTRIC SPEAKING TELEPHONE. Its Invention, Construction, Application, Modification and History. By Prescott. New edition, revised and enlarged 795 pages. 516 illustrations. Price $4.00.

PHILIPP REIS, INVENTOR OF THE TELEPHONE. A Biographical Sketch with Documentary Testimony. By Thompson. Translation of the original papers of the inventor and contemporary publications. 182 pages. 3 plates and 48 engravings. Price $3.00.

ONE DOLLAR EACH.

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Büttcher Receivers.
CHAPTER 13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.

Engines

Unequaled for electric service, with many points of superiority; AUTOMATIC and economical oiling, superior adjustment of main bearings, connecting rod and other wearing parts; simplest and best governor; finest materials and workmanship. For particulars write

THE BALL ENGINE CO.,
ERIE, PENNA., U. S. A.

CORNELL Gas and Gasoline ENGINES

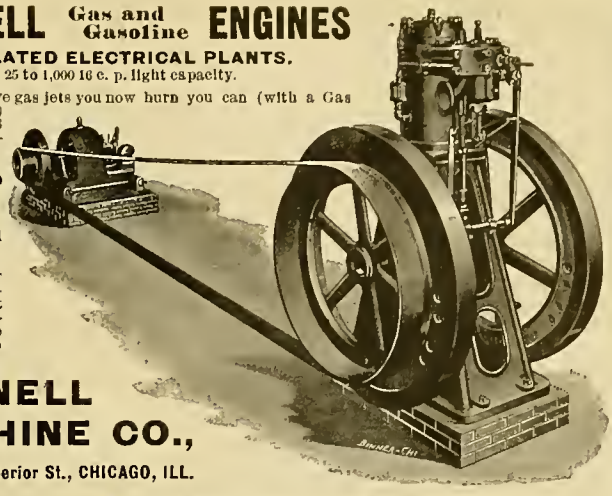
ISOLATED ELECTRICAL PLANTS.
25 to 1,000 16 c. p. light capacity.

For every five gas jets you now burn you can (with a Gas Engine Plant) obtain ten 16 c. p. incandescent lights.

Absolutely no Fluctuation.

Write for Prices and Circulars.

State number of lights required, or what work the engine will be called upon to do.



CORNELL MACHINE CO.,
175 West Superior St., CHICAGO, ILL.

EUGENE FIELD'S POEMS—A $7.00 BOOK

THE Book of the century. Handsomely Illustrated by thirty-two of the World's Greatest Artists.

Given Free

to each person interested in subscribing to the Eugene Field Monument Souvenir Fund. Subscribe any amount desired. Subscriptions as low as $1.00 will entitle donor to his daintily artistic volume "FIELD FLOWERS" cloth bound, 8x11½, as a certificate of subscription to fund. Book contains a selection of Field's best and most representative works and is ready for delivery.

But for the noble contribution of the world's greatest artists this book could not have been manufactured for less than $7.00.

The Fund created is divided equally between the family of the late Eugene Field and the Fund for the building of a monument to the memory of the beloved poet of childhood. Address

EUGENE FIELD MONUMENT SOUVENIR FUND,
(Also at Book Stores) 180 Monroe St., Chicago
If you also wish to send postage, enclose 10 cts.

WATER WHEELS

For all Heads from 3 Ft. to 2000 Ft.
Especially adapted to all kinds of
ELECTRIC POWER AND LIGHTING PLANTS.

Recent tests at Holyoke enable us to guarantee:
The Largest Power ever obtained from a wheel of the same diameter. The highest speed ever obtained for the same power. The highest mean efficiency ever realized when running from half to full gate. We guarantee also: *A runner of the greatest possible strength. A gate unequaled in quickness and ease of opening and closing. Tests show over 81 per cent. average efficiency with half to full water.*

State your Head and send for 124 page pamphlet.

JAMES LEFFEL & CO., Springfield, Ohio, U. S. A.

ELECTRICITY FOR ENGINEERS.

Latest Edition, Now Published in One Complete Volume, 424 Pages, Profusely Illustrated.
Just the Work for Engineers, Electricians, Dynamo Tenders, etc.

PART I. CONTENTS.—CHAPTER I: Electricity; Positive and Negative; Conductors, Non-Conductors and Insulators; Electro-Motive Force; Volts; Resistance; Ohms; Current; Amperes.—CHAPTER II: Dynamos; Magnets; Field Coils; Electro Magnets; Permaneot Magnets.—CHAPTER III: Armatures, Construction of, Different Kinds of; Commutators, How Made and Connected; Heating of Armatures; Eddy Currents.—CHAPTER IV: The Current; How Produced; Induction; Series Wound Dynamos; Shunt Wound Dynamos; Exciting the Fields; Constant Current and Constant Potential Dynamos; Series and Parallel; Parallel or Multiple Arc System.—CHAPTER V: Incandescent Lamps; Filaments; Connections; Flashing; Exhausting; Testing; Candle Power; Operated in Series; Automatic Cut-Out; In Multiple Arc or Parallel; Multiple Series; Multiple Series Cut-Out; Three Wire System.—CHAPTER VI: The Arc Light; How Formed; Causes of Unsteadiness; Remedy; Effect of Shades or Globes; Shape of Carbons Under Different Conditions of Burning; Arc Lamps; Regulating and Cut-Out Mechanism; Action of Current; Clutch Lamps; Clockwork Lamps; Double Lamps; Troubles in Lamps.—CHAPTER VII: Commutators and Brushes; The Brush Commutators; Brushes; Different Styles of Brushes; Double Brushes; Single Brushes; Troubles with Commutators and Brushes; Correct Position of Brushes; Sparking at Brushes; Care of Brushes and Commutators; Flashing.—CHAPTER VIII: Current Regulation; Hand Regulation; By Position of Brushes; Resistance Box; Resistance Coils.—CHAPTER IX: American System of Automatic Current Regulation; The Dynamo; Regulator; Action of Regulator. CHAPTER X: Brush System of Automatic Current Regulation; Brush Armature; Diagram of Circuits through Dynamo, Regulator and Lamps; Dial or Regulator; Care and Adjustment of Dial; Dial Controller; Circuits and Connections of No. 8 Brush Dynamo; Circuits of Compound Wound Constant Potential Brush Dynamo.—CHAPTER XI: The Edison System; Automatic Regulator; Circuits of Regulator: Circuits of Dynamo; Action of Regulator; Howell Pressure Indicator; Diagram of Circuits; Description of Parts and Operation.—CHAPTER XII: Excelsior System of Automatic Current Regulation; Dynamo; Armature; Diagram of Circuits; The Regulator and Motor; Action of Regulator.—CHAPTER XIII: Schuyler System of Automatic Current Regulation; Dynamo; Armature, Commutator and Brushes; Diagram of Circuits in Armature and Field; Regulator; Circuits in Regulator.—CHAPTER XIV: Thomson-Houston System of Automatic Current Regulation; Dynamo; Armature; Commutator and Brushes; Controlling Magnet; Wall Controller; Diagram of Circuits; Air Blast.—CHAPTER XV: Waterhouse System of Three-Brush Automatic Current Regulation; Dynamo; Extra Brush; Resistance Coils and Regulator. CHAPTER XVI: Ampere Meters; Tangential Scale; Solenoid Meters.—CHAPTER XVII: Voltmeters; Pressure and Potential Indicators.—CHAPTER XVIII: Testing; Galvanometers; Astatic Needle; Differential Apparatus.—CHAPTER XIX: Wheatstone Bridge or Electrical Balance; Diagram of Circuits and Methods of use; Bridge and Rheostat; Round Form; Square Form.—CHAPTER XX: The Magneto as a Testing Instrument; Armature; Field; Bell; Diagram of Circuits.—CHAPTER XXI: Coupling Dynamos Together; In Series; In Shunt; Series, Shunt and Compound Wound Machines.—CHAPTER XXII: Switches and Switchboards; Loop Switch; Plug and Socket; Change Over Plug and Socket; Conclusion. CHAPTER XXXIII: Electric Motors; General Principles the Same as in Dynamos; Types; Shunt and Series Motors Suitable for all General Purposes; Regulation of Shunt Motors; Of Series Motors; Counter E. M. F.; Direction of Rotation and Direction of Current; Starting Motors; Diagram of Connection.

PART II. CONTENTS.—CHAPTER I: Alternate Current Dynamos; Principles of the Field; Field Current Armature; Winding; Connections; Lamination; Different Types of Alternators; Regulation; Leading Systems; The Brush Generators; Magnets; Armature; Principles of Induction.—CHAPTER II: Dynamos, Continued; The Mordey Alternator; Stationary Armatures; Field Magnets; Ferranti Armature; Field Magnets; Winding; Collectors.—CHAPTER III: Dynamos Concluded; Siemens Dynamo; Best Magnetic Circuits; Stanley Constant Current Dynamo; The Armature; Self Induction; Regulation.—CHAPTER IV: Induction Coils; Converters; Transformers; Economy of Distribution; An Electrical H. P.; Losses in Conductor; Induction Coils; Effect of Induction; Transformers.—CHAPTER V: Transformers Continued; Induction Coils; Converters; Transforming Up and Down; Design of Transformers; The Static Charge; Protection Against; Grounding the Secondary; Other Devices; The Foil Protector; Different Types of Transformers.—CHAPTER VI: Transformers, Concluded; Fuses; Regulation; Winding of Transformers; Connecting to Circuit; Regulation; Safety Fuses.—CHAPTER VII: Parallel System; Series Arc Light System; Diagram of Circuits; Parallel System; Primary Circuit; Secondary Circuit; Placing of Transformers; Fuses; Diagram of Series Arc Light Circuit.—CHAPTER VIII: Lines of Force; Hysteresis; Magnetic Penetration; The Circuit of Lines of Force; Experiments with Magnet; Rapidity of Reversals and Hysteresis.—CHAPTER IX: Arc Lamps; In Series; The Westinghouse Arc Lamp; Diagram of Circuits in Lamp; Action of the Mechanism; Flat Carbons.—CHAPTER X; Arc Lamps, in Multiple; Slattery Differential Lamp; Mechanism of Lamp; Its Operation.—CHAPTER XI: Measuring and Indicating Apparatus; Instruments for Use with Alternating Currents Differ from those used with Continuous Currents; Ammeters; Voltmeters; Description of Several Forms of Instruments.—CHAPTER XII: Measuring Instruments, Continued; Hot Wire Instruments; The Cardew Voltmeter; Details of the Instrument; Low Potential Voltmeter.—CHAPTER XIII: Voltmeters; Double Coil Voltmeter; Two Types.—CHAPTER XIV: Spring Meters; Curled Spring Meter.—CHAPTER XV: Twisted Strip Instruments; Diagram of Connections and Operation of Instrument.—CHAPTER XVI: Recording Meters; Stanley Meter; Construction and Principles of Operation; Diagrams of Parts; Slattery Induction Meter; Description of Parts and Principles of Operation; Watt Meter; Thomson Meter.—CHAPTER XVII: Generators in Parallel; Difficulties in Operating; Alternate Current Generators in Parallel; Arrangements of Circuits and Machines for Operating in Parallel; Diagram of Common Arrangement of Machines and Circuits.—CHAPTER XVIII: Ohm's Law; Strength of Current; Formulas and Examples; Power and Heating Effects of Currents.—CHAPTER XIX: Ground Alarms and Leak Detectors.

PRICE, $2.50.

Orders for above book, or any electrical work published promptly sent on receipt of price, postage prepaid.
